## **Rebirth Of Nature The The Greening Of Science And God:**

The Rebirth of Nature Rupert Sheldrake, 1994-04-01 Rupert Sheldrake one of the world's preeminent biologists has revolutionized scientific thinking with his vision of a living developing universe one with its own inherent memory In The Rebirth of Nature Sheldrake urges us to move beyond the centuries old mechanistic view of nature explaining why we can no longer regard the world as inanimate and purposeless Sheldrake shows how recent developments in science itself have brought us to the threshold of a new synthesis in which traditional wisdom intuitive experience and scientific insight can be mutually enriching

**Environmental Literacy in Science and Society** Roland W. Scholz, Claudia R. Binder, 2011-07-21 In an era where humans affect virtually all of the earth's processes questions arise about whether we have sufficient knowledge of human environment interactions How can we sustain the Earth's ecosystems to prevent collapses and what roles should practitioners and scientists play in this process These are the issues central to the concept of environmental literacy This unique book provides a comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development Approaching the topic from multiple perspectives it explores the development of human understanding of the environment and human environment interactions in the fields of biology psychology sociology economics and industrial ecology The discussion emphasises the importance of knowledge integration and transdisciplinary processes as key strategies for understanding complex human environment systems HES In addition the author defines the HES framework as a template for investigating sustainably coupled human environment systems in the 21st century

New Age Religion and Western Culture Wouter J. Hanegraaff, 2018-09-24 Recent years have seen a spectacular rise of the New Age movement and an ever increasing interest in its beliefs and manifestations This fascinating work presents the first ever comprehensive analysis of New Age Religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement Making extensive use of primary sources the author thematically analyses New Age beliefs from the perspective of the study of religions While looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the Renaissance Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century This ground breaking publication is compulsive reading for all those involved or interested in the New Age movement

Science and the Akashic Field Ervin Laszlo, 2007-05-03 Presents the unifying world concept long sought by scientists mystics and sages an Integral Theory of Everything Explains how modern science has rediscovered the Akashic Field of perennial philosophy New edition updates ongoing scientific studies presents new research inspired by the first edition and includes new case studies and a section on animal telepathy Mystics and sages have long maintained that there exists an interconnecting cosmic field at the roots of reality that conserves and conveys information a field known as the Akashic record Recent discoveries in vacuum physics show that this Akashic Field is real

and has its equivalent in science's zero point field that underlies space itself. This field consists of a subtle sea of fluctuating energies from which all things arise: atoms and galaxies, stars and planets, living beings and even consciousness. This zero point Akashic Field is the constant and enduring memory of the universe. It holds the record of all that has happened on Earth and in the cosmos and relates it to all that is yet to happen. In Science and the Akashic Field, philosopher and scientist Ervin Laszlo conveys the essential element of this information field in language that is accessible and clear. From the world of science, he confirms our deepest intuitions of the oneness of creation in the Integral Theory of Everything. We discover that as philosopher William James stated, "We are like islands in the sea, separate on the surface but connected in the deep." And God Said... Ruth Anne Carpenter, 2010-12. Do you dismiss the existence of God because of the popular attitude ridiculing the creation story and the garden of Eden story in the Bible, claiming there is no basis in science for it to be true? Author Ruth Anne Carpenter takes on a new approach to the age-old mystery of creation in *And God Said: A Study of Creation and the Garden of Eden*. She skillfully incorporates the science behind God's creation of the earth: the land, the waters, the vegetation, the animals, the moon, the sun, and finally man and woman, to show readers that science and Christianity can in fact coexist. Carpenter then outlines the remaining individual verses of these prophecies, exploring the meaning and impact of the first marriage between Adam and Eve and their eventual banishment from the garden of Eden after succumbing to the power of Satan and partaking of the forbidden fruit from the tree of the knowledge of good and evil. Ruth Anne Carpenter has written an enlightening study of creation that reconciles scientific studies with spiritual truth. It will encourage you to investigate into your own soul and explore your own faith more fully. Ruth Anne Carpenter lives in Newport News, Virginia, with her husband of thirty-three years. She has embraced her faith and has studied the Bible her whole life. *A User's Guide to Our Present World* Herb Gruning, 2021-04-14. The reader is about to embark on a journey of discovery and perhaps even reckoning. Religion and science have been understood as inherently at odds and inimical toward each other. However, both employ metaphor: religion when it calls the spirit descending upon Jesus a dove; science when it describes electrons as a current flowing through a wire, for only fluids flow and electrons are not a fluid. Both use myths: some religions in the sense that there was a Golden Age of humans in a garden; science when it promises unlimited progress. Both enlist hypothetical entities: some religions when a storm heralds that the gods are angry; science with the existence of a vacuum and a frictionless surface. And each bears its fundamentalist contingent: just observe a debate between creationists and evolutionists and the zeal and fervor with which the Bible and Darwin must be defended at any cost, no matter what. Given all this, it becomes readily apparent that religion and science display more in common than was once expected. And that is precisely what is in peril in the following pages: our expectations. May the intrepid traveler benefit from the voyage. **Seaweeds and their Role in Globally Changing Environments** Alvaro Israel, Rachel Einav, Joseph Seckbach, 2010-06-18. Global warming is accelerating faster than the ability for natural repair, and environmental stresses are damaging ecosystems, all affecting physical and biological

systems on Earth A new Nasa led study shows that human activity has caused climate changes resulting in permafrost thawing acid rain and lower productivity in lakes as well as increased emissions of greenhouse gases including CO<sub>2</sub> N<sub>2</sub>O CH<sub>4</sub> CF<sub>3</sub> and CFC Marine plants play a vital role in maintaining the balance of marine environments while serving as a source of food for humankind and important chemical compounds Microalgae and seaweed have enormous potential for reducing global warming and climate change During photosynthesis algae grow draw CO<sub>2</sub> from the atmosphere release oxygen and produce solar biofuel Experts in the life of marine plant ecosystems in globally changing environments contributed chapters to this book The target readers are phycologists ecologists atmospheric scholars conservationists environmentalists and ecologically aware laymen

**The Gaia Hypothesis** Michael Ruse, 2013-09-25 The book is full of empathetic insightful and often very funny portraits of Margulis Lovelock and a community of other figures associated with Gaia Carla Nappi New Books in Science Technology and Society In 1965 English scientist James Lovelock had a flash of insight the Earth is not just teeming with life the Earth in some sense is life He mulled this revolutionary idea over for several years first with his close friend the novelist William Golding and then in an extensive collaboration with the American scientist Lynn Margulis In the early 1970s he finally went public with the Gaia hypothesis the idea that everything happens for an end the good of planet Earth Lovelock and Margulis were scorned by professional scientists but the general public enthusiastically embraced Lovelock and his hypothesis In *The Gaia Hypothesis* philosopher Michael Ruse with his characteristic clarity and wit uses Gaia and its history its supporters and detractors to illuminate the nature of science itself Gaia emerged in the 1960s a decade when authority was questioned and status and dignity stood for nothing but its story is much older Ruse traces Gaia's connection to Plato and a long history of goal directed and holistic or organicist thinking and explains why Lovelock and Margulis's peers rejected it as pseudoscience But Ruse also shows why the project was a success He argues that Lovelock and Margulis should be commended for giving philosophy firm scientific basis and for provoking important scientific discussion about the world as a whole its homeostasis or in this age of global environmental uncertainty its lack thereof Ruse's treatment is thought provoking and original as you would expect from this perceptive irrepressible philosopher of biology New Scientist

**Following the Water** Kylie Carman-Brown, 2019-10-18 Water reflects culture This book is a detailed analysis of hydrological change in Australia's largest inland waterway in Australia the Gippsland Lakes in Victoria in the first 70 years of white settlement *Following the Water* is our primal need Unlike many histories this book looks at the entire hydrological cycle in one place rather than focusing on one bit Deftly weaving threads from history hydrology and psychology into one *Following the Water* explores not just what settlers did to the waterscape but probes their motivation for doing so By combining unlikely elements together such as swamp drainage water proofing techniques and temperance lobbying the book reveals a web of perceptions about how water should be With this laid clear we can ask how different we are from our colonial forebears

**Embracing the Witch and the Goddess** Kathryn Roundtree, Kathryn Roundtree, 2004 *Embracing the*

Witch and the Goddess is a detailed survey of present day feminist witches in New Zealand. It examines the attraction of witchcraft for its practitioners and explores witches' rituals, views and beliefs about how magic works. The book provides a detailed portrait of an undocumented section of the growing neo-pagan movement and compares the special character of New Zealand witchcraft with its counterparts in the United States, Great Britain and Australia. Kathryn Rountree traces the emergence and history of feminist witchcraft and links witchcraft with the contemporary Goddess movement. She reviews scholarly approaches on the study of witchcraft and deals with the key debates which have engaged the movement's adherents and their critics and ultimately presents what Mary Daly declared was missing from most historical and anthropological research on witchcraft: a Hag-identified vision. Based on fieldwork amongst witch practitioners, *Embracing the Witch and the Goddess* is an important contribution to the emerging profile of present day witchcraft and paganism.

**Other Ways of Knowing** John Broomfield, 1997-06 Our environment and our civilization are in crisis. But the wisdom to chart a new course is available to us from unexpected sources including the sacred traditions of our ancestors. From the Polynesian technique of remote viewing to the formative causation theory of Rupert Sheldrake, *Other Ways of Knowing* examines perceptions and practices that challenge the narrow perspective of the West.

**Whitehead and Continental Philosophy in the Twenty-First Century** Jeremy D. Fackenthal, 2019-04-29 This book examines how the philosophy of Alfred North Whitehead, a speculative philosopher from the first half of the twentieth century, converses and entangles itself with continental philosophers of the twentieth and twenty-first centuries around the question of a sustainable civilization in the present. Chapters are focused around economic and environmental sustainability questions of how technology and systems relate to this sustainability, relationships between human and nonhuman entities, relationships among humans, and how larger philosophical questions lead one to think differently about what the terms sustainable and civilization mean. The book aims to uncover and explore ways in which the combination of these philosophies might provide the dislocations within thought that lead to novel ways of being and acting in the world.

*Laudato Si* Anthony Kelly, 2016-09-20 Pope Francis' *Laudato Si* is a game-changing document for the life of the Church and the ecological health of this planet. A Catholic vision is deficient if it does not include the earth and its life forms. Loving one's neighbour must include loving the planetary neighbourhood in which all live. For its part, the integral ecology on which the Pope insists must include the dimensions of mind and heart, science and art, faith and the whole spiritual life of culture. Here the great theological themes animating the Catholic vision play their part as ever-renewable resources: the Creator and the gift of creation, the incarnation of the Word amongst us, the inexhaustible life of the Trinity itself, the Eucharist as communion with Christ in the here and now of earthly life, just as Sister Death must be given her place for the sake of ecological and eschatological realism. Integral ecology and Catholic vision are two sides of the conversion of mind and heart necessary to promote the communion of life now and in the world to come.

Dogs That Know When Their Owners Are Coming Home Rupert Sheldrake,2011-04-26 With a scientist s mind and an animal lover s compassion world renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals and ourselves How do cats know when it s time to go to the vet even before the cat carrier comes out How do dogs know when their owners are returning home at unexpected times How can horses find their way back to the stable over completely unfamiliar terrain After five years of extensive research involving thousands of people who have pets and work with animals Dr Sheldrake proves conclusively what many pet owners already know there is a strong connection between humans and animals that defies present day scientific understanding Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other to their owners and to their homes in powerful ways His provocative ideas about these social or morphic fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild such as migration and homing *Dogs That Know When Their Owners Are Coming Home* not only provides fascinating insight into animal and human behavior but also teaches us to question the boundaries of conventional scientific thought and shows that the very animals who are closest to us have much to teach us about biology nature and consciousness

**Transpersonal Ecosophy, Vol. 1: Theory, Methods and Clinical Assessments** Mark A. Schroll,2016-01-24 The image on the cover of this book represents the idea that brain state alterations at sacred sites allow us to re experience memories that are woven into the morphogenetic fields of that place an idea that originates with Paul Devereux s empirical

enquiry into dreams at sacred sites in Wales and England This books examines how this investigation provides us with a new way of understanding consciousness and a new direction toward a reconciliation of the divorce between matter and spirit We explore the work of David Lukoff and Stanislav and Christina Grof the connections between the varieties of transformative experience in dream studies ecopsychology transpersonal psychology and the anthropology of consciousness as well as the overlap between David Bohm s interpretation of quantum theory and Rupert Sheldrake s hypothesis of formative causation

**The Resurgence of the Real** Charlene Spretnak,2012-09-10 In this insightful beautifully written work one of America s most important feminist ecological thinkers reflects on the roots of modernity in Renaissance humanism the Reformation the Scientific Revolution and the Enlightenment Spretnak argues that an ecological postmodern ethos is emerging in the 1990s the creative cosmos and the complex sense of place Both a sharp critique and a graceful performance of the art of the possible The Resurgence of the Real changes the way we think about living in the modern world **The Fourth Revolution**

Robert V. Daniels,2013-01-11 The USA has been going through a new kind of revolution which though it did not literally overthrow the government transformed racial gender and other social relationships and bequeathed the deep divisions now felt in the nation s politics and culture *The Philosophical Roots of the Ecological Crisis* Joshtrom Isaac

Kureethadam,2018-06-11 The Philosophical Roots of the Ecological Crisis Descartes and the Modern Worldview traces the conceptual sources of the present environmental degradation within the worldview of Modernity and particularly within the thought of Ren Descartes universally acclaimed as the father of modern philosophy The book demonstrates how the triple foundations of the Modern worldview in terms of an exaggerated anthropocentrism a mechanistic conception of the natural world and the metaphysical dualism between humanity and the rest of the physical world can all be largely traced back to Cartesian thought with direct ecological consequences
