

Locke on Reasoning

- In demonstrative reasoning, each link in the inferential chain is “intuitively” certain.
 - “reasoning concerning relations of ideas” [Hume]
- In probable reasoning, some links in the inferential chain are merely probable.
 - “moral reasoning”, “reasoning concerning matter of fact” [Hume]: “factual inference” for short
- For Locke, both types of reasoning involve rational *perception* of the links (IV xvii 2).

Reasoning In Evaluation Inferential Links And Leaps:

Reasoning in Evaluation Deborah M. Fournier, 1995 Evaluators are in the business of reasoning their way toward legitimate conclusions that clients and other stakeholder groups can use In everyday practice evaluators collect and combine evidence to draw conclusions about something or someone Reasoning is the basis for what evaluators do and what they tell their clients to do But is the reasoning sound Evaluative conclusions are often sources of controversy and the inferences drawn from evidence always have potential loopholes for error In what ways can the conclusions resulting from evaluations be trusted How can evaluators reliably combine evidence from multiple sources into a final judgment about the merit or worth of something How and in what ways can evaluative conclusions be justified in an objective way similar to empirical conclusions Obtaining answers to these perennial questions facing evaluators in every evaluation is the field's greatest unmet challenge To stimulate debate and encourage more scholarship in this area the authors in this volume of *New Directions for Evaluation* grapple with some of the thorny problems of how to better understand the reasoning process that is used to establish evaluative conclusions The reader will leave this discussion thinking more clearly and critically about logical practice appreciating the central role of reasoning in the successful practice of evaluation and pondering the various avenues by which to contribute to future developments BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *The Program Evaluation Standards* Donald B. management decision making the book is useful for students in tourism and management and for tourism executives It has 27 chapters and a subject index Speaking Justice to Power Kim Forss,2017-09-08 Efficiency economy and equity are policy goals pursued by governments around the world but analysts and evaluators have devoted more effort to measuring and evaluating the first two In *Speaking Justice to Power* contributors examine the concept of equity the role it plays and its application in policy evaluation Here some of the most valuable thinkers in the area of policy studies address key questions How should evaluators develop criteria for measuring equity as they analyze both program and policy implementation as well as their impacts What distinctions among people should be taken into account when measuring and valuing impacts What sorts of data should be used to analyze processes and impacts in different settings How might such data be validated The contributors employ grounded theory thinking as they translate key ethical principles into their work and draw important lessons from their experiences The work discusses equity in interventions addressing a variety of social and environmental problems This volume continues the fine tradition of Transaction's Comparative Policy Evaluation series *Doing Qualitative Research in Social Work* Ian Shaw,Sally Holland,2014-04-15 Bringing key developments and debates together in a single volume this book provides an authoritative guide for students and practitioners embarking on qualitative research in social work and related fields Frequently illustrated with contemporary and classic case examples from the authors own empirical research and from international published work and with self directed learning tasks the book provides insight into the difficulties and complexities of carrying out research as well as sharing success stories from the field Shaw and Holland have long experience of writing for practitioners and students and in making complex concepts accessible and readable making this an ideal text for those engaging in qualitative social work research at any level Ian Shaw is a Professor of Social Work at the University of York and at the University of Aalborg Sally Holland is a Reader in Social Work at the School of Social Sciences in Cardiff University Dictionary Of Modern American Philosophers John R. Shook,2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought **Social Work Theories and Methods** Mel Gray,Stephen Webb,2012-12-14 The second edition of this

celebrated book by two of the world's leading researchers in social work introduces readers to the main theories, theorists and perspectives that contribute to the debate on social work theory and social work methods. It brings together some outstanding international researchers in social work to challenge the reader to critically question how they think about social work. The new edition includes a focus on the psychosocial perspective with three new chapters on Cognitive behavioural approaches, Attachment theory and psychoanalytic social work. Ecological approaches. Each chapter allows the reader to relate the theories and methods discussed to their own personal experiences. This reader-friendly book includes student questions, glossaries and recommended reading so that students and practitioners can reappraise and expand the knowledge they have learned. This book will be valuable for undergraduate and postgraduate students taking courses in social work theory and research methods, social work interventions and perspectives as well as post-qualifying students and researchers in social work.

Research and the Social Work Picture Shaw, Ian, 2019-09-11. There's a growing pressure for social workers to engage with research and draw on this in practice. But why is this research important? This first book in the Research in Social Work series published in association with the European Social Work Research Association provides an accessible way to think about this question. Drawing on evidence from across Europe, Asia and the USA, it covers how research is conducted, used and perceived. It is perfect for social work students, researchers and practitioners, providing a detailed sketch of how research finds a place in the wider social work picture and offering opportunities and exercises that highlight how social work research is relevant in day-to-day course programmes and practice. The book will embolden a kind of scepticism while at the same time providing the ground work for social workers to become more thoughtfully practical and practically thoughtful.

Perspectives for Biodiversity and Ecosystems Carsten Hobohm, 2021-02-05. The novelty of the book is a strong focus on perception, perspectives and prediction by scientists with profound insight into the ecology of ecosystems or into human demands and activity. The challenge is to bridge from empirical data and the knowledge of the past to the possibilities of the performance in the future. We assume that there is scope for more cooperation between the fields of ecology and practical philosophy or other social sciences in organising ecosystems and shaping the cultural future of humankind and that such collaboration should be accorded considerably more priority. This book deals with environmental processes seen within a framework of the nature of ecosystems and human cultures. The future of the environment, the development of ecosystems and effective nature conservation management are the essentials of this book. Human nature and culture and in particular their interactions are interpreted as a set of rules and as given. The aim is not only to assess the significance of human influence on species composition and biodiversity but also to weigh up the subsequent potentials for action. In this book we will analyze the problems independently of one another even if they are interconnected. This book focuses on perspectives and prognoses for the impacts of anthropogenic activity on ecosystems and thus on species conservation. Its goal is to improve assessments of the impacts of human activity on the environment. We are aware that

prognoses have very often proven to be false It is difficult to impossible to be able to predict with precision how evolution and ecosystems will change in future under anthropogenic influence This strengthens our resolve to attempt to retain the highest possible degree of scientific integrity and professionalism and not to shy away from expressing the uncertainty of our own ideas and prognoses We venture prognoses in this book and we will fail However we hope that we will be wrong on the right side

Clinical Data-Mining Irwin Epstein,2010 Clinical Data Mining CDM involves the conceptualization extraction analysis and interpretation of available clinical data for practice knowledge building clinical decision making and practitioner reflection Depending upon the type of data mined CDM can be qualitative or quantitative it is generally retrospective but may be meaningfully combined with original data collection Any research method that relies on the contents of case records or information systems data inevitably has limitations but with proper safeguards these can be minimized Among CDM s strengths however are that it is unobtrusive inexpensive presents little risk to research subjects and is ethically compatible with practitioner value commitments When conducted by practitioners CDM yields conceptual as well as data driven insight into their own practice and program generated questions This pocket guide from a seasoned practice based researcher covers all the basics of conducting practitioner initiated CDM studies or CDM doctoral dissertations drawing extensively on published CDM studies and completed CDM dissertations from multiple social work settings in the United States Australia Israel Hong Kong and the United Kingdom In addition it describes consulting principles for researchers interested in forging collaborative university agency CDM partnerships making it a practical tool for novice practitioner researchers and veteran academic researchers alike As such this book is an exceptional guide both for professionals conducting practice based research as well as for social work faculty seeking an evidence informed approach to practice research integration
