**Religious Symbols in the Public School Classroom** Jeroen Temperman, 2012-09-06 Increasingly debates about religious symbols in the public space are reformulated as human rights questions and put before national and international judges. Particularly in the area of education legitimate interests are manifold and often collide. Children's educational and religious rights, parental liberties vis-à-vis their children, religious traditions, state obligations in the area of public school education, the state neutrality principle and the professional rights and duties of teachers are all principles that may warrant priority attention. Each from their own discipline and perspective ranging from legal, human rights, scholars, legal philosophers, political scientists, comparative law scholars and country specific legal experts, these experts contribute to the question of whether in the present day pluralist state there is room for state symbolism e.g. crucifixes in classroom or personal religious signs e.g. cross necklaces or kirpans or attire e.g. kippahs or headscarves in the public school classroom. Freedom in the Liberal State Rex Ahdar, Ian Leigh, 2013-03-21 Examining the law and public policy relating to religious liberty in Western liberal democracies, this book contains a detailed analysis of the history, rationale, scope and limits of religious freedom from but not restricted to an evangelical Christian perspective. Focussing on United Kingdom, the United States, Canada, New Zealand, Australia and EU, it studies the interaction between law and religion at several different levels, looking at the key debates that have arisen. Divided into three parts, the book begins by contrasting the liberal and Christian rationales for and understandings of religious freedom. It then explores central thematic issues: the types of constitutional frameworks within which any right to religious exercise must operate; the varieties of paradigmatic relationships between organized religion and the state; the meaning of religion; the limitations upon individual and institutional religious behaviour; and the domestic and international legal mechanisms that have evolved to address religious conduct. The final part explores key subject areas where current religious freedom controversies have arisen: employment, education, parental rights and childrearing controls on pro-religious and anti-religious expression, medical treatment and religious group/church autonomy. This new edition is fully updated with the growing case law in the area and features increased coverage of Islam and the flashpoint debates surrounding the accommodation of Muslim beliefs and practices in Anglophone nations. **Extending**
