## **Reason Enough:**

**Reason Enough: A Case for the Christian Faith** Clark H. Pinnock, 1997-10-02 A book written for those who do not believe the truth of Christianity and for those who are experiencing difficulties in their believing Pinnock does not call for mere fideism but feels that faith should be tested in light of the knowledge and experience we have at our disposal He claims that there is reason enough to put out trust in Christ

**Reason Enough to Hope** Philip Morrison, Kosta Tsipis, 1998 In this blue sky effort to rethink humanity's basic challenges Philip Morrison and Kosta Tsipis both eminent scientists with deep expertise in arms control issues sketch the broad outlines for a global approach to the problems of security and development

**Metametaphysics** David Chalmers, David Manley, Ryan Wasserman, 2009-02-19 Metaphysics asks questions about existence for example do numbers really exist Metametaphysics asks questions about metaphysics for example do its questions have determinate answers If so are these answers deep and important or are they merely a matter of how we use words What is the proper methodology for their resolution These questions have received a heightened degree of attention lately with new varieties of ontological deflationism and pluralism challenging the kind of realism that has become orthodoxy in contemporary analytic metaphysics This volume concerns the status and ambitions of metaphysics as a discipline It brings together many of the central figures in the debate with their most recent work on the semantics epistemology and methodology of metaphysics

**Objects** Daniel Z. Korman, 2015 One of the central questions of material object metaphysics is which highly visible objects there are right before our eyes Daniel Z Korman defends a conservative view according to which our ordinary natural judgments about which objects there are are more or less correct He begins with an overview of the arguments that have led people away from the conservative view into revisionary views according to which there are far more objects than we ordinarily take there to be permissivism or far fewer eliminativism Korman criticizes a variety of compatibilist strategies according to which these revisionary views are actually compatible with our ordinary beliefs and responds to debunking arguments according to which these beliefs are the products of arbitrary biological and cultural influences He goes on to respond to objections that the conservative's verdicts about which objects that are and aren't are objectionably arbitrary and to the argument from vagueness which purports to show that the sort of restriction that conservatives want to impose on which composites there are is bound to give rise to vagueness about what exists something that is ruled out by widely accepted theories of vagueness Finally Korman responds to the overdetermination argument the argument from material constitution and the problem of the many all of which are meant to motivate eliminativism by showing that accepting ordinary objects commits one to one or another absurdity

**Rethinking the 21st Century** Doctor Amy Eckert, Laura Sjöberg, 2013-07-04 Rethinking the 21st Century brings much needed context and perspective to the security problems we face today In recent years the Bush Doctrine that the security threats we now face are entirely unprecedented has echoed around the world Global security and stability is now challenged not only by states

and nuclear war but by insurgency disease environmental degradation and military privatisation Yet this creates a deep sense of disconnect in the way we perceive politics and can be dangerously stark and ahistorical The chapters here show that far from being a clean break the new problems faced today might actually have old solutions What can Locke tell us about terrorists What does Bentham have to say about sanctions What are the ethics of outsourcing war to private companies By looking back to decades and even centuries of ethical analysis and political theory this book provides fascinating insight into all these questions     Unpacking Normativity Kenneth Einar Himma,Miodrag Jovanovic,Bojan Spaic,2018-11-01 This book provides a new and wide ranging study of law s normativity examining conceptual descriptive and empirical dimensions of this perennial philosophical issue It also contains essays concerned with among other issues the relationship between semantic and legal normativity methodological concerns pertaining to understanding normativity normativity and legal interpretation and normativity as it pertains to transnational law The contributors come not only from the usual Anglo American and Western European community of legal theorists but also from Latin American and Eastern European communities representing a diversity of perspectives and points of view including essays from both analytic and continental methodologies With this range of topics the book will appeal to scholars in transnational law legal sociology normative legal philosophy concerned with problems of state legitimacy and practical rationality as well as those working in general jurisprudence It comprises a highly important contribution to the study of law s normativity     **The Beckoning Fair One** Oliver Onions,2004-08-01 Miles ahead of the average ghost story Sunday Times A novelist retreats to an abandoned house in the heart of London where he becomes enthralled by an 18th century spirit and where his contact with the outside world gradually diminishes Acclaimed by such masters as Lovecraft as one of the best ghost stories in the English language     Raymond's Heroine Isabella Harwood,1867     Several Discourses Preached at the Temple Church Thomas Sherlock (bp. of London.),1772     **Several Discourses preached at the Temple Church, etc** Thomas Sherlock,1758     **Information Guidance Series** United States. Office of Information for the Armed Forces,1978     The Methodology of Legal Theory Michael Giudice,Wil Waluchow,2017-07-05 The last decade has witnessed a particularly intensive debate over methodological issues in legal theory The publication of Julie Dickson s *Evaluation and Legal Theory* 2001 was significant as were collective returns to H L A Hart s *Postscript to The Concept of Law* While influential articles have been written in disparate journals no single collection of the most important papers exists This volume the first in a three volume series aims not only to fill that gap but also propose a systematic agenda for future work The editors have selected articles written by leading legal theorists including among others Leslie Green Brian Leiter Joseph Raz Ronald Dworkin and William Twining and organized under four broad categories 1 problems and purposes of legal theory 2 the role of epistemology and semantics in theorising about the nature of law 3 the relation between morality and legal theory and 4 the scope of phenomena a general jurisprudence ought to address     *Ductor dubitantium, part 1, books I and II* Jeremy Taylor,Reginald Heber,1851     *Say and Seal* Susan
