Religion And Science In The Context Of Chinese Culture:

Religion and Science in the Context of Chinese Culture Deguang Chen, Yi-Jia Tsai, Frank Budenholzer, 2006 Religion and science in the context of Chinese culture A Theology of Engagement Science Theology S **Questioning Science in East Asian Contexts** Yung Sik Kim, 2014-01-16 Questioning Science in East Asian Contexts brings together twelve essays written by Yung Sik Kim addressing various questions about the social and cultural contexts of science in East Asia Most of the essays deal with the relationship between science and Confucianism especially the roles that Confucian thought values and institutions have on the development of science Kim shows that this relationship is very complex and multifaceted and cannot be dealt with in a simplistic manner Kim offers comparative perspectives and discusses the problems of intercultural comparisons he demonstrates that in spite of the potential dangers that accompany these comparisons they should be made nonetheless as they allow for a better understanding of the situation in East Asia *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin, 2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science *Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures* Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi

PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa

Chinese Culture, Western Culture Tai Ng, 2007-02 This book explores how complementary Chinese and Western cultures

are how they should learn from each other to establish a dynamic balance and how institutions need constant redefinition and renewal in order to prosper By studying the history and development of thought and philosophy in these cultures it suggests lessons from our past that may shed light on current events and help us in handling future challenges The book presents answers to the following important questions Do Chinese people think differently from Westerners and if so how and why What are the key differences between Chinese and Western culture and why How did China become the most technologically advanced and sociologically sophisticated nation in the world until the seventeenth century and why did it ultimately decline What are the key characteristics of political institutions in historical China and Europe and how were they significant In this postmodern time and era of globalization what can we learn from Chinese culture and experiences As China rapidly industrializes what can it learn from the West without repeating some of the mistakes that Europeans and North Americans made in their periods of industrialization

Christianity and Chinese Culture Mikka Ruokanen, Paulos Huang, Baoluo Huang, 2010-11-23 The rapidly growing Chinese Protestant Church

faces a significant challenge it must adapt itself to the unique dimensions of Chinese culture leaving behind the trail of old missionary theology and molding an authentically Chinese approach to biblical interpretation and Christian life an approach that works within both the traditional and the contemporary dimensions of Chinese society Rising from an extraordinary 2003 Sino Nordic conference on Chinese contextual theology which brought Chinese university scholars and church theologians together for the first time Christianity and Chinese Culture addresses ways in which the church in China is responding to that challenge The essays collected here highlight both the stunning complexities confronting Protestant Christianity in China and its remarkable potential This is a most timely publication on the current issues and research on Christianity and Chinese culture in the PRC previously unavailable in English The list of scholars in the collection reads like a Who's Who in Christian studies in China including both secular academics and Christian theologians The final part on theological reconstruction is of particular interest given its importance for the Protestant churches in the last decade This book should be on the shelf of any scholar interested in the subject
