Religion And The One Philosophies East And West:

Religion and The One Frederick Copleston, 2003-01-01 Theories of one ultimate reality exist in philosophies of both the East and the West and in both traditions such theories are commonly connected with religion In Religion and the One Frederick Copleston explores the approach that different philosophies have taken to the question of divine reality with a special focus on the metaphysics of the One In the first part of the book Copleston looks at the features of different traditions discussing Taoist philosophy the Vedanta schools of thought in India the development of philosophy in the Islamic world and a number of movements from the Western tradition The second part questions why people form such theories exploring factors such as the nature of the self and the cognitive value of mysticism Writing with all his hallmark learning and lucidity the author also discusses the consequences of the metaphysics of the One for ethical ideals and social activism Approaching the issues in an open minded and unprejudiced fashion he does not pretend to have answers to all the questions he raises However unlike many theologians and philosophers he is not prepared to dismiss metaphysics as being inherently irreligious

Houde, 2022-11-17 History and Systems of Psychology provides an engaging introduction to the rich story of psychology s past Retaining its trademark clarity and accessibility the Eighth Edition also features expanded coverage of non western traditions in psychology as well as added coverage of nineteenth century advances in philosophy and science The emergence of applications of psychology in clinical educational neuroscientific and social settings are further emphasized within the twenty first century landscape of psychology as a cognitive and a positive science Assuming little prerequisite knowledge the authors discuss the people places and concepts that have shaped psychology s story and show that we remain fascinated and perplexed by the same enduring questions that confronted our ancestors namely our wonder at our subjectivity and consciousness of self The Eighth Edition is supported by rich online resources including a manual test bank and lecture slides for instructors and study guides and links to primary source literature for students **The Epistemology of Comparative Philosophy** Joseph Kaipayil, 1995 *Philosophy East & West* , 2000 *After Our Likeness* Miroslav Volf, 1998 In *After Our Likeness* Miroslav Volf explores the relationship between persons and community in Christian theology He seeks to counter the tendencies toward individualism in Protestant ecclesiology and give community its due

Christianity and Classical Culture Jaroslav Pelikan, 1993-01-01 The momentous encounter between Christian thought and Greek philosophy reached a high point in fourth century Byzantium and the principal actors were four Greek speaking Christian thinkers whose collective influence on the Eastern Church was comparable to that of Augustine on Western Latin Christendom In this erudite and informative book a distinguished scholar provides the first coherent account of the lives and writings of these so called Cappadocians named for a region in what is now eastern Turkey showing how they managed to be Greek and Christian at the same time Jaroslav Pelikan describes the four Cappadocians Gregory of Nazianzus Basil of

Caesarea Gregory of Nyssa and Macrina sister and teacher of the last two who were trained in Classical culture philosophy and rhetoric but who were also defenders and expositors of Christian orthodoxy On one issue of faith and life after another the nature of religious language the ways of knowing the existence of God the universe as cosmos time and space free will and immortality the nature of the good life the purpose of the universe they challenged and debated the validity of the Greek philosophical tradition in interpreting Scripture Because the way they resolved these issues became the very definition of normative Christian belief says Pelikan their system is still a key to our understanding not only of Christianity's diverse religious traditions but also of its intellectual and philosophical traditions This book is based on the prestigious Gifford Lectures presented by Jaroslav Pelikan at the University of Aberdeen in 1992 and 1993 **Rediscovering God with**

Transcendental Argument David Peter Lawrence, 2015-07-29 Rediscovering God with Transcendental Argument provides a comparative philosophical study of the Pratyabhijñā a system of the medieval Kashmiri Ācārya thinkers Utpaladeva and Abhinavagupta Beginning with intensive descriptive and prescriptive reflections on the nature of philosophy itself the book examines the special characteristics of the Pratyabhijñā discourse as both philosophical apologetics and spiritual exercise Lawrence situates the Pratyabhijñā speculation within the larger context of Hindu and Buddhist deliberations about the role of interpretation in experience and gives a groundbreaking exposition of the epistemology and ontology of Shiva's self recognition He observes the similarities and differences of the Pratyabhijñā with Christian understandings of the divine logos and argues that the Ācārya philosophy elucidates a cogent way of demonstrating the reality of God against contemporary relativism deconstructionism and other forms of skepticism **Love, the Ultimate Apologetic** Art Lindsley, 2009-09-20

Defending the Christian faith is a multidimensional task But central to that task must be the presentation and example of the uniqueness of Christian love Author and apologist Art Lindsley explores the persuasive and illuminating power of Christ like love expressed in commitment conscience community and courage Such love Lindsley shows us does indeed bear ultimate witness to the living truth of Jesus Christ **Methodologies of Comparative Philosophy** Robert W. Smid, 2010-07-02

What is comparative philosophy This question is ultimately a methodological one according to this much needed book The cultivation of area studies in diverse traditions has opened up opportunities for cross cultural understanding that have rarely existed before and comparative philosophy is a rapidly emerging area of inquiry Yet surprisingly little has been written on comparative methodology in philosophy Of course there is much at stake in how we compare things how comparison is done determines what comparison is Author Robert W Smid provides a critical review of four of the most influential comparative methodologies within the American pragmatist and process philosophical traditions those of William Ernest Hocking F S C Northrop Robert Cummings Neville and David L Hall in collaboration with Roger T Ames Discussing the history of each methodology's development and critically assessing its strengths and weaknesses Smid demonstrates that it is possible to compare methods as well as traditions and encourages those interested to join the contemporary conversation Reality

Religion, and Passion Jessica Frazier, 2009-01-01 Radical doubt about the truths that govern life has posed a problem for thinkers in many different cultures and periods This study uncovers the solutions offered by a postmodern Western thinker Hans Georg Gadamer and an early modern Indian thinker Rupa Gosvami each of whom offers a renewed postskeptical vision of a revitalized life that is firmly rooted in the transcendental truths of reality **The Thomist Tradition** Brian J.

Shanley, 2013-03-09 The Thomistic tradition takes its name from the thirteenth century religious thinker and saint who is its source and inspiration the Dominican Friar Thomas 1 Aquinas Aquinas understood himself to be a theologian and that is what he was This obvious biographical fact needs to be underlined at the beginning however 2 since it has often since been lost sight of in treatments of his thought The reason for this is that Aquinas also developed a powerful innovative and comprehensive philosophy which has proved to be at least as perennial if not more so than the theological synthesis that it was originally designed to serve His followers have kept both strains of his thought alive until this day but not always combining the same dual expertise Theology and philosophy have since become more distinct and as each has fragmented into sub disciplines of academic specialization it becomes harder and harder for anyone to master the thought of Aquinas as evidenced by the whole Yet grasping the whole is essential to grasping the part master work of Aquinas's mind his Summa theologiae You cannot understand any part of the Summa unless you understand its place within the whole and much violence has been done to Aquinas's thought by abstracting it from the larger context in order to present it in discrete units

Auden's O Andrew W. Hass, 2013-11-01 Explores the rise of the idea of nothing in Western modernity and how its figuration is transforming and offering new possibilities In this groundbreaking interdisciplinary history of ideas Andrew W Hass explores the ascendancy of the concept of nothing into late modernity He argues that the rise of the reality of nothing in religion philosophy and literature has taken place only against the decline of the concept of One a shift from a sovereign understanding of the One unity universality toward the figure of the O a cipher figure that as nonentity is nevertheless determinant of other realities The figuring of this O culminates in a proliferation of literary expressions of nothingness void and absence from 1940 to 1960 but by century's end this movement has shifted from linear progression to mutation whereby religion theology philosophy literature and other critical modes of thought such as feminism merge into a shared circular activity The writer W H Auden lends his name to this O his long poetic work The Sea and the Mirror an exemplary manifestation of its implications Hass examines this work along with that of a host of writers philosophers and theologians to trace the revolutionary hermeneutics and creative space of the O and to provide the reasoning of why nothing is now such a powerful force in the imagination of the twenty first century and of how it might move us through and beyond our turbulent times

Essays on Vedanta and Western Philosophies Arun Chatterjee,2018-07-10 Philosophical issues such as reality and appearance God and world self and not self rebirth and immortality free will and determination mysticism etc have been examined by eastern and western philosophers as far back as the sages of Upanishads 700 BCE in the East and Plato 400 BCE in the West However there was no significant communication among the philosophers of the East and West perhaps until the eighteenth century Arthur Schopenhauer 1788 1860 was one of the first among the great western philosophers to recognize the value of Indian philosophies Despite the lack of communication there are striking similarities of concepts and issues addressed by Indian and western philosophies Also interesting is how similar are the mystical versions of different religions of the East and West The author Dr Arun Chatterjee has attempted to bring out the similarities and differences in various chapters of this book dealing with different topics Among Indian philosophies the focus is on Vedanta philosophy and the views of Sri Aurobindo 1872 1950 The views of Swami Vivekananda 1863 1902 also are presented Other Indian philosophies such as Sankhya and Buddhism are discussed briefly Among western religions Judaism Christianity and Islam are discussed
