Treating Complex Trauma in Children and Their Families Cheryl B. Lanktree, John N.

Briere, 2016-01-04 One of the few books on the treatment of psychological trauma in children that provides specific in depth individual group and family therapy interventions for complex psychological trauma *Treating Complex Trauma in Children and Their Families: An Integrative Approach* focuses on the treatment of 6-12 year old children and their relevant family members. Renowned authors Cheryl B. Lanktree and John N. Briere use their evidence based yet flexible treatment model *Integrative Treatment of Complex Trauma for Children (ITCT-C)* as they address the use of play therapy, attachment processing, mindfulness and other approaches as well as interventions with family caretaker and community systems. The authors emphasize a culturally sensitive, destigmatizing and empowering perspective that supports both recovery and posttraumatic growth. Clinical examples and specific tools illustrate how assessment is used to guide individualized and developmentally appropriate interventions.

Treating the Traumatized Child Scott Sells, Ellen Souder, 2017-12-15

This book builds upon my early work and the work of others by offering a comprehensive guide to practitioners interested in facing and helping to heal trauma and manage the drama systemically with a special focus on children and adolescents. The FST Model is a contribution to the fields of trauma, family sciences and human development practice. Charles R. Figley, PhD, Kurzweg Chair in Disaster Mental Health at Tulane University in New Orleans. This is the first book that addresses trauma treatment for child and adolescents using a Family Systems Trauma (FST) model which goes beyond individual therapy to include the child and their entire family. Co-written by a renowned family therapist who created the Parenting with Love and Limits model, it delivers a research-based step-by-step approach that incorporates the child's immediate family along with their extended family to treat the traumatized child or adolescent. Using a stress chart, the child or adolescent's trauma symptoms are quickly identified. This strategy guides therapists in accurately diagnosing root causes of the child's trauma and culminates in the creation of co-created wound playbooks to heal trauma in both the child as well as other family members. Additional helpful features include extensive case examples, a menu of trauma techniques, wound playbook examples, evaluation forms, client handouts and other practical tools to provide the therapist with a complete guide to implementing this approach. Child and family therapists, social workers, mental health counselors and psychologists working in a variety of settings will find this book a valuable resource. Key Features: Provides a step-by-step practice focused, time-limited model. Uses a family systems approach for addressing child and adolescent trauma. The only book of its kind. Includes useful tools such as checklists, client handouts and evaluation forms.

Helping Abused and Traumatized Children Eliana Gil, 2011-03-11

Presenting an integrative model for treating traumatized children, this book combines play, art, and other expressive therapies with ideas and strategies drawn from cognitive behavioral and family therapy. Eliana Gil demonstrates how to tailor treatment to the needs of each child by using both directive and nondirective approaches. Throughout, practical clinical examples illustrate ways to target trauma-related symptomatology while also helping children process painful feelings and memories that are difficult to verbalize. The book concludes with four in-depth cases that bring to life the unique situation of each child and family, the decision-making process of the therapist, and the applications of developmentally informed, creative, and flexible interventions.
