Religious Assortative Marriage In The United States:

Religious Assortative Marriage Robert Alan Johnson, 2013-10-22 Religious Assortative Marriage in the United States aims to formulate and apply to American religious data macrosociological models of assortative marriage in pluralistic populations. These models postulate that the factors determining assortative marriage are population structure, social divisions, and norms of endogamy. An important application of these models is to counter the ideological assumption implicit in the popular image of a melting pot of nations that the amalgamation of groups in the marriage market is the inevitable outcome of a historical plan of assimilation. The book begins by establishing a demographic framework by embedding assortative marriage in a broader model of the replacement of religious composition. This is followed by separate chapters on specialized theories concerned with the social determinants of assortative marriage, available religious marital selection data in the United States, and regional residential and cohort differentials in assortative marriage. The final chapter discusses how the general marriage market model that is sufficiently flexible to be broadly applicable to diverse structures of religious or other assortative marriage can be mathematically manipulated to generate laws of social statics and dynamics. **The**

Evelyn Lehrer, 2008-10-27 Using the tools of economics, this book analyses how religion affects decisions and outcomes in a wide range of areas including education, employment, family size, entry into cohabitation and formal marriage, the choice of spouse, and divorce. In each case, the relationships are rigorously quantified based on multivariate statistical analyses of large scale US data. The results show, for example, that when people marry outside their faith, there is an increase in the probability of divorce, the magnitude of the adverse effect depending in part on the ecumenical/exclusivist nature of the two religions. Other analyses show that youth who grow up with some religion in their lives are less likely than their counterparts with little or no religious involvement to drop out of high school or enter cohabiting arrangements at a young age. Overall, both religious affiliation and the extent of participation in religious activities are found to have far-reaching implications for economic and demographic behaviour. The book contains a wealth of data illustrating how the religious and secular realms of people's lives are intimately intertwined. With its economic perspective, it offers new ways of thinking about these relationships and is a valuable resource for students and scholars interested in the role of religion in education, work, and the family. **The**

The Catholic Family William Sander, 2019-06-26 Considering the effects of a Catholic heritage on families as a whole and on individuals within families William Sander looks at the patterns of marriage and intermarriage divorce and fertility He then turns to human capital issues in eluding the effects of a Catholic background on academic achievement earnings employment and health habits Examining the effects of Catholic schooling Sander takes into account the select nature of the Catholic school population and shows that Catholic high schools have a large negative effect on dropout rates but a positive effect on the test scores of African Americans and Hispanics

Marriage and the Economy Shoshana Grossbard-Shechtman, 2003-04-28 Marriage and the Economy explores how marriage influences the monetized economy as well as the household economy Marriage institutions are to the household economy what business institutions are to the monetized economy and marital status is clearly related to the household economy Marriage also influences the economy as conventionally measured via its impact on labor supply workers productivity savings consumption and government programs such as welfare programs and social security The macro economic analyses presented here are based on the micro economic foundations of cost benefit analysis game theory and market analysis Micro economic analysis of marriage divorce and behavior within marriages are investigated by a number of specialists in various areas of economics Western values and laws have been very successful at transforming the way the world does business but its success at maintaining individual commitments to family values is less impressive

Who Marries Whom? Hans-Peter Blossfeld, A. Timm, 2012-12-06 Marriage and social inequality are closely interrelated Marriage is dependent on the structure of marriage markets and marriage patterns have consequences for social inequality This book demonstrates that in most modern societies the educational system has become an increasingly important marriage market particularly for those who are highly qualified Educational expansion in general and the rising educational participation of women in particular unintentionally have increased the rate of assortative meeting and assortative mating across birth cohorts Rising educational homogamy means that social inequality is further enhanced through marriage because better and worse educated single men and women pool their economic and sociocultural advantages and disadvantages within couples In this book we study the changing role of the educational system as a marriage market in modern societies from a cross national comparative perspective Using life history data from a broad range of industrialized countries and longitudinal statistical models we analyze the process of spouse selection in the life

Richard,1991 Comparing ethno-religious intermarriage this book provides the background for understanding the dynamics of intermarriage in a culturally pluralistic society such as Canada **Islam and Mammon** Timur Kuran,2010-12-16 The doctrine of Islamic economics entered debates over the social role of Islam in the mid twentieth century Since then it has pursued the goal of restructuring economies according to perceived Islamic teachings Beyond its most visible practical achievement the establishment of Islamic banks meant to avoid interest it has promoted Islamic norms of economic behavior and founded redistribution systems modeled after early Islamic fiscal practices In this bold and timely critique Timur Kuran argues that the doctrine of Islamic economics is simplistic

incoherent and largely irrelevant to present economic challenges Observing that few Muslims take it seriously he also finds that its practical applications have had no discernible effects on efficiency growth or poverty reduction Why then has Islamic economics enjoyed any appeal at all Kuran's answer is that the real purpose of Islamic economics has not been economic improvement but cultivation of a distinct Islamic identity to resist cultural globalization The Islamic subeconomies that have sprung up across the Islamic world are commonly viewed as manifestations of Islamic economics In reality Kuran demonstrates they emerged to meet the economic aspirations of socially marginalized groups The Islamic enterprises that form these subeconomies provide advancement opportunities to the disadvantaged By enhancing interpersonal trust they also facilitate intragroup transactions These findings raise the question of whether there exist links between Islam and economic performance Exploring these links in relation to the long unsettled question of why the Islamic world became underdeveloped Kuran identifies several pertinent social mechanisms some beneficial to economic development others harmful
