dynamics of psychiatry By following the model set forth in this book psychiatrists psychologists social workers psychiatric nurses and mental health workers will be able to build an entire brief therapy program based upon the initial conditions for each patient In Very Brief Psychotherapy Dr James Gustafson provides the reader with the tools and techniques to make a discernable difference in a patient's life in only a few moments The majority of people seeking help from mental health professionals are not pathological but are most often stuck in self imposed cyclical patterns of behavior from which they cannot escape It is the first step in any situation that leads to the iteration of the familiar circle and it is in this single step that the clinician can effect decisive change Given a window of only five or ten minutes the practitioner armed with this approach can help a patient break out of the repeating pattern move around the impasse and take the first step onto a new trajectory Very Brief Psychotherapy can help the practitioner make meaningful interventions in real world time and in less than ideal circumstances will radically change the reader's concepts of what can be accomplished in a day in a clinical hour or even in a single moment
