Rebel Sutra:

Rebel Sutra Shariann Lewitt, 2001-07-15 The colony world of Maya is run by the Changed a carefully inbred aristocracy clustered in their hillside city high above Babelion and its wretched swarms of poor colonists For generations now the Changed have been altering their own genes and their children s They re smarter faster longer lived better with computers and acutely aware of their own superiority What they don t admit is that they have become a separate species Every year the Changed generously allow a handpicked group of human children to come up from Babelion and be tested alongside their own young But the Changed know as the humans do not that it s a sham The humans will always fail They don t have the right genetic makeup the years of intensive training it takes to mesh properly with the computer system where the test takes place Their best will never be enough It s a subtle way of teaching them their place Then one year Arsen shows up strong smart wildly charismatic and not at all convinced of the superiority of the Changed Still he s nothing the system couldn t cope with until he hooks up with Della Changed born and bred but every bit as rebellious as Arsen She too doubts that the serenely self absorbed Changed have all the answers She even has ties to the Tinkers the mysterious vagon bond scientists who make Maya one of their stopping points What starts between Arsen and Della will tip their whole on its side and start it rolling downhill

The Goddess and the Dragon Patrick Hein,2014-10-02 Neoliberal globalization affects the livelihoods and socio economic conditions of people all over the world This is also true for Japan where increased foreign trade and foreign investments have dramatically changed the internal landscape of the country during recent decades There are many social groups for whom globalization has brought positive changes International Japanese companies and their employees for example have benefited from the commercial expansion and rise in trade exchanges How then does globalization influence the subjective experiences and worldviews of ordinary Japanese at the periphery How are local residents outside the centers of affluence affected by the global forces of mass consumerism and cultural diversity The local fisheries community of Katase Enoshima is very close to the megacities of Tokyo and Yokohama and is visited by almost ten million visitors a year This field research study examines how local residents have coped with the risks and opportunities of modern mass tourism both historically and in modern times This book contributes to a better understanding of the dynamics of social transformation processes The findings suggest that mass tourism is a double edged sword on one side residents try
