Congress. Senate. Select Committee on Small Business,1952 Imagining the American Polity John G. Gunnell,2015-09-10 Americans have long prided themselves on living in a country that serves as a beacon of democracy to the world but from the time of the founding they have also engaged in debates over what the criteria for democracy are as they seek to validate their faith in the United States as a democratic regime In this book John Gunnell shows how the academic discipline of political science has contributed in a major way to this ongoing dialogue thereby playing a significant role in political education and the formulation of popular conceptions of American democracy Using the distinctive internalist approach he has developed for writing intellectual history Gunnell traces the dynamics of conceptual change and continuity as American political science evolved from a focus in the nineteenth century on the idea of the state through the emergence of a pluralist theory of democracy in the 1920s and its transfiguration into liberalism in the mid 1930s up to the rearticulation of pluralist theory in the 1950s and its resurgence yet again in the 1990s Along the way he explores how political scientists have grappled with a fundamental question about popular sovereignty Does democracy require a people and a national democratic community or can the requisites of democracy be achieved through fortuitous social configurations coupled with the design of certain institutional mechanisms **The 1931-1940: American Film Institute Catalog of Motion Pictures Produced in the United States** American Film Institute,1993 The entire field of film historians awaits the AFI volumes with eagerness Eileen Bowser Museum of Modern Art Film Department Comments on previous volumes The source of last resort for finding socially valuable films that received such scant attention that they

The Plunder of Black America Calvin Schermerhorn, 2025-02-11 The long history of the racial wealth gap in America told through the stories of seven Black families who struggled to build wealth over multiple generations Wealth is central to the American pursuit of happiness and is an overriding measure of well being Yet wealth is conspicuously absent from African American households Why do some 3 5 million Black American families have zero or negative wealth Historian Calvin Schermerhorn traces four hundred years of Black dispossession and decapitalization what Frederick Douglass called plunder through the stories of families who have strived to earn and keep the fruits of their toils Their struggles reveal that the ever evolving strategies to strip Black income and wealth have been critical to sustaining a structure of racialized disadvantage These accounts also tell of the quiet heroism of those who worked to overcome obstacles and defy the plunder From the story of Anthony and Mary Johnson abducted from Angola and brought to Virginia in 1619 to the enslaved Black workers dispossessed by the Custis Washington family to Venture Smith born Brotheer Furro who purchased his freedom to three generations of a family enslaved in the South who moved north after Emancipation to the Tulsa massacre and the subprime lending crisis Schermerhorn shows that we cannot reckon with today s racial wealth inequality without understanding its unrelenting role in American history
