Taylor,2023-04-21

In a scholarly career spanning five decades Rhoda Rappaport published perceptive analyses of science in the culture of early Modern Europe France in particular with strong emphasis on geology's early development Of the sixteen papers in this volume most focus on aspects of geology's cultivation during the long 18th century from the times of Hooke Leibniz and Fontenelle to those of Lavoisier Werner and Cuvier Among the topics most closely treated here are the French mineralogical mapping project initiated by Guettard contemporary efforts to interpret the earth historically such as through Noah's Flood and difficulties presented by the vocabulary often used in traditional histories of geology Much of Rappaport's research addressed two problems prevalent within 18th century earth science the proper

understanding of petrifications or fossil objects and struggles to establish reliable knowledge of the earth's past. She also examined the chemistry of G. F. Rouelle which she saw as effectively an attempt at systematic comprehension of the entire mineral realm. Transnational features of scientific pursuits as illustrated in the careers of the naturalist Vallisneri and the mineralogist and philosopher d'Holbach and aspects of science's promotion in France through government patronage and academic privilege.

Socialist Lies Simona Pipko, 2016-04-22 This nonfiction work chronicles the last seven years of catastrophic world events during the Obama administration and points out its secret collaboration with socialism worldwide and Russia in particular. *Socialist Lies* is a quick read that's hard to put down showing the aggressive role Russia plays in its war against Western civilization and how the Democratic Party is destroying its free enterprise legacy and adopting socialism. Meanwhile the Republican establishment is being shaken to its core by member anger at its inaction on critical issues. The author sets the stage with the prologue a firsthand narrative from her unique childhood under socialism in Russia. Then she demonstrates how Marxist theory which opened a Pandora's Box in the nineteenth century marched across the globe to the twentieth century. The author calls Marxism a combination of fraud with a utopian concept which has been used by adventurers, charlatans, and criminals to acquire power. The leader who exemplified all these characteristics was Joseph Stalin. A dogmatic Marxist brought up within the Islamic culture, Stalin invented the marriage of communism and Islam. The reason we have been dragged into war today is the ideology I called Soviet Fascism. Stalin laid out the agenda for a One World Government under the Kremlin auspices. The agenda of WWII against Western civilization.

Education and the Female Superhero Andrew L. Grunzke, 2019-12-17 Considering a variety of female superhero narratives including World War II era Wonder Woman comics, the 1970s television programs *The Secrets of Isis* and *The Bionic Woman* and the more recent *Buffy the Vampire Slayer*, *Education and the Female Superhero* argues that they share a vision of education as the path to female empowerment. In his analysis, Andrew L. Grunzke examines female superheroes who are literally teachers or students exploring examples of female superheroes whose alter egos work as schoolteachers or attend school during the workday and fight evildoers when they are outside the classroom. Taking a broader view of education, Grunzke argues that the superheroine in popular media often sees and articulates her own role as being an educator. In these narratives, female superheroes often take it upon themselves to teach self-defense tactics, prevent victimization, and encourage people, especially female victims, to pursue formal education. Moreover, Grunzke shows how superheroines tend to see their relationship with their adversaries as rehabilitative and educative, trying to set them on the correct path rather than merely subdue or dominate them.
