Essential Skills in Mathematics John A. Dossey, Lois Peak, Dawn D. Nelson, 1997 This document is a comparative report based on data that enables a different form of comparison to be made between Japanese and American eighth graders The data is drawn from assessments given in each country using tests developed via governmental agencies that were designed to mirror the basic curricula currently being offered to students in the two countries This report compares the nature of these examinations the expectations based on the curriculum and student performance on the test items This comparison combined with an accompanying analysis of the curricular emphases provides a picture of the differences in student performance that mark this study Each of the studies examined content achievement assessments students and teachers beliefs and attitudes and environmental characteristics of the classroom school and community The Japanese test items tend to present the mathematics assessed in forms that are more verbally intensive more focused on strategies for problem solving and more involved than the mathematics forms used in the National Assessment of Educational Progress Sample test items a content matrix for the U S test and the framework for the Japanese test are included Contains 29 references DDR

Mathematics framework for the 2003 National Assessment of Educational Progress [developed for the National Assessment Governing Board under contract number Rn91084001 by the College Board]. College Board, New York, Ny, 2002 This framework document describes the content and format of the National Assessment of Educational Progress naep mathematics assessments of 1996 2000 and 2003 Five content strands are

discussed in the naep mathematics assessment 1 number sense properties and operations 2 measurement 3 geometry and spatial sense 4 data analysis statistics and probability and 5 algebra and functions The level of mathematical ability including conceptual understanding procedural knowledge and problem solving is regarded as playing a central role in defining item descriptors and achieving balance across the tasks for each grade level in the naep mathematics assessment The framework reflects an integrated view of school mathematics Percentage of items allotted to each of the five strands families of tasks items to measure the depth of student knowledge in mathematics items requiring students to construct a response manipulative materials used to measure student knowledge and problem solving abilities and review for potential item bias are also discussed Khr
