*Spaces of Spirituality* Nadia Bartolini, Sara MacKian, Steve Pile, 2018-02-15 Spirituality is too often subsumed under the heading of religion and treated as much the same kind of thing Yet spirituality extends far beyond the spaces of religion The spiritual makes geography strange challenging the relationship between the known and the unknown between the real and the ideal and prompting exciting possibilities for charting the ineffable spaces of the divine which lie somehow beyond geography In setting itself that task this book pushes the boundaries of geographies of religion to bring into direct focus questions of spirituality By seeing religion through the lens of practice rather than as a set of beliefs geographies of religion can be interpreted much more widely bringing a whole range of other spiritual practices and spaces to light The book is split into three sections each contextualised with an editors introduction to explore the spaces of spiritual practice the spiritual production of space and spiritual transformations This book intends to open to up new questions and approaches through the theme of spirituality pushing the boundaries on current topics and introducing innovative new ideas including esoteric or radical spiritual practices This landmark book not only captures a significant moment in geographies of spirituality but acts as a catalyst for future work

*America's Crisis of Values* Wayne E. Baker, 2013-10-31 Is America bitterly divided Has America lost its traditional values Many politicians and religious leaders believe so as do the majority of Americans based on public opinion polls taken over the past several years But is this crisis of values real This book explores the moral terrain of America today analyzing the widely held perception that the nation is in moral decline It looks at the question from a variety of angles examining traditional values secular values religious values family values economic values and others Using unique data from the World Values Surveys the largest systematic attempt ever made to document attitudes values and beliefs around the world this book systematically evaluates the perceived crisis of values by comparing America's values with those of over 60 other nations The results are surprising The evidence shows overwhelmingly that America has not lost its traditional values that the nation compares favorably with most other societies and that the culture war is largely a myth The gap between reality and perception does not represent mass ignorance of the facts or an overblown moral panic Baker contends Rather the widespread perception of a crisis of values is a real and legitimate interpretation of life in a society that is in the middle of a fundamental transformation and that contains growing cultural contradictions Instead of posing a problem the author argues this crisis rhetoric serves the valuable social function of reminding us of what it means to be American As such it preserves the ideological foundation of the nation
