**Responsibility for Rationality** Sebastian Schmidt,2024-11-25 This book develops the foundations of an ethics of mind by investigating the responsibility that is presupposed by the requirements of rationality that govern our attitudes It thereby connects the most recent research on responsibility and rationality in a unifying dialectic How can we be responsible for our attitudes if we cannot normally choose what we believe desire feel and intend This problem has received much attention during the last decades both in epistemology and ethics Yet its connections to discussions about reasons and rationality have been largely overlooked The book has five main goals First it reinterprets the problem of responsibility for attitudes as a problem about the normativity of rationality Second it connects substantive and structural rationality by drawing on debates about responsibility Third it supports recent accounts of the normativity of rationality by explicitly defending the view that epistemic reasons and other right kind reasons are genuine normative reasons and it does so by drawing on recent discussions about epistemic blame Fourth it breaks the stalemate between rationalist and voluntarist accounts of mental responsibility by proposing a hybrid view Finally it argues that being irrational can warrant moral blame thus revealing an unnoticed normative force of rational requirements Responsibility for Rationality is an original and essential resource for scholars and advanced students interested in connecting strands of normative theory within epistemology metaethics and moral psychology The Open Access version of this book was published with the support of the Swiss National Science Foundation

Vale,2018-11-20 America is in the midst of a rental housing affordability crisis More than a quarter of those that rent their homes spend more than half of their income for housing even as city leaders across the United States have been busily dismantling the nation s urban public housing projects In *After the Projects* Lawrence Vale investigates the deeply rooted spatial politics of public housing development and redevelopment at a time when lower income Americans face a desperate struggle to find affordable rental housing in many cities Drawing on more than 200 interviews with public housing residents real estate developers and community leaders Vale analyzes the different ways in which four major American cities implemented the federal government s HOPE VI program for public housing transformation while also providing a national picture of this program Some cities attempted to minimize the presence of the poorest residents in their new mixed income

communities but other cities tried to serve as many low income households as possible Through examining the social political and economic forces that underlie housing displacement Vale develops the novel concept of governance constellations He shows how the stars align differently in each city depending on community pressures that have evolved in response to each city s past struggles with urban renewal This allows disparate key players to gain prominence when implementing HOPE VI redevelopment A much needed comparative approach to the existing research on public housing After the Projects shines a light on the broad variety of attitudes towards public housing redevelopment in American cities and identifies ways to achieve more equitable processes and outcomes for low income Americans **The Range of Reasons** Daniel Whiting,2022
