## **Religion In An Age Of Science:**

**Religion in an Age of Science** Ian G. Barbour, 2013-04-09 A comprehensive examination of the major issues between science and religion in today's world     Religion in an Age of Science Ian Barbour, 1988     **Reason and Religion in an Age of Science** Terry Kelly, 2007-12-31 The book is aimed at senior high school and college students as a textbook a book to be used in a classroom setting in course in science and religion religion and philosophy It deals with topics such as 1 The importance of science and religion methods of science the method of religion the birth of modern cosmology the development of cosmology the Big Bang the Book of Genesis the Stars the Anthropic universe science at its limits the resurrection and the fruits of a useful conversation between science and religion The book has 10 chapters and has questions and comes with a CD that has many power points for us in the classroom as and adjunct to teaching with the accompanying the text     **Belief in God in an Age of Science** John Polkinghorne, 1998-03-30 John Polkinghorne is a major figure in today's debates over the compatibility of science and religion Internationally known as both a theoretical physicist and a theologian the only ordained member of the Royal Society Polkinghorne brings unique qualifications to his inquiry into the possibilities of believing in God in an age of science In this thought provoking book the author focuses on the collegiality between science and theology contending that these intellectual cousins are both concerned with interpreted experience and with the quest for truth about reality He argues eloquently that scientific and theological inquiries are parallel The book begins with a discussion of what belief in God can mean in our times Polkinghorne explores a new natural theology and emphasizes the importance of moral and aesthetic experience and the human intuition of value and hope In other chapters he compares science's struggle to understand the nature of light with Christian theology's struggle to understand the nature of Christ He addresses the question Does God act in the physical world And he extends his ideas about the role of chaos theory surveys the prospects for future dialogue between scientific and theological thinkers and defends a critical realist understanding of the activities of both disciplines Polkinghorne concludes with a consideration of the nature of mathematical truths and the links between the complementary realities of physical and mental experience     **Religion in an Age of Science** Edwin Arthur Burtt, 1929 Issues in Science and Religion Ian G. Barbour, 1966 First published 1966 Includes index Includes bibliographical references **God in the Age of Science?** Herman Philipse, 2012-02-23 God in the Age of Science is a critical examination of strategies for the philosophical defence of religious belief The main options may be presented as the end nodes of a decision tree for religious believers The faithful can interpret a creedal statement e.g. God exists either as a truth claim or otherwise If it is a truth claim they can either be warranted to endorse it without evidence or not Finally if evidence is needed should its evidential support be assessed by the same logical criteria that we use in evaluating evidence in science or not Each of these options has been defended by prominent analytic philosophers of religion In part I Herman Philipse assesses these options and argues that the most promising for believers who want to be justified in accepting their

creed in our scientific age is the Bayesian cumulative case strategy developed by Richard Swinburne Parts II and III are devoted to an in depth analysis of this case for theism Using a strategy of subsidiary arguments Philipse concludes 1 that theism cannot be stated meaningfully 2 that if theism were meaningful it would have no predictive power concerning existing evidence so that Bayesian arguments cannot get started and 3 that if the Bayesian cumulative case strategy did work one should conclude that atheism is more probable than theism Philipse provides a careful rigorous and original critique of theism in the world today *Faith in the Age of Science* Mark Silversides,2012-02-29 This book carefully examines the claims made by the followers and promoters of both atheism and religion in a rational and engaging way *Religion and Science* Ian G. a major role in determining what we will become In this book Philip Hefner reminds us that this inescapable condition is the challenge and opportunity of Homo sapiens as the created co creator In four original chapters and an epilogue Hefner frames the created co creator as a memoirist with an ambiguous legacy explores some of the roots of this ambiguity emphasizes the importance of answering this ambiguity with symbols that can interpret it in wholesome ways proposes a partial theological framework for co creating such symbols and applies this framework to the challenge of using technology like artificial intelligence and robotics to create other co creators in our own image Editors Jason P Roberts and Mladen Turk have compiled eight responses to Hefner s work to honor his scholarly career and answer his call to help co create a more wholesome future in an age of science technology and faith
