Castlevania: Aria of Sorrow , Fighting at the Legal Boundaries Kenneth Watkin OMM, CD, QC,2016-05-03 The international law governing armed conflict is at a crossroads as the formal framework of laws designed to control the exercise of self defense and conduct of inter state conflict finds itself confronted with violent 21st Century disputes of a very different character Military practitioners who seek to stay within the bounds of international law often find themselves applying bodies of law IHRL IHL ICL in an exclusionary fashion and adherence to those boundaries can lead to a formal and often rigid application of the law that does not adequately address contemporary security challenges Fighting at the Legal Boundaries offers a holistic approach towards the application of the various constitutive parts of international law The author focuses on the interaction between the applicable bodies of law by exploring whether their boundaries are improperly drawn or are being interpreted in too rigid a fashion Emphasis is placed on the disconnect that can occur between theory and practice regarding how these legal regimes are applied and interact with one another Through a number of case studies Fighting at the Legal Boundaries explores how the threat posed by insurgents terrorists and transnational criminal gangs often occurs not only at the point where these bodies of law interact but also in situations where there is significant overlap In this regard the exercise of the longstanding right of States to defend nationals including the conduct of operations such as hostage rescue can involve the application of human rights based law enforcement norms to counter threats transcending the conflict spectrum This book has five parts Part I sets out the security legal and operational challenges of contemporary conflict Part II focuses on the interaction between the jus ad bellum humanitarian law and human rights including an analysis of the

historical influences that shaped their application as separate bodies of law Emphasis is placed on the influence the proper authority principle has had in the human rights based approach being favored when dealing with criminal non State actors during both international and non international armed conflict Part III analyzes the threats of insurgency and terrorism and the state response This includes exploring their link to criminal activity and the phenomenon of transnational criminal organizations Part IV addresses the conduct of operations against non State actors that span the conflict spectrum from inter state warfare to international law enforcement Lastly Part V looks at the way ahead and discusses the approaches that can be applied to address the evolving diverse and unique security threats facing the international community **Dawn's Left**
