Handbook of Evolutionary Perspectives on Violence, Homicide, and War Todd K. Shackelford,Viviana A.

Weekes-Shackelford,2012-08-23 This volume synthesizes the theoretical and empirical work of leading scholars in the evolutionary sciences to produce an extensive and authoritative review of this literature Homo Symbolicus Christopher S. Henshilwood,Francesco d'Errico,2011-11-16 The emergence of symbolic culture classically identified with the European cave paintings of the Ice Age is now seen in the light of recent groundbreaking discoveries as a complex nonlinear process taking

root in a remote past and in different regions of the planet In this book the archaeologists responsible for some of these new discoveries flanked by ethologists interested in primate cognition and cultural transmission evolutionary psychologists modelling the emergence of metarepresentations as well as biologists philosophers neuro scientists and an astronomer combine their research findings Their results call into question our very conception of human nature and animal behaviour and they create epistemological bridges between disciplines that build the foundations for a novel vision of our lineage s cultural trajectory and the processes that have led to the emergence of human societies as we know them

Scientific Models for Religious Knowledge Andrew Ralls Woodward,2018-08-14 Most comparisons of science and religion are really comparisons of science and Christianity or science and Islam and so forth In *Scientific Models for Religious Knowledge* the author aims to get outside typical polarized debates between traditional a priori theism and radical scientific naturalism Instead a new science and religion compatibility system between a scientific study of religion and a religious epistemology is our new elusive problem Moreover we shall look at a comparison and contrast of modern science with the simple deference of the human mind to the actions of culturally postulated superhuman agents This book pays critical attention to the contributions of scholars in the philosophy of religion the philosophy of science and the scientific study of religion *Scientific Models for Religious Knowledge* is useful for readers looking to expand their learning in the philosophies of science and religion as these subjects are taught and analyzed in modern research universities "The One Who Sows Bountifully"

nonreligious philosophies can any broad claim for religion's psychological naturalness be plausible Addressing this empirical gap the studies discussed in this volume support core naturalness theory predictions for human reasoning about supernatural agency intelligent design the efficacy of rituals and vitalistic causality And yet each study elucidates expands upon or even challenges outright the logical assumptions of the naturalness theory Written for a non specialist audience this volume introduces the naturalness theory and frames the significance of these new findings for students and scholars of cultural psychology the psychology of religion the anthropology of religion and Chinese Studies [The Oxford Handbook of the Sociology of Religion](#) Peter Clarke,2011-02-04 The Oxford Handbook of the Sociology of Religion draws on the expertise of an international team of scholars providing both an entry point into the sociological study and understanding of religion and an in depth survey into its changing forms and content in the contemporary world The role and impact of religion and spirituality on the politics culture education and health in the modern world is rigorously discussed and debated The study of the sociology of religion forges interdisciplinary links to explore aspects of continuity and change in the contemporary interface between society and religion Using a combination of theoretical methodological and content led approaches the fifty seven contributors collectively emphasise the complex relationships between religion and aspects of life from scientific research to law ecology to art music to cognitive science crime to institutional health care and more The developing character of religion irreligion and atheism and the impact of religious diversity on social cohesion are explored An overview of current scholarship in the field is provided in each themed chapter with an emphasis on encouraging new thinking and reflection on familiar and emergent themes to stimulate further debate and scholarship The resulting essay collection provides an invaluable resource for research and teaching in this diverse discipline *This is Philosophy of Religion* Neil A. Theological Incorrectness : Why Religious People Believe What They Shouldn't D. Jason Slone Assistant Professor of Religious Studies University of Findlay, 2004-01-30 Ask two religious people one question and you'll get three answers Why do religious people believe what they shouldn't not what others think they shouldn't believe but things that don't accord with their own avowed religious beliefs This engaging book explores this puzzling feature of human behavior D Jason Slone terms this phenomenon theological incorrectness He demonstrates that it exists because the mind is built in such a way that it's natural for us to think divergent thoughts simultaneously Human minds are great at coming up with innovative ideas that help them make sense of the world he says but those ideas do not always jibe with official religious beliefs From this fact we derive the important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn't He then applies these insights to three case studies First he looks at why Theravada Buddhists profess that Buddha was just a man but actually worship him as a god Then he explores why the early Puritan Calvinists who believed in predestination acted instead as if humans had free will by for example conducting witch hunts and seeking converts Finally he explains why both Christians and Buddhists believe in luck even though the doctrines of Divine Providence and karma suggest there's no such thing In seeking answers to profound questions about why people behave the way they do this fascinating book sheds new light on the workings of the human mind and on the complex relationship between cognition and culture

Secularity and Non-Religion Elisabeth Arweck, Stephen Bullivant, Lois Lee, 2016-03-16 The present collection brings together a set of essays which shed light on recent research into non religion secularity and atheism topics which have been emerging as important areas of current research in a number of different disciplines The essays cover a wide span in terms of the various stances they discuss secular atheist non religious the settings in which these topics are relevant families wider society politics demography and the different perspectives which relate to socialisation and social relations belief acquisition discrimination Written by authors from a variety of national settings and academic disciplines the collection presents a range of methodologies combining theoretical approaches with quantitative and qualitative research findings The authors address issues related to an important academic field which had been neglected for some time but which has been

made relevant by the increasing percentage of people professing a non religious stance This collection represents a major contribution to this area of academic research not only because it puts the themes of non religion and secularity firmly on the academic map but also because it offers a variety of different viewpoints and aims to bring clarity into the use of concepts and terminology The authors make important contributions to the emerging body of research in this area and point out areas where further research is needed The first essay provides a thorough introduction to this field taking stock of the work done so far highlighting the overarching issues and embedding the essays in the wider context of existing literature This book was originally published as a special issue of the Journal of Contemporary Religion *Radical, Religious, and Violent* Eli Berman,2011-09-30 Applying fresh tools from economics to explain puzzling behaviors of religious radicals Muslim Christian and Jewish violent and benign How do radical religious sects run such deadly terrorist organizations Hezbollah Hamas Lashkar e Taiba and the Taliban all began as religious groups dedicated to piety and charity Yet once they turned to violence they became horribly potent executing campaigns of terrorism deadlier than those of their secular rivals In *Radical Religious and Violent* Eli Berman approaches the question using the economics of organizations He first dispels some myths radical religious terrorists are not generally motivated by the promise of rewards in the afterlife including the infamous seventy two virgins or even by religious ideas in general He argues that these terrorists even suicide terrorists are best understood as rational altruists seeking to help their own communities Yet despite the vast pool of potential recruits young altruists who feel their communities are repressed or endangered there are less than a dozen highly lethal terrorist organizations in the world capable of sustained and coordinated violence that threatens governments and makes hundreds of millions of civilians hesitate before boarding an airplane What s special about these organizations and why are most of their followers religious radicals Drawing on parallel research on radical religious Jews Christians and Muslims Berman shows that the most lethal terrorist groups have a common characteristic their leaders have found a way to control defection Hezbollah Hamas and the Taliban for example built loyalty and cohesion by means of mutual aid weeding out free riders and producing a cadre of members they could rely on The secret of their deadly effectiveness lies in their resilience and cohesion when incentives to defect are strong These insights suggest that provision of basic social services by competent governments adds a critical nonviolent component to counterterrorism strategies It undermines the violent potential of radical religious organizations without disturbing free religious practice being drawn into theological debates with Jihadists or endangering civilians

Understanding Religious Pluralism Peter C. Phan,Jonathan Ray,2014-08-01 Our contemporary world is fast becoming religiously diverse in a variety of ways Thanks to globalization and migration to mention only two current worldwide trends people of diverse and sometimes mutually hostile faiths are now sharing neighborhoods and encountering one another s religious traditions on a daily basis For scholars in religious studies and theology the issue to be examined is whether religious diversity is merely the result of historical development and social interaction or whether it is inherent in the object

of belief part of the very structure of faith and our attempts to understand and express it The essays in this volume range from explorations of the impact of religious diversity on religious studies to examples of interfaith encounter and dialogue and current debates on Christian theology of religion These essays examine not only the theoretical issues posed by religious pluralism to the study of religion and Christian theology but also concrete cases in which religious pluralism has been a bone of contention Together they open up new vistas for further conversation on the nature and development of religious pluralism
