**Realist Evaluation in Practice** Libby Kalucy, 2004      **Realistic Evaluation** Ray Pawson, Nicholas Tilley, 1997-04-23 Realistic Evaluation shows how program evaluation needs to be and can be bettered It presents a profound yet highly readable critique of current evaluation practice and goes on to introduce a manifesto and handbook for a fresh approach The main body of this book is devoted to the articulation of a new evaluation paradigm which promises greater validity and utility

from the findings of evaluation studies The authors call this new approach realistic evaluation The name reflects the paradigm's foundation in scientific realist philosophy its commitment to the idea that programmes deal with real problems rather than mere social constructions and its primary intention which is to inform realistic developments in policy making that benefit programme participants and the public Ray Pawson and Nicholas Tilley argue with passion that scientific evaluation requires a careful blend of theory and method quality and quantity ambition and realism The book offers a complete blueprint for evaluation activities running from design to data collection and analysis to the cumulation of findings across programmes and onto the realization of research into policy The argument is developed using practical examples throughout and is grounded in the major fields of programme evaluation This book will be essential reading for all those involved in the evaluation process especially those researchers students and practitioners in the core disciplines of sociology social policy criminology health and education This book is a must for those engaged in the field providing a fully illustrated text on evaluation with numerous examples from the criminal justice system Unusually it offers something for the academic practitioner and student alike I found Pawson and Tilley's latest work on evaluation an enjoyable and informative read For myself their realistic evaluation clarified and formalised a jumbled set of ideas I had already been developing Although not everyone will agree with the methodology proposed by the authors this book is a valuable read as it will cause most of us at least to review our methodological stance International Journal of Police Science and Management This is an engaging book with a strong sense of voice and communicative task The voice is sometimes strident but always clear Its communicative qualities are evident equally in its structure lots of signposting for the reader within and across chapters Language Teaching Research This provocative elegant and highly insightful book focuses on the effective incorporation of actual practice into the formulation of evaluation methodology What a pleasure to read sentences like The research act involves learning a stakeholder's theories formalizing them and teaching them back to that informant who is then in a position to comment upon clarify and further refine the key ideas Pawson and Tilley have given us a wise witty and persuasive account of how real practitioner experience might be encouraged to intrude on and modify researchers' concepts about program processes and outcomes This holds important promise for achieving something that is devoutly to be wished closer interaction among at least some researchers and some policy makers Eleanor Chelimsky Past President of the American Evaluation Association This is a sustained methodological argument by two worldly wise social scientists Unashamedly intellectual theoretically ambitious yet with a clear but bounded conception of evaluation It is articulate occasionally eloquent and always iconoclastic whilst eschewing paradigm wars The Pawson and Tilley realist call to arms threatens to take no prisoners among experimentalists constructivists or pluralists It is the kind of book that clarifies your thoughts even when you disagree with everything they say Elliot Stern The Tavistock Institute *Handbook of Public Policy Evaluation* Frédéric Varone, Steve Jacob, Pirmin Bundi, 2023-10-06 This comprehensive Handbook examines public policy evaluation in democracies Focusing on

the political dimension of the evaluation process it argues that policy evaluation can be an emancipatory tool reducing social inequalities and exclusion and offers novel suggestions on how evaluations can be used to improve democratic policymaking

*Realist Evaluation: An Emerging Theory in Support of Practice* Gary T. Henry, George Julnes, Melvin M. Mark, 1998-06-29 Why is another theory of evaluation needed The paradigm wars have left a void in their wake A new theory firmly grounded in a credible philosophy of science is needed to guide practice The aim of this volume is to provide a new theory that captures the sensemaking contributions from post positivism and the sensitivity to values from constructivist traditions The theory presented here is not a slap dash synthesis of the competing paradigms it is a new approach Some of the contributions of the realist theory of evaluation are 1 providing a basis for principled discovery as we oscillate between explanations and data 2 using explanation as a means for extrapolating findings from one evaluation to other settings 3 viewing all methods both quantitative and qualitative as aids to sensemaking that have strengths and flaws 4 connecting evaluation practice with the ultimate goal of most program evaluation social betterment and 5 balancing the focus of the evaluation between sensemaking and value inquiry This is the 78th issue of the quarterly journal *New Directions for Evaluation*

Nurturing Praxis ,2008-01-01 Nurturing Praxis offers a distinctive view of collaborative and action research in educational settings in four Nordic countries Sweden Norway Finland and Iceland Educational action research in Nordic countries is interpreted as being informed by the traditions of Bildung and folk enlightenment and thereby emphasizing the importance of collaboration discussion and dialogue in knowledge creation It explores the professional development of teachers especially through school university partnerships in which university researchers collaborate with teachers in a variety of educational settings in order to bring about change in and better understanding of practice It presents case studies of professional development in the context educational reform and change originating from both inside and outside schools and tackled with or enhanced by collaborative and action research By analysing the cases in the light of the Nordic traditions of Bildung and folk enlightenment the authors have been able to identify a number of key features of professional development enhanced by collaborative and action research These features are drawn together in the last chapter in a comprehensive framework for Nurturing Praxis

### **Mind the Gap** Jos

Vaessen,Frans L. Leeuw,2011-12-31 Over the past twenty to thirty years evaluation has become increasingly important to the field of public policy The number of people involved and specializing in evaluation has also increased markedly Evidence of this trend can be found in the International Atlas of Evaluation the establishment of new journals and evaluation societies and the increase in systems of evaluation Increasingly the main reference point has become an assessment of the merit and value of interventions as such rather than the evaluator s disciplinary background This growing importance of evaluation as an activity has also led to an increasing demand for the type of competencies evaluators should have Evaluation began as a niche area within the social and behavioral sciences It subsequently became linked to policy research and analysis and has more recently become trans disciplinary This volume demonstrates an association between the evaluation tradition in a particular country or policy field and the nature of the relationship between social and behavioral science research and evaluative practice This book seeks to offer comprehensive data which lead to conclusions about patterns that transcend the gap between evaluation and the social scientific disciplines Mind the Gap has a twofold aim The first is to highlight and characterize the gap between evaluation practices and debates and the substantive knowledge debates within the social and behavioral sciences The second is to show why this gap is problematic for the practice of evaluation while at the same time illustrating possible ways to build bridges The book is centered on the value of producing useful evaluations grounded in social science theory and research

*Evaluation for the Real World* Colin Palfrey,Paul Thomas,Ceri Phillips,2012-06-13

Evaluation research findings should be a key element of the policy making process yet in reality they are often disregarded This valuable book examines the development of evaluation and its impact on public policy by analysing evaluation frameworks and criteria which are available when evaluating public policies and services It further examines the nature of evidence and its use and non use by decision makers and assesses the work of influential academics in the USA and UK in the context of evaluation and policy making The book emphasises the real world of decision makers in the public sector and recognises how political demands and economic pressures can affect the decisions of those who commission evaluation research while providing recommendations for policymakers on adopting a different approach to evaluation This is essential reading for under graduate and post graduate students of policy analysis and public sector management and those who are involved in the planning and evaluation of public policies and services      *Evaluation Research Methods* Elliot Stern,2005-01-21 Evaluation is a set of research methods and associated methodologies with a distinctive purpose They provide a means to judge actions and activities in terms of values criteria and standards This collection offers a complete guide to evaluations research methods VOLUME ONE Foundations Issues in Evaluation VOLUME TWO Evaluation Practice for Engagement VOLUME THREE Explanatory and Economic Models VOLUME FOUR Strengthening Policies and Programmes      **Introduction to Theory-Driven Program Evaluation** Stewart I. Donaldson,2021-09-30 Introduction to Theory Driven Program Evaluation provides a clear guide for practicing evaluation science and numerous examples of how these evaluations actually unfold in contemporary practice A special emphasis is placed how to conduct theory driven program evaluations that are culturally responsive and strengths focused In this thoroughly revised new edition author Stewart I Donaldson provides a state of the art treatment of the basics of conducting theory driven program evaluations Each case follows a three step model developing program impact theory formulating and prioritizing evaluation questions and answering evaluation questions The initial chapters discuss the evolution and popularity of theory driven program evaluation as well as step by step guide for culturally responsive and strengths focused applications Succeeding chapters provide actual cases and discuss the practical implications of theory driven evaluation science Reflections challenges and lessons learned across numerous cases from practices are discussed The volume is of significant value to practicing evaluators professors of introductory evaluation courses and their students advanced undergraduate and graduate students and serves as a text or a supplementary text for a wide range of evaluation and applied research courses It is also of great interest to those interested in the connections between work and health well being career development human service organizations and organizational improvement and effectiveness      **Real World Research** Colin Robson,2024-04-05 Provides students and practitioner alike with clear and systematic guidance on performing social research in applied settings Real World Research supplies the multidisciplinary skills necessary to conduct social research projects inside and outside of the classroom or the workplace Offering well balanced coverage of qualitative quantitative and mixed methods this highly practical resource incorporates

approaches from different social science disciplines to help readers find answers to real life research questions in healthcare education business and management and in many other public and private settings Detailed yet accessible chapters include step by step advice for developing a research question choosing a research design strategy collecting and analyzing the data interpreting and reporting the results and more The fifth edition contains timely coverage of contemporary methodologies key ethical issues and ongoing debates within the field of social research New and expanded sections address topics such as evidence based approaches to social research ethical considerations when conducting research involving people carrying out projects based solely on existing research and the importance and implications of internet based research Featuring a wealth of up to date examples drawn from a wide range of disciplines this classic textbook Focuses on useful real world research in applied settings such as homes schools businesses and other workplaces Provides a concise overview and a well defined example of each main step of the research process Highlights the importance of collaboration cooperation and active participation in social research Explains flexible research designs using largely qualitative methods including additional coverage of ethnographic and grounded theory approaches Includes an extensive companion website with numerous research examples links to journal articles PowerPoint slides and many other additional resources Real World Research Fifth Edition remains essential reading for those tasked with developing performing and reporting the findings of a research project including students academics and educators social scientists health practitioners and professionals in a diverse range of fields
