Class and Stratification Rhonda Levine,2006-04-27 The second edition of this strong collection brings together classical statements on social stratification with current and original scholarship providing a foundation for theoretical debate on the nature of race class and gender inequality Designed for students in courses on social stratification inequality and social theory this new edition includes a revised and updated editor s introduction and conclusion along with five new chapters on race and gender from distinguished scholars in the field Bringing Class Back In Scott G. McNall,2019-03-04 In recent

years a flurry of poststructuralist post Marxist and statecentered approaches have emerged in historical and sociological scholarship Far from ignoring these developments the study of class has shaped and been shaped by them As the selections in this volume indicate class analysis changes and develops while sustaining itself as a powerful refined working tool in helping scholars understand the complexities of social and historical processes This volume provides a cross section of the rich body of social theory and empirical research being produced by scholars employing class analysis It demonstrates the

variety vibrancy and continuing value of class analysis in historical and sociological scholarship The work of promising young scholars is combined with contributions from well established figures to produce a volume that addresses continuing debates over the relationship between structure and agency the centrality of class relations and the dynamics of class formation class culture and class consciousness Democracy Against Capitalism Ellen Meiksins Wood,2016-02-02 Historian and political thinker Ellen Meiksins Wood argues that theories of postmodern fragmentation difference and contingency can barely accommodate the idea of capitalism let alone subject it to critique In this book she sets out to renew the critical programme of historical materialism by redefining its basic concepts and its theory of history in original and imaginative ways using them to identify the specificity of capitalism as a system of social relations and political power She goes on to explore the concept of democracy in both the ancient and modern world examining its relation to capitalism and raising questions about how democracy might go beyond the limits imposed on it *Rethinking the Labor Process* Mark Wardell,Thomas L. Steiger,Peter Meiksins,1999-09-09 This diverse collection rethinks and reinvigorates the field of labor process *Regulating the Social* George Steinmetz,1993-08-09 Why does the welfare state develop so unevenly across countries regions and localities What accounts for the exclusions and disciplinary features of social programs How are elite and popular conceptions of social reality related to welfare policies George Steinmetz approaches these and other issues by exploring the complex origins and development of local and national social policies in nineteenth century Germany Generally regarded as the birthplace of the modern welfare state Germany experimented with a wide variety of social programs before 1914 including the national social insurance legislation of the 1880s the Elberfeld system of poor relief protocorporatist policies and modern forms of social work Imperial Germany offers a particularly useful context in which to compare different programs at various levels of government Looking at changes in welfare policy over the course of the nineteenth century differences between state and municipal interventions and intercity variations in policy Steinmetz develops an account that focuses on the specific constraints on local and national policymakers and the different ways of imagining the social question Whereas certain aspects of the pre 1914 welfare state reinforced social divisions and even foreshadowed aspects of the Nazi regime other dimensions actually helped to relieve sickness poverty and unemployment Steinmetz explores the conditions that led to both the positive and the objectionable features of social policy The explanation draws on statist Marxist and social democratic perspectives and on theories of gender and culture **Capitalist Russia and the West** Jeffrey Surovell,2018-01-18 This title was first published in 2000 highly innovative work which challenges mainstream approaches to the study of Russian policy with its groundbreaking application of Marxism and dependency theories Using class analysis it examines in a meticulously documented study what is perhaps the most important issue in world politics today Russia and the West Unconventional yet powerful it nevertheless comes up with highly persuasive conclusions Whether one agrees with its challenging conclusions or not they cannot be ignored *Transnational Labour History* Marcel van der Linden,2017-07-05

There has been a growing recognition amongst scholars that labour historians need to look beyond national borders in order to place the history of the working classes into a much broader context than has hitherto been the case. Whilst studies focused on individual countries are essential it is only by comparing and contrasting the experiences across time and space that a true understanding of the subject can be attempted. Professor Marcel van der Linden has contributed much to the debate on cross border processes and comparisons. This volume makes available in English a collection of twelve of his most important essays on the theme of transnational labour history. Previously published in a range of journals and volumes with two original contributions, *Transnational Labour History* brings them together in a single convenient collection together with a new introduction. This work will undoubtedly provide an invaluable resource for all students of European labour history.

Class Analysis and Contemporary Australia Janeen Baxter, 1991. Collection of essays which describe and examine the consequences of the Australian class structure. The findings and observations of the authors are based on their 1986 national survey of the Australian workforce.

Class, Networks, and Identity Rhonda F. Levine, 2001-06-13. This book documents a little known aspect of the Jewish experience in America. It is a fascinating account of how a group of Jewish refugees from Nazi Germany came to dominate cattle dealing in south central New York and maintain a Jewish identity even while residing in small towns and villages that are overwhelmingly Christian. The book pays particular attention to the unique role played by women in managing the transition to the United States in helping their husbands accumulate capital and in recreating a German Jewish community. Yet Levine goes further than her analysis of German Jewish refugees. She also argues that it is possible to explain the situations of other immigrant and ethnic groups using the structure network identity framework that arises from this research. According to Levine situating the lives of immigrants and refugees within the larger context of economic and social change but without losing sight of the significance of social networks and everyday life shows how social structure, class, ethnicity and gender interact to account for immigrant adaptation and mobility.

Coca, Cocaine, and the Bolivian Reality Madeline Barbara Leons, Harry Sanabria, 1997-10-16. This volume examines the impact of coca and the cocaine trade on Bolivia, the poorest and most vulnerable of the South American countries. Topics examined include coca growers who have organized to protect their livelihood, coca substitution programs that have provided no viable alternative and the repressive legal and extralegal apparatus which has been mobilized against the growers. Surprising studies show how coca cultivation may be environmentally conservative and how it can underwrite traditional culture. At the same time both politically and economically Bolivian society has been transformed by coca and the cocaine trade and efforts to combat them. These efforts concentrating on supply side interdiction and coca eradication have had negative impacts within Bolivia, have damaged the relationship between Bolivia and the United States and have been ineffective in stemming the flow of cocaine to consuming countries.
