The World at First Light Bernd Roeck, 2025-06-03 A magisterial history of the Renaissance and the birth of the modern world The cultural epoch we know as the Renaissance emerged at a certain time and in a certain place Why then and not earlier Why there and not elsewhere In *The World at First Light* historian Bernd Roeck explores the cultural and historical preconditions that enabled the European Renaissance Roeck shows that the rediscovery of ancient knowledge including the science of the medieval Arab world played a critical role in shaping the beginnings of Western modernity He explains that the Renaissance emerged in a part of Europe where competing states and cities formed relatively open societies Most of the era's creative minds from Leonardo da Vinci and Michelangelo to Copernicus and Galileo came from the middle classes The art of arguing flowered the basso continuo to intellectual and cultural breakthroughs Roeck argues that two revolutions shaped the Renaissance a media revolution triggered by Gutenberg's invention of movable type which itself was a driving force behind the scientific revolution and the advent of modern science He also reports on the dark side of the era hatred of Jews witch panic religious wars and the atrocities of colonialism In a series of meditative counterfactuals Roeck considers other cultural rebirths throughout the first millennium from the Islamic empire to the Carolingians examining why the epic developments of the Renaissance took place in the West and not elsewhere The complicated legacy of the Renaissance he shows encompasses the art of critical thinking

as learned from the ancients the emergence of the modern state and the genesis of democracy

Four Exemplars of Ru   (Confucianism) Paul J. D'Ambrosio, Geir Sigur sson, Dimitra Amarantidou, Hans-Georg Moeller, 2025-08-15 This book discusses scholars who have all engaged in comparative philosophy projects many of whom first rose to fame because of their penetrating insights into the similarities and differences in Western and Chinese thought They all went beyond simply looking at how one thinker one school or one tradition relates to another each draws on sources from China and the West However their projects from role ethics to concrete metaphysics from critiquing individualism to balancing harmony and justice are attempts at re evaluating the way we view the world and live our lives These projects are systematic thorough tong and comprehensive descriptions of

ourselves the world and our interactions with others They are all comparative but on top of this they also aim at making a point that transcends their comparisons The book thus shows that these great thinkers draw on a multiplicity of resources and while they might find some ideas closer to home than others comparison is a necessary constant Using traditional Confucian vocabulary this type of philosophizing is described as practicing xue normally understood as studying or learning But it also means to copy imitate model or emulate In the process of xue one imitates but with a nod to differences This book honors four models of such an attitude to xue In its examination of some of the most influential scholars in Chinese thought this is a seminal book for scholars and students in Chinese and comparative philosophy [The Journal of Religion](#) ,1927 Includes section Book reviews **Theoretical Principles of Relational Biology** Angelo Marinucci,2023-09-27 This book proposes the foundation of the relational approach to biology rejecting the deterministic and reductionist approach of molecular biology Although biology has made enormous progress in the last seventy years onto genesis is still conceived as a revelation of information DNA Recovering the geometric tradition relational biology conceives scientific and epistemological tools cause probability space etc of science in a new way If probabilistic biology and organicism still proposes a biology based on physics with a fundamental invariant relational biology is based on variation its fundamental invariant is variation one of the most important elements of life This is an indispensable book for academics who consider biology from a new theoretical approach in particular for those working in the domains of cancer ontogenesis and evolution **Picturing Hegel** Julie E. Studies in the Philosophy of Kierkegaard E.D. Klemke,2012-12-06 In this volume I have given attention to what I consider to be some of the central problems and topics in the philosophical thought of Søren Kierkegaard Some of the chapters have been previously published but were revised for their appearance here Others were written expressly for this book I have tried to focus on issues which have not been customarily dealt with or emphasized in the scholarship on Kierkegaard with the exception of the writings of David Swenson and Paul L Holmer to which and to whom I am greatly indebted Some of the positions for which I have argued in this volume especially in Chapters IV and V may be controversial I am grateful to all those who enabled me to carry out or influenced me in my studies of Kierkegaard or who assisted with regard to the research for or preparation of this volume Among these are Professors Paul L Holmer F Arthur Jacobson and Dennis A Rohatyn Dean Wallace A Russell and Vice President Daniel J Zaffarano of Iowa State University

Freud on Interpretation Robert W Rieber,2012-02-02 This book presents new insights into Freud's famous discovery of the unconscious and the subsequent development of psychoanalytic theories The authors explore the original context in which these ideas arose and the central debate about mind as matter or something that transcends matter In the course of this examination it is demonstrated that Freud was influenced not only by the 19th century scientific milieu but also by ancient cultures While it is known that Freud was an avid collector of ancient artifacts and generally interested in these older cultures this book systematically investigates their profound effect on his thinking and theorizing Two major influences Egyptian mythology and Jewish mysticism are analyzed in terms of similarities

to Freud's emerging ideas about the mind and its diseases To further this line of investigation Bakan supplies an illuminating discussion of what it means to interpret Taken from the viewpoint that interpretation involves an understanding of the whole **The God of Metaphysics** T. L. S. Sprigge, 2006-04-20 Can philosophy offer reasonable grounds for the existence of a God or Absolute possessing genuine even if not orthodox religious significance and not proposed simply as the solution to a purely intellectual philosophical problem Certainly many contemporary thinkers have insisted that no genuine religion could be based upon metaphysics In this book however T L S Sprigge examines sympathetically the most notable metaphysical systems of the last four centuries which purport to put religion on a rational footing and after a thorough examination of their claims considers what kind of religious outlook they might support and more briefly how they actually affected the lives of their proponents The thinkers studied include Spinoza Hegel T H Green Bernard Bosanquet together with a brief discussion of Bradley Josiah Royce A N Whitehead and Charles Hartshorne concluding with an exposition of the author's own viewpoint pantheistic absolute idealism and a general discussion on the relation between metaphysics and religion There is also a chapter on Kierkegaard as the most important critic of metaphysical religion The Logic of Events Andrew Paul Ushenko, 1929

The Beginning and Intermission Pasquale De Marco, 2025-04-12 In *The Beginning and Intermission* Pasquale De Marco embarks on a profound exploration of human existence delving into the enigma of being and the intricacies of our relationships with ourselves others and the world around us Through a comprehensive examination of the human condition this book unveils the complexities of our lives and the factors that shape our reality The existential landscape is a labyrinth of meaning purpose and authenticity Pasquale De Marco navigates this terrain exploring the crossroads of choice freedom and responsibility The anxiety of existence looms over us reminding us of the fragility and transience of our existence Yet within this existential quandary lies the potential for growth transformation and the realization of our authentic selves The interplay between being and time captivates us as Pasquale De Marco unravels the temporal horizon that frames our existence Time's relentless passage and our inescapable mortality challenge us to confront the fleeting nature of our lives The existential dimension beckons us to embrace the present moment to seize the opportunities it holds and to confront the anxieties that arise from our awareness of time's inexorable march The enigma of language unveils the power of expression and the limits of articulation Language as a medium of revelation grants us the ability to communicate our thoughts emotions and experiences Yet it also exposes the boundaries of our understanding revealing the ineffable dimensions of existence Pasquale De Marco explores the hermeneutic circle the interplay of understanding and interpretation and the poetic dimension of language which transcends rational discourse and opens us to new realms of meaning Our quest for meaning leads us on a journey of self-discovery as we confront the anxiety of meaninglessness and the existential leap into the unknown We grapple with the weight of freedom the responsibility of choice and the challenge of forging meaning in a seemingly absurd universe Through this exploration we uncover the courage to be to embrace authenticity in the face of meaninglessness and to
