Religious Faith Of John Fiske:

The Religious Faith of John Fiske H. Burnell Pannill,1957 Through Nature to God John Fiske,2016-05-28 The grand arguments for the great philosopher's own religious faith Springfield Republican Mr Fiske's incomparable clearness of thought and literary technique are here applied with illuminating effect to the most stupendous subjects connected with human existence The Index Cleveland This is a thoughtful little book dealing briefly but by no means superficially with the greatest of all subjects The Saturday Review of Politics Literature Science and Art A book that will both stimulate the sluggish mind and confirm the feeble of heart The Academy Well worth reading The Church Gazette There are several passages in the book which remind us that Mr Fiske is not a thorough going evolutionist but is a follower of Spencer who holds that Evolution and Devolution ceaselessly alternate under the influence of an immutable law that knows no growth no cause no reason so that not evolution but immutability according to his account of the matter is the general characteristic of the universe The Nation This book discusses in Mr Fiske's large and luminous way the mystery of evil the cosmic roots of love and self sacrifice and the everlasting reality of religion It falls in the same group with his Idea of God and Destiny of Man which have been an inspiration and a source of strength and light to a multitude of readers The Churchman Furnishes a very full account of the religious aspects of the doctrine of evolution Agnostics and philosophers of the sterner type said that Dr Fiske had gone outside of his province as a philosopher and some accused him of appealing to the amiable prejudices of the religious world to win favor for his scientific creed But unlearned people have received these interpretations with unaffected gladness They have an instinctive conviction that the prophet plays a more important part in religion than the philosopher and that when the philosopher enters the church he must prophesy The Unitarian Register **The Religious Faith of John Fiske / H. H. Burnell Pannill** H. Burnell Pannill,1957 **The Idea of God as Affected by Modern Knowledge** John Fiske,2022-06-03 In The Idea of God as Affected by Modern Knowledge John Fiske embarks on an intellectual journey that examines the evolving conception of divinity through the lens of contemporary scientific and philosophical advancements Utilizing a blend of rigorous analysis and accessible prose Fiske situates his discourse within the vibrant context of late 19th century thought

where scientific discovery and the quest for knowledge were reshaping religious beliefs His insights deftly navigate the tensions between faith and reason emphasizing how modern epistemology influences traditional theological constructs Fiske a prominent philosopher and historian was deeply engaged with the intellectual currents of his time including Darwinism and the emergence of social sciences His background in both philosophy and history coupled with a keen interest in the intersection of science and religion enabled him to tackle such profound questions Fiske's earlier works established him as a leading thinker well positioned to explore the implications of modern knowledge on humanity's understanding of God This book is a vital resource for readers interested in the interplay between science and religion as it not only provides a historical perspective but also invites contemporary discourse on the relevance of divine concepts in an era characterized by scientific rationality Fiske's eloquent arguments challenge assumptions and inspire critical thought making this work a must read for anyone engaged in theological or philosophical studies

The Temptations of Evolutionary Ethics Paul Lawrence Farber, 1994-10-11 Evolutionary theory tells us about our biological past can it also guide us to a moral future Paul Farber's compelling book describes a century old philosophical hope held by many biologists anthropologists psychologists and social thinkers that universal ethical and social imperatives are built into human nature and can be discovered through knowledge of evolutionary theory Farber describes three upsurges of enthusiasm for evolutionary ethics The first came in the early years of mid nineteenth century evolutionary theories the second in the 1920s and 30s in the years after the cultural catastrophe of World War I and the third arrived with the recent grand claims of sociobiology to offer a sound biological basis for a theory of human culture Unlike many who have written on evolutionary ethics Farber considers the responses made by philosophers over the years He maintains that their devastating criticisms have been forgotten thus the history of evolutionary ethics is essentially one of oft repeated philosophical mistakes Historians scientists social scientists and anyone concerned about the elusive basis of selflessness altruism and morality will welcome Farber's enlightening book

The Transformation of Theology, 1830-1890 Charles D. Cashdollar, 2014-07-14 Charles Cashdollar reinterprets nineteenth century British and American Protestant thought by identifying positivism as the central intellectual issue of the era Positivism meant at first the ideas of the French thinker Auguste Comte later in the century the term indicated a more general opposition to supernatural religion Cashdollar shows that contemporary thinkers recognized positivism at each of these stages as the most fundamental of the proliferating challenges to religious belief He further reveals how the encounter with positivism altered Protestant orthodoxy in both subtle and radical ways Positivists denied that humans could know anything other than physical phenomena Declaring many orthodox beliefs archaic they proposed a new ethically based vision of service to humanity After portraying the dissemination of these positions among British and American Protestants the author explains how each of several groups reacted A few theologians rejected positivism outright but many more responded by recasting their own beliefs The implications of this story of change extend to such topics as

Darwinism Biblical criticism the rise of the social sciences theological liberalism and the Social Gospel the beginnings of fundamentalism and the twentieth century debate about creationism and science Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Writings of John Fiske ...: The unseen world and other essays John Fiske, 1902 **Vying for Truth - Theology and the Natural Sciences** Hans Schwarz, 2014-06-18 The emancipation of the natural sciences from religion was a gradual affair during the last four centuries Initially many of the leading scientists were churchmen indicating a symbiosis between faith and reason Due to the increasing specialization in the sciences this close connection came to an end often leading to antagonism and mutual suspicion This book traces this historical development with its twists and turns in both Europe and North America It depicts the major players in this story and outlines their specific contributions The main focus is on the 19th and 20th centuries with figures such as Darwin and Hodge but also Beecher and Abbott in the 19th century In the 20th century the narrative starts with Karl Barth and moves all the way to Hawking and Tipler Special attention is given to representatives from North America Great Britain and Germany In conclusion important issues are presented in the present day dialogue between theology and the natural sciences The issue of design and fine tuning is picked up and advances in brain research Finally technological issues are assessed and the status of medicine as a helpmate for life is discussed An informative and thought provoking book

Dictionary of Modern American Philosophers John R. Shook, 2005-01-01 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought

The Real Metaphysical Club Frank X. Ryan, Brian E. Butler, James A. Good, 2019-05-01 The Metaphysical Club a gathering of intellectuals in the 1870s is widely recognized as the crucible where pragmatism America's distinctively original philosophy was refined and proclaimed Louis Menand's bestseller about the group was a dramatic publishing

success However only three actual members Oliver Wendell Holmes Jr Charles S Peirce and William James appear in the book alongside other thinkers who were never in the Club The Real Metaphysical Club tells the full story of how this influential group shifted the course of philosophy in America In addition to pioneering pragmatism the group explored radical empiricism and idealism and formulated personalism and process philosophy equally important developments This volume contains the important writings dating from 1870 to 1885 by the real members of the Metaphysical Club The first section centers on pragmatism and science the second part collects writings of the lawyers and the third part covers idealist and personalist philosophers Many of these writings have never been reprinted before and nothing like this impressive collection has ever been attempted A general introduction provides a narrative history and the editors three introductions to the volume s sections vividly bring to life the intense meetings sustained debates and pioneering thought of the Metaphysical Club

Theology in America Sydney E. Ahlstrom, 2003-01-01 Covering nearly 300 years of American religious writing this anthology compiles selections from thirteen notable thinkers including Thomas Hooker Jonathan Edwards Charles Hodge Ralph Waldo Emerson Josiah Royce William James and H Richard Niebuhr to reveal the vital and creative history of Protestant theology in America In his substantial Introduction Sydney Ahlstrom relates the history of American theology in broad and accessible terms tackling his subject with characteristic clarity passion and intellectual rectitude

Theism and the Christian Faith Charles Carroll Everett, 1909

Theology in a Global Context Hans Schwarz, 2005-11 In this book Hans Schwarz leads us into the web of Christian theology s recent past from Kant and Schleiermacher to Mbiti and Zizoulas pointing out all the theologians of the last two hundred years who have had a major impact beyond their own context With an eye to the blending of theology and biography Schwarz draws the lines of connection between theologians their history and wider theological movements Publisher

Robinson Jeffers and the American Sublime Robert Zaller, 2012-01-25 Robinson Jeffers and the American Sublime is the most comprehensive and most substantial critical work ever devoted to the major American poet Robinson Jeffers 1887 1962 Jeffers the best known poet of California and the American West particularly valorized the Big Sur region making it his own as Frost did New England and Faulkner Mississippi and connecting it to the wider tradition of the American sublime in Emerson Thoreau and John Muir The book also links Jeffers to a Puritan sublime in early American verse and explores his response to the Darwinian and Freudian revolutions and his engagement with modern astronomy This discussion leads to a broad consideration of Jeffers focus on the figure of Christ as emblematic of the human aspiration toward God a God whom Jeffers defines not in Christian terms but in those of an older materialist pantheism and of modern science The later sections of the book develop a conspectus of the democratic sublime that addresses American exceptionalism through the prism of Jeffers Jeffersonian ethos A final chapter places Jeffers poetic thought in the larger cosmological perspective he sought in his late works
