

The background of the cover is a classical-style landscape painting. It depicts a lush, mountainous tropical valley. A large, vibrant rainbow arches across the upper left portion of the sky. In the foreground, a steep, rocky cliffside is covered in dense green foliage, including several tall palm trees. A small, bright waterfall cascades down a rocky ledge on the left side of the image. In the distance, more mountains and a body of water are visible under a dramatic, cloudy sky. The overall mood is majestic and serene.

communalism against various criticisms and argues that when properly understood and harnessed it could provide the necessary foundation for Africa's development

Contemporary Philosophical Proposals for the University Aaron Stoller, Eli Kramer, 2018-02-12 This edited collection brings together a robust range of philosophers who offer theoretically and critically informed proposals regarding the aims, policies and structures of the university. The collection fills a major gap in the landscape of higher education theory and practice while concurrently reviving a long and often forgotten discourse within the discipline of philosophy. It includes philosophers from across the globe representing disparate philosophical schools as well as various career stages, statuses and standpoints within the university. There is also a diversity in method, approach and style which varies from personal narratives and case studies to philosophical genealogies to traditional philosophical essays and to systematic theories. The collection can serve as a theoretical resource for critically minded administrators and faculty who wish to analyze and change policies and structures at their home institutions. It will introduce them to a wide range of possible educational imaginaries as well as provide them with productive suggestions for pragmatic change on campuses.

The Philosophy of Philip Rieff William G. Batchelder IV, Michael P. Harding, 2025-01-23 Arguing that Philip Rieff was a Freudian who departed in vital and fascinating ways from Freud and a committed modern who nevertheless viewed modernity as a disaster, this book makes clear his thought transcends contemporary left-right culture-war dichotomies. Alasdair MacIntyre described Rieff's early work as a permanently valuable contribution to the human sciences. The essays in this volume engage with Rieff's teaching both early and late across a number of different axes and from a number of disciplinary perspectives, placing him into dialogue with thinkers such as Plato, Nietzsche, Freud, Weber, Heidegger, Strauss, Pieper, Wilde and more. The *Philosophy of Philip Rieff* conveys the utility of Rieff's theory for thinking through various contemporary issues from religion, culture and race to the role of elites in a democratic society. Philip Rieff's thought offers a key to unlocking the cultural trajectories of late modernity and this interdisciplinary volume engages that work in its depth and complexity while suggesting Rieff's place in the wider philosophic tradition.

Cassirer Samantha Matherne, 2021-04-25 Ernst Cassirer 1874-1945 occupies a unique place in 20th-century philosophy. His view that human beings are not rational but symbolic animals and his famous dispute with Martin Heidegger at Davos in 1929 are compelling alternatives to the deadlock between analytic and continental approaches to philosophy. An astonishing polymath, Cassirer's work pays equal attention to mathematics and natural science but also art, language, myth, religion, technology and history. However, until now the importance of his work has largely been overlooked. In this outstanding introduction, Samantha Matherne examines and assesses the full span of Cassirer's work. Beginning with an overview of his life and works, she covers the following important topics: Cassirer's neo-Kantian background; Philosophy of mathematics and natural science including Cassirer's first systematic work *Substance and Function* and subsequent works like Einstein's *Theory of Relativity*. The

problem of culture and the ground breaking *The Philosophy of Symbolic Forms* Cassirer's ethical and political thought and his diagnosis of fascism in *The Myth of the State* Cassirer's influence and legacy Including chapter summaries suggestions for further reading and a glossary of terms this is an ideal introduction to Cassirer's thought for anyone coming to his work for the first time It is essential reading for students in philosophy as well as related disciplines such as intellectual history art history politics and literature *Hermann Cohen's Critical Idealism* Reinier W. Munk, 2006-07-19 Hermann Cohen 1842

1918 is an original systematic thinker and representative of the Marburg School of Critical Idealism The Marburg School was a leading school in German academic philosophy and in German Jewish philosophy for a period of over thirty years preceding the First World War Initially standing at the front of the Return to Kant movement Cohen subsequently went beyond Kant in developing a system of critical idealism in which he offered a critique of and alternative to absolute idealism positivism and materialism A critical idealist in heart and soul Cohen is also recognized as a man who embodied German Jewish culture Publications on Cohen in the English language are small in number and this volume aims to fill the gap It offers an analysis of Cohen's System of Philosophy the three volume classic on logic ethics and aesthetics and his writings on Judaism and religion The book highlights Cohen's contributions in these fields including his discussions with Maimonides Leibniz Kant and Hegel It demonstrates the congeniality of Cohen's critical idealism as expounded in the System and his writings on Judaism and offers an overview of contemporary Cohen research **Philosophy, Science, Education and Culture** Robert Nola, Gürol

Irzik, 2006-02-22 Currents such as epistemological and social constructivism postmodernism and certain forms of multiculturalism that had become fashionable within science education circles in the last decades lost sight of critical inquiry as the core aim of education In this book we develop an account of education that places critical inquiry at the core of education in general and science education in particular Since science constitutes the paradigm example of critical inquiry we explain the nature of science paying particular attention to scientific methodology and scientific modeling and at the same time showing their relevance in the science classroom We defend a universalist rationalist and objectivist account of science against epistemological and social constructivist views postmodernist approaches and epistemic multiculturalist accounts

Logos and Life: The Three Movements of the Soul Anna-Teresa Tymieniecka, 1988-10-31 PART I THE CRITIQUE OF REASON CONTINUED FROM LOGOS TO ANTI LOGOS 1 THE NEW CRITIQUE OF REASON A new critique of reason is the crucial task imposed on the philosophy of our times as we emerge more and more from so called modernism into a historical phase which will have to take its own paths and find its own determination It may be considered that the main developmental line of modern times in its philosophy as well as in its culture at large was traced by the Cartesian cogito The unfolding of Occidental philosophy has culminated in reason or intellect's being awarded the central place This is its specific trait We can see a direct line of progression from the cogito to Kant's Critique It is no wonder that this work is the landmark of modern philosophy Kant's Critique was concerned with the foundation of the sciences Edmund Husserl launched a second major

renewed critique of reason one which addresses not only the critical situation of the sciences but extends the critique even to the situation of Occidental culture as its malaise is diagnosed by this great thinker Edmund Husserl voiced in fact the conviction that Occidental humanity has reached in our age the peak of its unfolding His identifying this peak with the formulation of phenomenological philosophy strikes at the point in which the significant and novel developments of Occidental culture and philosophy phenomenology that coincide *The Philosophy of Ortega y Gasset Reevaluated* Carlos Morujão, Samuel Dimas, Susana Relvas, 2021-09-07 The present text surveys and reevaluates the meaning and scope of Ortega y Gasset's philosophy The chapters reveal the most important aspects of his history such as the Neokantian training he went through in Germany as well as his discovery of Husserl's phenomenology around 1912 The work also covers his original contributions to philosophy namely vital and historical reason and the cultural and educational mission he proposed to achieve The Spanish and to a certain extent the European circumstance was the milieu from which his work emerged but this does not limit Ortega's scope Rather he believed that universal truths can only emerge from the particulars in which they are embedded The publication in 2010 of a critical edition of his Complete Works opened worldwide access for many unpublished manuscripts and some of his lectures There is renewed interest among students and researchers in Ortega and this book uniquely delivers scholarship on his content in English

Sociological Reasoning Rob Stones, 1996-07-03 While sociological modernists were outrageously presumptuous in their claims for sociological knowledge postmodernists have gone to another extreme in claiming that it has no more truth status than fiction Critical of both positions Sociological Reasoning develops an original typology of approaches to social scientific theory and research which is distinguished by its openness and reflexive awareness of rhetorical and methodological aspects of knowledge claims Laced with graphic illustrative examples this is a strikingly well written text that will appeal to students at undergraduate level and beyond Nietzsche's Philosophy of Life Affirmation Michael J. McNeal, 2024-12-23 This anthology broadly examines the interrelated roles of art science and experimentation in Nietzsche's philosophical project It is divided into two parts the first organized around the theme of experimentally reconceiving our world the second investigating the aforementioned subjects in Nietzsche's free spirit or middle period works Together the essays comprising the book underscore Nietzsche's concern that experimentation with values ultimately provide humankind with a new wherefore or purpose Wide ranging in its scope this volume brings together a diverse group of scholars working in both the analytic and continental traditions to provide original insights into Nietzsche's thought A unique contribution to the scholarship it deepens understanding of the relationship between Nietzsche's critiques of art and science the role this relationship plays in his futuristic thought and the experimental life affirming practices that his free spirit project may enable toward the transfiguration of humankind A History of Western Philosophy Ralph M. Moral Philosophy and Moral Education Thora Ilin Bayer, 2017-06-09 Moral Philosophy and Moral Education considers the interconnections of ethics education and the

philosophy of culture as related to the human concern with self knowledge The individual self finds its inner life writ large in the forms of culture such as religion art and history Such forms of cultural life represent and embody normative ideals that can provide the necessary content to shape the character and the conduct of civic life Thora Ilin Bayer draws upon the ancient Greek view of education as paideia and the conception of Bildung of the German idealist philosophers These two ideas of education aim at the development of the whole person as distinct from training in a particular skill subject matter technique or occupation The education of the whole person aims at the production in the individual of a broad mental outlook harmoniously joined with a knowledge of the great perspectives and principles of human culture as it takes its various shapes within the history of humanity Moral philosophy requires both culture and the individual as its terms of inquiry and moral education requires a vision of how to have these two terms interact to form a whole *Africa Tomorrow*, 2001
