East Wind Tom Buchanan,2012-04-19 East Wind offers the first complete archive based account of the relationship between China and the British Left from the rise of modern Chinese nationalism to the death of Mao Tse tung Beginning with the Hands Off China movement of the mid 1920s Tom Buchanan charts the mobilisation of British opinion in defence of China against Japanese aggression 1931 1945 and the role of the British left in relations with the People s Republic of China after 1949 He shows how this relationship was placed under stress by the growing unpredictability of Communist China above all by the Sino Soviet dispute and the Cultural Revolution which meant that by the 1960s China was actively supported only by a dwindling group of enthusiasts The impact of the suppression of the student protests in Tiananmen Square June 1989 is addressed as an epilogue East Wind argues that the significance of the left s relationship with China has been unjustly overlooked There were many occasions such as the mid 1920s the late 1930s and the early 1950s when China demanded the full attention of the British left It also argues that there is nothing new in the current fascination with China s emergence as an economic power Throughout these decades the British left was aware of the immense unrealised potential of the Chinese economy and of how China s economic growth could transform the world In addition to analysing the role of the political parties and pressure groups of the left Buchanan sheds new light on the activities of many well known figures in support of China including intellectuals such as Bertrand Russell R H Tawney and Joseph Needham Many other interesting stories emerge concerning less well known figures which show the complexity of personal links between Britain and China during the twentieth century

Malaysia's Defeat of Armed Communism Ong Weichong,2014-10-03 The Malayan Communist Party s MCP decisive defeat in 1960 led many academics and Counterinsurgency COIN experts to overlook the resurrection of its armed struggle in 1968 Most scholars continue to regard the so called Second Emergency in Malaysia 1968 1989 as a non event and most of the recently published work on the MCP tends to focus on the earlier Malayan Emergency 1948 1960 This book looks at the Second Emergency through recently released archival material from the National Archives in London the National Australian Archives and the Australian War Memorial as well as interviews with military and diplomatic officers from the UK and Thailand It presents the first serious

strategic and operational study of the Second Emergency and analyses three areas of historical significance the CPM's strategy for armed struggle in the Second Emergency the actual effectiveness of the CPM's subversive propaganda on its target population and most importantly the counterinsurgency COIN response and strategy of the Malaysian state and to a lesser extent the counter subversion strategy of Singapore in the post colonial era Rethinking Sino-Japanese Alienation Barry Buzan, Evelyn Goh, 2020-01-09 Bitterly contested memories of war colonisation and empire among Japan China and Korea have increasingly threatened regional order and security over the past three decades In Sino Japanese relations identity territory and power pull together in a particularly lethal direction generating dangerous tensions in both geopolitical and memory rivalries Buzan and Goh explore a new approach to dealing with this history problem First they construct a more balanced and global view of China and Japan in modern world history Second building on this they sketch out the possibilities for a 21st century great power bargain between them Buzan puts Northeast Asia's history since 1840 into both a world historical and a systematic normative context exposing the parochial nature of the China Japan history debate in relation to what is a bigger shared story about their encounter with modernity and the West within which their modern encounter with each other took place Arguing that regional order will ultimately depend substantially on the relationship between these two East Asian great powers Goh explores the conditions under which China and Japan have been able to reach strategic bargains in the course of their long historical relationship and uses this to sketch out the main modes of agreement that might underpin a new contemporary great power bargain between them in a variety of future scenarios for the region The frameworks adopted here consciously blend historical contextualisation enduring concerns with wealth power and interest and the complex relationship between Northeast Asian states evolving encounters with each other and with global international society **Pluralism and World Order** Feng Zhang, 2023-03-02 This volume explores the implications of pluralism for international order Distinguished contributors from around the world offer insights into the character of a pluralistic world order They focus especially on the manifestations of international pluralism in great power relations multilateralism and regionalism Contributors examine the myriad challenges a pluralistic world order will face in the years ahead yet they eschew alarmist conclusions There is still scope for the great powers to better manage their relations and equally important much space for multilateralism and regionalism to play their increasingly important roles in stabilizing world order Distinctive in bringing the themes of pluralism and world order together in both theoretical exposition and policy discussion this book offers a stimulating reading for scholars and practitioners of world politics **Of The People, By The People** Roger Osborne, 2011-11-17 Democracy is the worst form of government except for all those other forms that have been tried from time to time Churchill had more reason than most to rue the power of democracy having been thrown out of office after leading Britain to victory in 1945 Democracy when viewed from above has always been a fickle master from below it is a powerful but fragile friend Most books on democracy focus on political theory and analysis in a futile attempt to

define democracy *Of The People By The People* takes the opposite approach telling the stories of the different democracies that have come into existence during the past two and half millennia From Athens to Rhaetia Jamestown to Delhi and Putney to Pretoria the book shows how democratic systems are always a reflection of the culture and history of their birthplaces and come about through seizing fleeting opportunities Democracy can only be understood through the fascinating and inspiring stories of the peoples who fought to bring it about *Global International Society* Barry Buzan,Laust

Schouenborg,2018-08-23 A new and systematic view of how global international society GIS came into being and acquired its current structure and dynamics Buzan and Schouenborg integrate states intergovernmental and international non governmental organisations and the diffusion of norms into a single theoretical framework for the study of GIS *The*

California Gold Rush Mark A. Eifler,2016-07-22 In January of 1848 James Marshall discovered gold at Sutter s Mill in the foothills of the Sierra Nevada For a year afterward news of this discovery spread outward from California and started a mass migration to the gold fields Thousands of people from the East Coast aspiring to start new lives in California financed their journey West on the assumption that they would be able to find wealth Some were successful many were not but they all permanently changed the face of the American West In this text Mark Eifler examines the experiences of the miners demonstrates how the gold rush affected the United States and traces the development of California and the American West in the second half of the nineteenth century This migration dramatically shifted transportation systems in the US led to a more powerful federal role in the West and brought about mining regulation that lasted well into the twentieth century Primary sources from the era and web materials help readers comprehend what it was like for these nineteenth century Americans who gambled everything on the pursuit of gold [Re-imagining International Relations](#) Barry Buzan,Amitav

Acharya,2021-12-09 Buzan and Acharya challenge the discipline of International Relations to reimagine itself in the light of the thinking about and practice of international relations and world order from premodern India China and the Islamic world This prequel to their 2019 book *The Making of Global International Relations* takes the story back from the two century tale of modern IR to reveal the deep global history of the discipline It shows the multiple origins and meanings of many concepts thought of as only modern and Western It opens pathways for the rest of the world into this most Eurocentric of disciplines encouraging them to bring their own histories concepts and theories with them The authors have written this book with the hope of inspiring others to extend these pathways by bringing in a wider array of cultures and exploring how they thought about and acted in worlds composed of multiple independent collective actors *Encyclopedia of Chinese History* Michael

Dillon,2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty The number of westerners travelling to China to study for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture society and economy and increasing coverage of contemporary China in the media Our understanding of China s history has also been evolving The study of history in the

People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers, there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the Encyclopedia includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang, and Tibet that have played such an important role in the history of China Proper and will also include material on Taiwan and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the Encyclopedia will be an invaluable resource for students of Chinese history, politics, and culture. *Making Global Society* Barry Buzan, 2023-08-10

Barry Buzan proposes a new approach to making International Relations a truly global discipline that transcends both Eurocentrism and comparative civilisations. He narrates the story of humankind as a whole across three eras using its material conditions and social structures to show how global society has evolved. Deploying the English School's idea of primary institutions and setting their story across three domains: interpolity, transnational, and interhuman, this book conveys a living historical sense of the human story whilst avoiding the overabstraction of many social science grand theories. Buzan sharpens the familiar story of three main eras in human history with the novel idea that these eras are separated by turbulent periods of transition. This device enables a radical retelling of how modernity emerged from the late 18th century. He shows how the concept of global society can build bridges connecting International Relations, Global Historical Sociology, and Global World History. **The Market in Global International Society** Barry Buzan, Robert Falkner, 2024-12-02

The Market in Global International Society tracks the idea and practice of the market through both modern and premodern times and its evolution as a primary institution in international relations over the past two centuries. It develops a new approach to understanding the relationship between the market and other social and political institutions of global international society. Buzan and Falkner view the market as a political ideology in support of a liberal system of governance and not just as an economic practice or economy-wide structural feature. In doing so, they draw attention to the market's powerful impact on international order. This historical grounding brings into close contact two areas of study that have for much too long stood back to back: the English School of International Relations (ES) and International Political Economy (IPE). For the ES, the book fills in the large economic gap in its understanding and portrayal of the primary institutions of international society. Adding in the economic sector has a major impact on how the other primary institutions of international society both work in themselves and interact with each other. For IPE, the book opens up a new and usefully detailed view of the constant and wide-ranging interaction of the market with the other social and political institutions of global international society. The approach through primary institutions fills in the middle ground between the big picture classical approaches to IPE and the current
