Optimizing Project Work, Management, and Delivery Gary L.

Richardson,Brad M. Jackson,2023-09-19 Thousands of project management related books have been written Why is Optimizing Project Work Management and Delivery different This book represents the authors experiences gained from looking at the problem of project management for 50 years and wondering why projects cannot be more successful Experience from various management models and techniques has helped but still does not fit reality or provide accurate forecasts Industry surveys have compiled the root causes of project failure and yet they persist Is there no answer to this problem As the book explains the management solution is not in the models or the theory but is found in how they are mapped against the actual target project characteristics This is the book s unique strength There are major coverage gaps in current project management models that also need to be recognized All of the existing models are correct in some ways and yet each is also wrong The book starts by reviewing popular models and related topics that help construct the building blocks of an integrated model structure which is at the core of this book The integrated model described here is meant to be a decision oriented view related to the project life cycle rather than a cookbook of success steps Project management is too complex for a cookbook approach This text helps managers find that right path

Situational Project Management

Oliver F. Lehmann,2016-08-19 Most project managers would agree that every project is unique But not all project managers would agree that the best way to manage a unique project is unique Many still cling to the old practice of having a methodology that is applied to all projects One size fits all is still in common use and this approach has proven to lead to project failure Flexibility situational intelligence and creativity are essential to deliver project success The need to recognize and master ever changing requirements and environmental conditions is a tough challenge for professional project managers The same practices that led to success yesterday may cause failure today Selecting favorable responses to a given situation is often the most critical factor of the dynamics of success and failure This book is designed to help project professionals assess a situation predict the appropriate approach methodology and achieving styles and then apply them in a situational fashion To guide project managers in selecting the appropriate responses Situational Project Management SitPM shows how to assess a given project determine its unique characteristics and select the appropriate methods to complete the project With this book projects managers can use SitPM to develop profiles of their projects on the basis of the projects physical characteristics the project teams behavioral characteristics the enterprise environment and the market environments receiving project deliverables These profiles help project managers to determine the appropriate project life cycle approach and leadership style The book also explores various ways to engage stakeholders on the basis of a project s SitPM profile The book s author Oliver F Lehmann has developed a set of templates to apply SitPM in practice It can be downloaded from [www](http://www.sitpm.com)

Living Languages: An Integrated Approach to Teaching Foreign

Languages in Secondary Schools Catherine Watts, Clare Forder, 2013-06-17 Living Languages is simply bursting with practical and original ideas aimed at teachers and trainee teachers of foreign languages in secondary schools. Written by a team of experienced linguists, this book will inspire and motivate the foreign language classroom and the teachers who work within it. Living Languages comprises eight chapters and is structured around the integrated classroom merging language learning with different aspects of the wider curriculum such as multimedia, theatre and music, celebrations and festivals, sport and alternative approaches to teaching languages. A DVD is also included with the book containing additional teaching materials and the associated films and audio recordings which make this a fully developed and effective teaching resource. Twenty-eight real-life case studies and projects are presented, all of which have been tried and tested in the classroom with many having won recent educational awards. Ideas and activities outlined in this unique resource include Languages and multi-media projects involving different uses of technology such as film making, Digital Storytelling and subtitling in different languages; Languages and theatre and music including the work of the Theatre Sans Frontières with its Marie Curie Science Project; Motivating pupils to learn languages whilst keeping fit including examples from Score in French; The German Orienteering Festival and Handball in Spanish; Continuing Professional Development to inspire secondary language teachers to continue their individual professional development. The chapter contains concrete examples of others' experiences in this area and includes details of support organisations and practical opportunities. Each project is explored from the teachers' perspective with practical tips, lesson plans and reflections woven throughout the text such as what to budget, how to organise the pre-event period, how to evaluate the activity and whom to contact for further advice in each case. Activities and examples throughout are given in three languages: French, German and Spanish.
