The Metaphysics of Religion Michael S. Jones, 2006 Lucian Blaga was an early twentieth century European philosopher whose work was suppressed at the height of his career by the creation of the Romanian Socialist Republic Blaga s philosophical writings are rich and creative spanning metaphysics epistemology philosophy of science philosophical anthropology aesthetics philosophy of culture philosophy of history and philosophy of religion Mircea Eliade wrote that Blaga was the most gifted and critical original thinker in the history of Romanian philosophy Because of historical circumstances Blaga s philosophy has not become known outside of his own country

although within Romania it continues to be read and discussed Were it to become known outside of Romania Blaga s philosophy could provide interesting contributions to contemporary philosophical discussions The thesis of this book is that Blaga s philosophy can make valuable contributions to contemporary Anglo American philosophy In order to support this thesis Blaga s philosophical system is explained in detail so that the reader may see how it can be applied to a variety of philosophical issues philosophy of religion in order to demonstrate that it can contribute to contemporary Anglo American discussions Michael S Jones is Assistant Professor of Philosophy at Liberty University [The Method of Christian Theology](#) Rhyne Putman,2021-05-15 In The Method of Christian Theology Rhyne Putman guides readers through the essential first words of systematic theology Written for entry level theology students this book gives clear suggestions about how to use theological sources how to reason through difficult problems and how to apply theological reflection to paper writing and preaching By studying the foundations of theology readers will be better equipped to serve God s people in whatever ministry they are called to [Approaches to the Study of Religion](#) Peter Connolly,2001-11-30 It has been argued that religious studies is a polymethodic discipline and that the student of religion should be familiar with the approaches of the major disciplines concerned with understanding the nature of religion not least because the approach adopted has profound influence on the phenomena chose for investigation and the conclusions reached This book is the first textbook specifically designed for undergraduate students that provides the essential background on methods of the major relevant disciplines Presenting each of the significant approaches to religion in an informed manner the book brings together experienced researchers from feminism anthropology sociology phenomenology psychology philosophy and theology It presents a consistent approach throughout with each chapter dealing with the same themes the historical development of the approach the characteristics of the approach and the surrounding issues and debates **Philosophy and the Christian Worldview** David Werther,Mark D. Faith Has Its Reasons Kenneth Boa,Robert M. Bowman Jr.,2012-01-05 A most accessible but thoroughly practical primer on apologetics **The Epistemology of Spirit Beliefs** Hans Van Eyghen,2023-04-14 This book assesses whether belief in spirits is epistemically justified It presents two arguments in support of the existence of spirits and arguments that experiences of various sorts perceptions mediumship possession and animistic experiences can lend justification to spirit beliefs Most work in philosophy of religion exclusively deals with the existence of God or the epistemic status of belief in God Spirit beliefs are often regarded as aberrations and the falsity of such beliefs is often assumed This book argues that various beliefs concerning spirits can be regarded as justified when they are rooted in experiences that are not defeated It argues that spirit beliefs are not defeated by recent theories put forth by neuroscientists cognitive scientists or evolutionary biologists Additional arguments are made that traditional theistic belief is epistemically linked to spirit beliefs and that unusual events can be explained in terms of spirit activity The book draws on theistic arguments phenomenal conservatism

and defenses of religious experiences to argue for the justification of spirit beliefs The arguments draw on examples from various religious traditions ranging from Christianity and Islam to Haitian Vodou and Tibetan Bon The Epistemology of Spirit Beliefs will be of interest to researchers and advanced students working in philosophy of religion religious epistemology ethnography and cognitive neuroscience **Jewish Theology and World Religions** Alon Goshen-Gottstein, Eugene Korn, 2012-04-05 The contributors to this volume represent a range of disciplines and denominations within Judaism and share the conviction that articulating contemporary Jewish views of other world religions is an urgent objective for Judaism Their essays show why a Jewish theology of world religions is a priority for Jewish thinkers and educators concerned with reinvigorating Judaism's contribution to the contemporary world and maintaining Jewish identity and continuity

Apologetics in Africa Kevin Muriithi Ndereba, 2024-02-01 Divided into four major sections this textbook provides an in depth exploration of the biblical philosophical cultural and practical concerns facing African Christians as they proclaim and defend the gospel in Africa Written by a diverse group of pastors and scholars it provides a much needed interdisciplinary and contextualized approach to apologetics It also seeks to bridge the gap between academic research and ministry practice touching on such topics as hermeneutics biblical criticism church history the nature of evil religious inclusivism Muslim Christian engagement eldership rites domestic violence cults and the digital age Biblically robust contextually relevant ministry oriented and accessible this is a remarkable resource for enriching the life and ministry of Christians in Africa and beyond **An Introduction to Christian Worldview** Tawa J. Anderson, W. Michael Clark, David K. Encountering Religious Pluralism Harold Netland, 2001-08-14 Harold Netland traces the emergence of the pluralistic ethos that challenges Christian faith and mission interacting heavily with philosopher John Hick and providing a framework for developing a comprehensive evangelical theology of religions **A Philosophy of the Christian Religion** Nancey Murphy, 2018-10-30 Each field of study comes with its own set of questions each period of time refines and redirects those questions The Christian religion as we find it in the twenty first century presents a unique set of problems to be solved and questions to be answered In this introduction to the philosophy of the Christian religion eminent philosopher and theologian Nancey Murphy applies the tools of philosophical analysis to a set of core yet contemporary religious questions what does our historical moment mean for the possibility of knowing God Is faith still possible Does God intervene in human history Is there such a thing as universal knowledge of God Written with the needs of students encountering the philosophy of religion for the first time in mind this book provides a comprehensive introduction to the fundamental questions inherent in Christian faith Murphy also provides tools for how to answer those questions *Martin Luther: The Problem with Faith and Reason*

David Andersen,2012-09-01 Luther s critics have consistently charged him as an irrationalist and pessimist concerning reason s capabilities and even by his followers as a fideist who sees little or no relationship between faith and reason In this book David Andersen offers a fresh and timely re evaluation of Luther and his understanding of the relationship between faith and reason based upon a thorough engagement with Luther s mature writings Dr Andersen persuasively argues that far from being either an irrationalist or a fideist Luther stands within an empiricist tradition and that his pronouncements on fallen human reason can be understood only from that philosophical perspective Based upon recent research into the writings of William of Ockham who positively influenced Luther in this area Dr Andersen also shows that Luther can no longer be charged as a pessimist concerning human knowledge Reason has an important role to play for Luther in bringing one to faith and the objectivity of Christ s resurrection serves as that focal point that validates all Christian discourse In subordinating itself to the facts of the death and resurrection of Christ for the forgiveness of sins reason s created function is restored to some extent as it receives that forgiveness in the words of Holy Scripture and the visible means of Baptism and the Lord s Supper

The Possibility of Discussion Hugo Strandberg,2016-03-03 Answering the question How is fruitful discussion possible this book addresses the central philosophical issue of how reason shall be understood and how it is limited This study argues that the understanding of discussion according to which it necessarily starts from putative universal norms and rules for argumentation is problematic among other reasons since such rules are unfruitful in contexts where there are vast disagreements such as religion Inspired by Wittgensteinian ideas Strandberg develops instead a new way of understanding discussion truth and rationality which escapes these problems and shows how this solution can be used to answer the accusation against Wittgensteinian philosophy for being conservative and resulting in fideism

Logic and Theism Jordan Howard Sobel,2003-11-10 This is a wide ranging 2004 book about arguments for and against beliefs in God The arguments for the belief are analysed in the first six chapters and include ontological arguments from Anselm to G del the cosmological arguments of Aquinas and Leibniz and arguments from evidence for design and miracles The next two chapters consider arguments against belief The last chapter examines Pascalian arguments for and against belief in God There are discussions of Cantorian problems for omniscience of challenges to divine omnipotence and of the compatibility of everlasting complete knowledge of the world with free will There are appendices that present formal proofs in a system for quantified modal logic a theory of possible worlds notes on Cantorian set theory and remarks concerning non standard hyperreal numbers This book will be a valuable resource for philosophers of religion and theologians and will interest logicians and mathematicians as well

God and Evidence Rob Lovering,2013-06-20 God and Evidence presents a new set of compelling problems for theistic philosophers The problems pertain to three types of theistic philosopher which Lovering defines here as theistic inferentialists theistic non inferentialists and theistic fideists Theistic inferentialists believe that God exists that there is inferential probabilifying evidence of God s existence and that this evidence is discoverable not simply in

principle but in practice Theistic non inferentialists believe that God exists that there is non inferential probabilifying evidence of God s existence and that this evidence is discoverable not simply in principle but in practice Theistic fideists believe that God exists that there is no discoverable probabilifying evidence inferential or non inferential of God s existence and that it is nevertheless acceptable morally if not otherwise to have faith that God exists Lovering argues that each type of theistic philosopher faces a problem unique to his type and that they all share two particular problems Some of these problems take us down an entirely new discursive path others down a new discursive path branching off from an old one
