

A close-up photograph of an elderly person's hand and part of their face. The skin is heavily wrinkled and aged, with a warm, golden-brown tone. The hand is positioned in the upper right, with fingers slightly curled. The face is visible on the left, showing a portion of the cheek and jawline. The background is dark and out of focus.

## **Recent Advances In Gerontology:**

Recent Advances in Gerontology Mason Button, 2021-11-16 The diverse aspects of aging such as social psychological biological cognitive and cultural aspects are studied within the discipline of gerontology It draws concepts and researches from a variety of fields like biology medicine nursing political science dentistry physical and occupational therapy psychiatry psychology and sociology Gerontology helps in government planning evaluating the impact of the elderly people on the society and the operation of nursing homes Some of the major sub specialties within this field are biogerontology environmental gerontology social gerontology and jurisprudential gerontology Biogerontology seeks to intervene in the aging process as well as prevent diseases which are related to aging This book unfolds the innovative aspects of gerontology which will be crucial for the progress of this field in the future From theories to research to practical applications case studies related to all contemporary topics of relevance to this field have been included in it This book will serve as a valuable source of reference for graduate and post graduate students

**Recent Advances in Geriatrics** Mario Barbagallo, Giuseppe Licata, James R. Sowers, 2013-06-29 This book Recent Advances in Geriatrics is based on the proceedings of the 8th Course of the School of Gerontology and Geriatrics held in Erice Trapani Italy at the International Centre for Scientific Culture Ettore Majorana on March 20-25 1997 This international effort was organized jointly by professors from the University of Palermo Italy and from Wayne State University Michigan USA as a result of a cross cultural collaboration of several years \_ The increasing average age of the populations in industrialized countries has resulted in increased interest in the different biological medical psychological and economic aspects related to the health and social care of the elderly Physicians and health care practitioners are realizing the need for a revised approach to geriatric care Comprising contributions of clinicians and scientists from Italy and North America the present volume provides a multidisciplinary approach to many gerontological and geriatric problems examined from a scientific and a practical point of view Several of the most important aspects of the aging process the genetics of aging body composition modification immunological endocrinological and renal physiology changes have been addressed Data from a multi center Italian study on centenarians is reported together with an update on clinical and pharmacological approaches to dementia syndromes and economic and social aspects related to the care of the elderly

**Advances in Gerontology Research** Riley Carter, 2021-11-16 The study of social cultural psychological cognitive and biological aspects of aging is known as gerontology It traces the progressive changes that take place in a cell a tissue an organ system and a total organism with the passage of time Geriatrics is a subset of gerontology that is concerned with the prevention and treatment of diseases in older people Gerontology has various sub fields such as biogerontology social gerontology environmental gerontology and jurisprudential gerontology Biogerontology deals with the biological aging process its potential means and evolutionary origins Social gerontology is concerned with working with older adults Environmental gerontology falls under gerontology that seeks to improve the relationship between aging persons and their

physical and social environments Jurisprudential gerontology deals with the interaction of legal laws with the aging experience The book aims to shed light on some of the unexplored aspects of gerontology and the recent researches in this field It strives to provide a fair idea about this discipline and to help develop a better understanding of the latest advances within this field Those in search of information to further their knowledge will be greatly assisted by this book      **Recent Advances in Geriatrics** Mario Barbagallo, Giuseppe Licata, James R. Sowers, 2013-06-11 This book Recent Advances in Geriatrics is based on the proceedings of the 8th Course of the School of Gerontology and Geriatrics held in Erice Trapani Italy at the International Centre for Scientific Culture Ettore Majorana on March 20-25 1997 This international effort was organized jointly by professors from the University of Palermo Italy and from Wayne State University Michigan USA as a result of a cross cultural collaboration of several years \_ The increasing average age of the populations in industrialized countries has resulted in increased interest in the different biological medical psychological and economic aspects related to the health and social care of the elderly Physicians and health care practitioners are realizing the need for a revised approach to geriatric care Comprising contributions of clinicians and scientists from Italy and North America the present volume provides a multidisciplinary approach to many gerontological and geriatric problems examined from a scientific and a practical point of view Several of the most important aspects of the aging process the genetics of aging body composition modification immunological endocrinological and renal physiology changes have been addressed Data from a multi-center Italian study on centenarians is reported together with an update on clinical and pharmacological approaches to dementia syndromes and economic and social aspects related to the care of the elderly      **Recent Advances in gerontology** Hajime Orimo, 1978      Recent Advances in Psychology and Aging P. Costa, I.C. Siegler, 2003-12-10 Recent Events in the Psychology of Aging documents the successful integration of aging into the mainstream of psychology Leading psychologists present overviews of the key issues and research findings on mainstream topics These include cognitive neuroscience visual attention learning memory and cognition as well as personality and happiness The intersection of aging content with mainstream psychology is also prominent in the areas of emotions personality and social psychology as seen in the chapters on subjective well-being emotional development self-esteem and personality trajectories The seven chapters of this book offer information on such topics as the seven sins of memory categorizing the common breakdowns of memory in everyday life and the special breakdown of sins that increase with aging problems with attention and learning and offers answers to questions such as do emotions get blunted with age do older people focus more on positive feelings and the age-old question of whether older people are happier than younger people is given in the chapter on the evolving concept of subjective well-being and the multifaceted nature of happiness Questions about what occurs to one's self-esteem and personality are also masterfully discussed and the answers may be surprising The concluding seventh chapter provides a cultural lens on the biopsychosocial study of aging      **Recent Advances in Geriatric Medicine** Mason Button, 2019-06-11 Geriatric medicine refers to the

medical practices and interventions aimed at ensuring quality of life for elderly people along with the prevention and treatment of diseases and conditions that people are prone to as they age One of the most significant issues in geriatrics is the prevention and treatment of delirium Promoting interventions that are designed to maintain the physical and cognitive functioning of aged adults maximizing patients independence etc are some of the ways to manage delirium Aging may cause changes in the effectiveness of drugs and their side effects Pharmacological constitution and regimen is another important consideration in geriatric medicine The elderly are particularly prone to polypharmacy This happens when a patient suffers from multiple disorders and takes over the counter drugs and herbal medications An important area of study is the efficacy of inappropriate medications and dangerous drug interactions This book explores all the important aspects of geriatric medicine in the present day scenario Different approaches evaluations methodologies and advanced studies on geriatric medicine have been included herein The extensive content of this book provides the readers with a thorough understanding of the recent advances in geriatric medicine

**Recent Advances in Zebrafish Researches** Yusuf Bozkurt,2018-05-30 Model organisms have been used in various disciplines in order to understand different mechanisms underlying the problems From this point of view the zebrafish has become a favorite model organism in different scientific research fields in recent years because of its rapid embryonic development transparency of its embryos and its large number of offspring along with several other advantages Recent Advances in Zebrafish Researches demonstrates the role and the function of zebrafish in different research fields and totally includes 11 chapters which have been written by the expert researches in their fields With this book every researcher will better understand different mechanisms underlying the problems at different disciplines using zebrafish as model organism
