Aspirations Through Vocational Careers Edgar Krau, 1997-01-28 Krau provides an in depth analysis of the formation and fulfillment of life aspirations He examines the possibility of planning and predicting careers a significant instrument for achieving life meaning for people even under unfavorable economic conditions Krau asserts that to assist people in fulfilling their aspirations vocational counseling has to become counseling for self realization Drawing upon years of investigations Edgar Krau provides an in depth analysis of the formation and fulfillment of life aspirations In adolescence life aspirations take shape by imagining a desired end state But aspects of this image are often uncoordinated or even contradictory and very often the person seems unaware of these contradictions In choosing a career people attempt to match this image with public perceptions of a specific occupation But both notions may not correspond to existing realities and the actual motives behind career choice may deviate from those declared Utilizing numerous case studies and models drawn from these and other studies Krau shows the normative characteristics that lead to vocational success but also those causing failure maladjustment and frustration and he illustrates how career counseling can become successful counseling for self realization Krau provides a needed tool for personality and vocational psychologists as well as anyone involved in career development and vocational guidance *ECKM2007-Proceedings of the 8th European Conference on Knowledge Management* Dan

Remenyi, 2007 *Social and Economic Management in the Competitive Society* Edgar Krau, 2012-12-06 In many countries of the world there is a growing feeling of uneasiness about the economic situation and its related social consequences Every day the newspapers tell us that the recession is over but we see only that scores of organizations go bankrupt while others are struggling hard to stay in business that many people have lost their jobs but welfare measures are being reduced or abolished altogether By now we should have become aware that our society is not facing temporary market difficulties but a much deeper and wider crisis with only one root in worldwide economic developments while other roots are social and psychological in nature These factors are intertwined and therefore the answer to the crisis cannot merely be an economic cost benefit analysis of organizational management Sociocultural factors participate in the economic process even at the level of individual organizations and what happens in them has backlash influences on the entire society Therefore the problem is not the management of the individual organization but the macroconception of management which in the Western

world of today separates the economic aspects from the social ones and the individual organizations from society Social and Economic Management in the Competitive Society begins by analyzing the management models of today to determine which characteristics yield the best results on the economic and social levels The second step is to indicate the necessary changes of managerial thinking and acting in order to boost economic results with reasonable profits while minimizing social costs Finally the potential ramifications of such changes are explored

Work and Lifecourse in Japan David W. Plath, 1984-06-30 The durability of Japan s industrial products now holds world acclaim But the durability of jobs in Japan despite misleading Western images of lifetime employment is no better than in other industrial nations The group model of Japanese society that has been in fashion in the West confuses the goals of an organization with the personal aims and aspirations of its members Like workers anywhere those in Japan must go through life reconciling their duties to the job with their often conflicting obligations to family to community and to self respect Career outcomes are anything but certain in Japan once we see them from a worker s point of view Work and Lifecourse in Japan is a collection of workers eye level reports on career development

in a variety of Japanese organizations and professions In addition there are overview chapters on employment trends in the Japanese economy and on the problems of scheduling one's life events in the demanding milieu of our post industrial world

this technique a part of your life skills you will wonder how you lived without it *Handbook of Career Development* Gideon Arulmani, Anuradha J. Bakshi, Frederick T. L. Leong, A. G. Watts, 2014-02-08 This book is focused on work occupation and career development themes that are fundamental to a wide range of human activities and relevant across all cultures Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous An examination of the literature pertaining to career development counseling and guidance that has developed over the last fifty years reveals theorizing and model building have been largely dominated by Western epistemologies some of the largest workforces in the world are in the developing world Career guidance is rapidly emerging as a strongly felt need in these contexts If more relevant models are to be developed frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development This does not mean that existing ideas are to be discarded Instead an integrative approach that blends universal principles with particular needs could offer a framework for theorizing research and practice that has wider relevance The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling
