Reality And Shadows:

Shadows of Being Marko Uršič, 2019-01-15 This book is a study of the phenomena of shadows meant in a broader sense as symbolic forms The shadow is a less real surface replica of some more real form From the Platonic point of view empirical objects are shadows of ideas while from the modern natural point of view shadows are seen and conceived primarily as weaker replicas of bodies which give evidence of their material reality In the first three essays here several topics from the Ancient Egypt and Greece to modern arts and sciences are considered while in the fourth essay the contemporary virtual reality cyber technology and the internet as our parallel shadow world are discussed from the philosophical point of view The main and innovative point of this book is the connection between the meaning of shadows in philosophy and art on the one hand and their role in modern science and technology on the other The book will appeal to a wide span of readers from academic circles students and artists to the general reader interested in the humanities especially in philosophy and art

Reality Simulation in Science Fiction Literature, Film and Television Heather Duerre Humann, 2019-08-27 In recent decades science fiction in both print and visual media has produced an outpouring of story lines that feature forms of simulated reality These depictions appear with such frequency that fictional portrayals of simulated worlds have become a popular sci fi trope one that prompts timeless questions about the nature of reality while also tapping into contemporary debates about emerging technologies In combination with tech driven tensions this study shows that our collective sense of living in politically uncertain times also propels the popularity of these story lines Because of the kinds of questions they raise and the cultural anxieties they provoke these fictional representations provide a window into contemporary culture and demonstrate how we are reassessing our own reality

Art & Its Shadow Mario Perniola, 2004-05-01 *Art and its Shadow* is an extraordinary analysis of the state and meaning of

contemporary art and film Ranging across the work of Andy Warhol cyberpunk Wim Wenders Derek Jarman thinking on difference and the possibility of a philosophical cinema Mario Perniola examines the latest and most disturbing tendencies in art Perniola explores how art notably in posthumanism psychotic realism and extreme art continues to survive despite the hype of the art market and the world of mass communication and reproduction He argues that the meaning of art in the modern world no longer lies in aesthetic value above the art work nor in popular taste below the art work but beside the artwork in the shadow created by both the art establishment and the world of mass communications In this shadow is what is left out of account by both market and mass media the difficulty of art a knowledge that can never be fully revealed and a new aesthetic future
