Reasoning Inductive Deductive And Fallacious:

Fallacies in Reasoning M. Ashraf Adeel, 2021-11-10 This book is a very brief introduction to informal fallacies that can occur in our reasoning both in ordinary life and in scholarly work It is important for us as thinking beings to be alerted to these pitfalls of reasoning While there is no dearth of introductory texts that discuss fallacies separate and simple treatments of fallacies are few and far between This little booklet has been written with a view to making a very simple and stand alone presentation of important informal fallacies The idea is to provide beginning readers with an easily accessible introduction which they can read completely in one or two sittings without having to purchase or find a whole book of Logic or Critical Thinking The hope is that the readers of these pages will end up trying to avoid these fallacies more assiduously in their life and work

A Class Room Logic, Deductive and Inductive George Hastings McNair, 1914 *The Art of Logical Thinking* William Walker Atkinson, 1909 William Walker Atkinson an attorney by trade explains different kinds of logic and reasoning deductive inductive and hypothetical The author begins by describing how the mind forms ideas and concepts and then subjects these to the mental processes of higher reasoning The memory stores a repository of terms which are different from concepts in that they apply exclusively to the name of things Through reasoning the mind can arrive at a judgment of a given thing or idea and through simple distinction can reject what is false for instance the notion that a horse

is a cow Moving on from these simple examples Atkinson describes how complex judgments and analyses are formed by the mind Piecing together an accurate chain of events forms a kind of inductive reasoning for example if several people enters a store empty handed and later emerge with bags of fruit and vegetables is it sensible to infer that it is a grocery store Deriving conclusions from facts and events is forming a hypothesis with the use of information assertions can be made to arrive at a sensible conclusion without personally entering said store based on known facts it is credible to hypothesize that it sells groceries
