*Religion Confronting Science* Donivan Bessinger, 1991      *Confronting Religious Denial of Science* Catherine M. Wallace, 2016-07-05 Confronting Religious Denial of Science Christian Humanism and the Moral Imagination traces the cultural backstory of contemporary conflicts between biblical literalists who oppose evolution and New Atheists who insist that religion is so pernicious it should be outlawed if not exterminated That s a clash of fundamentalisms It s a zero sum game derived from high Victorian misunderstanding of both religion and science The God whom science supposedly replaces is the Engineer Almighty sitting at his keyboard controlling every event on earth But that s not a viable concept of God Far better Wallace argues to understand Christianity in Clifford Geertz s terms as a system of symbols that both constitutes a worldview and according to David Sloan Wilson encourages prosocial behavior That reframing makes it possible to reclaim what biblical scholars have said for decades the miracles of Jesus were confrontational symbolic actions They contradicted the political status quo in colonial Palestine not the laws of biology Prayer she explains is not magical thinking It s a creative highly disciplined introspective process most familiar to many people in forms like mindfulness meditation Wallace offers an intriguing exploration of issues that believers seldom discuss in ways that make sense to the religiously unaffiliated embed container position relative padding bottom 56 25% height 0 overflow hidden max width 100% embed container iframe embed container object embed container embed position absolute top 0 left 0 width 100% height 100%      *Creation, Catastrophe & Calvary* John Templeton Baldwin, 2000 In this scientific age what difference does it make whether I believe the world was created in six literal days and that the world was destroyed by a global flood In answering these questions Creation Catastrophe and Calvary shows how these beliefs are related to key issues such as the forgiveness of our sins and Sabbath observance Foreword Introduction Meet the Authors An Angel s Worldview The Days of Creation in Genesis 1 A Second Creation Account Biblical Evidence for the Universality of the Genesis Flood The Grand Canyon and the Genesis Flood The Geologic Column and Calvary The Rainbow Connection Implications for an Evangelical Understanding of the Atonement Evolution A Theory in Crisis The Role of Creation in Seventh day Adventist Theology Science and Theology Focusing the Complementary Lights of Jesus Scripture and Nature      **Faith Confronts Nuclear Power** John R. Gugel, 2015-10-22 Faith Confronts Nuclear Power is a theological critique that attempts to call people to action in the battle against nuclear power Nuclear power is a sophisticated terribly expensive and frightfully dangerous way to boil water What is it doing to the earth our God created How do we care for the earth if we allow it to continue Looking at nuclear power through the eyes of faith a Lutheran pastor John Gugel is alarmed at the apparent lack of concern on this issue and seeks to call people to action      **Let There Be Light** Howard Smith, Ph.D., 2010-10-04 In Let There Be Light Howard Smith a research astrophysicist and traditionally observant Jew explores how modern scientific understandings of the cosmos complement Judaism s ancient mystical theology the Kabbalah He argues that science and religion are not only compatible but that a healthy productive

dialogue between the two sheds light on ethics free will and the nature of life while at the same time rejecting fundamentalist misinterpretation and the pseudoscience of creationism Written for a general audience yet supported by the most current and accurate scientific research the book discusses topics such as modern quantum mechanics and mystical notions of awareness how Kabbalah's ten sefirot mirror the developing phases of an inflationary universe and the surprising parallels that exist between the Big Bang theory and Kabbalah's origin theory Smith delves into complex ideas without resorting to jargon or mathematical equations creating an intelligent authoritative work accessible to all readers The

Creation/Evolution Controversy James L. Hayward, 1998-04-30 This collection of 447 annotated references provides an overview of the literature addressing the creation evolution controversy for students teachers lawyers writers historians scientists sociologists clerics and other interested persons Fifty four annotations in the chapter on historical references highlight influential volumes published between 1543 and 1980 classic works that inform the views of later writers These historical works are listed chronologically in order of publication The remaining 393 entries feature books published from 1981 the year of the Scopes II trial in Arkansas to 1996 and include works that address historical sociological philosophical religious cosmological geological biological and anthropological issues surrounding the creation evolution controversy The annotations are written in an informative impartial style Except for references in the chapter containing historical sources and in the chapter featuring works on the history of the creation evolution controversy references are grouped under theistic and non theistic headings An introductory essay describes the history of evolutionary theory and creationism and defines the distinguishing features of each thought system An annotated list of periodicals featuring articles on creationism and evolutionism is also provided With author title and subject indexes **Religions Confronted with Science & Technology**

Marc Luyckx, 1992 **Horace Kallen Confronts America** Matthew J. Kaufman, 2019-07-03 During his more than fifty year writing career American Jewish philosopher Horace Kallen 1882-1974 incorporated a deep focus on science into his pragmatic philosophy of life He exemplified the hope among Jews that science would pave the way to full and equal integration In this intellectual biography Kaufman explores Kallen's life and illuminates how American scientific culture inspired not only Kallen's thought but also that of an entire generation Kaufman reveals the ways in which Kallen shaped the direction of discussions on race ethnicity modernism and secularism that influenced the American Jewish community An ardent secularist Kallen was also a serious religious thinker whose Jewish identity as unique and idiosyncratic as it was exemplifies the modern responsiveness to the moral ideal of authenticity Kaufman shows how one man's quest for authenticity contributed to a gradual shift in Jewish self perception in America and how in turn his struggle led to America's embrace of Kallen's well known term cultural pluralism *Confronting Religious Judgmentalism* Catherine M. Wallace, 2016-05-23 Come to church or go to hell That's religious bullying It's judgmentalism And it's a theological distortion a distortion insisting that shame and self loathing are morally appropriate In Christian humanist tradition God is not some

cosmic judge eager to smite all of us for our sinfulness God is compassion We are cherished by God beyond our wildest imagining We are called to radical hospitality not to crass judgmentalism So where does this religious judgmentalism come from It is the heritage of medieval theocracy a violent vindictive God of command and control was far more useful politically than a God of compassion hospitality and forgiveness It comes from literal minded misreading of the story of Adam and Eve and the forbidden fruit a story about shame not disobedience And it comes from political success in exploiting deep seated liabilities in the American soul we spend our lives trying to prove ourselves a hopeless task There s an alternative In the Christian humanist tradition authentic moral judgment is rooted in conscience as a creative process Morality is an art demanding both rigorous consideration of the facts and thoughtful introspection Conscience properly understood and thoughtfully practiced is an antidote to shame incessant self criticism and chronic self doubt embed container position relative padding bottom 56 25% height 0 overflow hidden max width 100% embed container iframe embed container object embed container embed position absolute top 0 left 0 width 100% height 100% [The Open Court](#) ,1926 [The Science of Religions](#) Emile Burnouf,1888 **The Study of Religion and its Meaning** J.E. Barnhart,2011-11-21 Since its founding by Jacques Waardenburg in 1971 Religion and Reason has been a leading forum for contributions on theories theoretical issues and agendas related to the phenomenon and the study of religion Topics include among others category formation comparison ethnophilosophy hermeneutics methodology myth phenomenology philosophy of science scientific atheism structuralism and theories of religion From time to time the series publishes volumes that map the state of the art and the history of the discipline [Scientists Confront Intelligent Design and Creationism](#) Andrew J. Petto,Laurie R. Godfrey,2007 With the pseudoscience of creationism rising again under the guise of intelligent design this powerful collection eviscerates the new assault on evolution and reveals the pervasive and insidious threat posed to genuine science by ID proponents like Phillip Johnson Michael Behe and William Dembski The sixteen original essays address two key issues the overwhelming scientific evidence for evolution gathered over 150 years and the dubious underpinnings of creationism and how society can mount better educational and legal policies to prevent a theological takeover of our public and scientific institutions The book includes powerful voices in the modern culture war against ID including Kevin Padian paleontologist and expert witness in the landmark lawsuit of Kitzmiller v Dover With creationist arguments forever morphing and reappearing under new aliases this new confrontation is a must read for teachers students and general readers and a ringing and lasting refutation of creationism s fraudulent claims **Gaither's Dictionary of Scientific Quotations** Carl C. Gaither,Alma E. Cavazos-Gaither,2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author

this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics

**Prophets Facing Backward** Meera Nanda,2003 The leading voices in science studies have argued that modern science reflects dominant social interests of Western society Following this logic postmodern scholars have urged postcolonial societies to develop their own alternative sciences as a step towards mental decolonization These ideas have found a warm welcome among Hindu nationalists who came to power in India in the early 1990s In this passionate and highly original study Indian born author Meera Nanda reveals how these well meaning but ultimately misguided ideas are enabling Hindu ideologues to propagate religious myths in the guise of science and secularism At the heart of Hindu supremacist ideology Nanda argues lies a postmodernist assumption that each society has its own norms of reasonableness logic rules of evidence and conception of truth and that there is no non arbitrary culture independent way to choose among these alternatives What is being celebrated as difference by postmodernists however has more often than not been the source of mental bondage and authoritarianism in non Western cultures The Vedic sciences currently endorsed in Indian schools colleges and the mass media promotes the same elements of orthodox Hinduism that have for centuries deprived the vast majority of Indian people of their full humanity By denouncing science and secularization the left was unwittingly contributing to what Nanda calls reactionary modernism In contrast Nanda points to the Dalit or untouchable movement as a true example of an alternative science that has embraced reason and modern science to challenge traditional notions of hierarchy

Quakers, Jews, and Science G. N. Cantor,2005-09-22 This study examines how two minorities the Quaker and Anglo Jewish communities engaged with the sciences With their roots in the mid seventeenth century both communities maintained their religious and social norms throughout the eighteenth and nineteenth centuries while standing outside the hegemony of the Anglican Church and being subject to various forms of discrimination Yet for both Quakers and Jews science offered educational and career opportunities and participation in the wider society They adopted their own scientific interests with Quakers being attracted principally to the observational sciences Drawing on a wealth of documentary material much of which has not been analysed by previous historians Geoffrey Cantor charts the involvement of Quakers and Jews in many different aspects of science scientific research science education science related careers and scientific institutions ranging from the Royal Society to the Great Exhibition

**When Religious Faith Collides with Science** Jan M. Long,2016-08-17 A 2014 Gallup Poll indicated that 26 percent of Americans believe that humans came into existence less than 10 000 years ago with a much larger 37 percent believing the world was created in six 24 hour days Those percentages represent around 83 million and 118 million people respectively suggesting these to be ideas that resonate with a large swath of the population Given the prevalence of such thinking the question looms Is it possible that so many people could be wrong or is science simply mistaken about some of these matters This book is very much about the importance process plays in the conclusions that are reachable with Jan Long proposing that process itself can answer such

questions doing so in a way that offers credibility He proposes that process entails a set of well established rules for how knowledge is acquired and these can help guide the formation of a sacred construct about beginnings In the final analysis it is a process that seeks to replace dogmatic thinking with humble and tentative expressions about that which is knowable about the many mysteries of reality that convey to sentient beings awe and wonder Hermeneutics, Politics, and the History of Religions Christian K. Wedemeyer, Wendy Doniger, 2010 This volume comprises papers presented at a conference marking the 50th anniversary of Joachim Wach's death and the centennial of Mircea Eliade's birth Its purpose is to reconsider both the problematic separate legacies of these two major twentieth century historians of religions and the bearing of these two legacies upon each other Shortly after Wach's death in 1955 Eliade succeeded him as the premiere historian of religions at the University of Chicago As a result the two have been associated with each other in many people's minds as the successive leaders of the so called Chicago School in the history of religions In fact as this volume makes clear there never was a monolithic Chicago School Although Wach reportedly referred to Eliade as the most astute historian of religions of the day the two never met and their approaches to the study of religions differed significantly Several dominant issues run through the essays collected here the relationship between the two men's writings and their lives and in Eliade's case the relationship between his political commitments and his writings in fiction history of religions and autobiography Both men's contributions to the field continue to provoke controversy and debate and this volume sheds new light on these controversies and what they reveal about these two scholars legacies Science, Faith And Ethics Larry L Hench, 2001-11-19 Every day headlines emphasise the impact that technology has on the manipulation of life We all want to live longer healthier happier lives To live at all costs and maintain life at all costs has become a popular aim This book examines those costs it probes the consequences of putting one's faith in science It explores the belief that with science comes certainty The use and misuse of implants transplants cloning genetic manipulation health care resources birth and death control are debated in terms of the complex scientific economic and ethical issues involved **Congress of Arts and Science: Education.
