Really Wild Siberian Tiger:

Big Cats Tom Brakefield, Combines photography research and personal observations of the worlds eight big cats **One for the Road** Bjørn Christian Tørrissen, 2008-01-07 Building on experience from 60 countries worth of independent travel the author takes you on three journeys to places you may never have considered visiting although you probably should and you definitely could Learn about a low budget cruise to Antarctica understand what the Trans Siberian Railway really is like enjoy the natural wonders of Southern Africa The book is a fun read but you will also learn about far away destinations and about how to travel independently anywhere It s not a travel guide or a travel journal it s both More details including free downloads available from <http://bjornfree.com> **Zoo-A-Logical Math** Thomas Kearney, 2012-04 The work for this book began with a course I created and taught called Animal Behavior I always knew that there was a strong magnetic bond between people and animals but it wasn t until I began working on my curriculum that I truly found out how strong this bond really was Millions of people young and old will visit zoos and aquariums each year People stand in front of the animals hypnotized by the every movement of the animal People seemed to be looking not just at the animal but almost as if they were looking inside these animals wondering and questioning about the lives of some of our most distant animal relatives In my classroom I found the exact same kinds of responses The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world People realize that humans are also animals but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World As I began to learn more and lead my student discussions I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities and soon a brand new window into the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with *Write from the Start!
