The Reluctant Metropolis William Fulton, 2001-12-04 A Los Angeles Times Bestseller William Fulton is the Raymond Chandler of Los Angeles real estate Kevin Starr California State Librarian and author of *Material Dreams Los Angeles* through the 1920s A Los Angeles Times Bestseller William Fulton is the Raymond Chandler of Los Angeles real estate Kevin Starr California State Librarian and author of *Material Dreams Los Angeles* through the 1920s In twelve engaging essays William Fulton chronicles the history of urban planning in the Los Angeles metropolitan area tracing the legacy of short sighted political and financial gains that has resulted in a vast urban region on the brink of disaster Looking at such diverse topics as shady real estate speculations the construction of the Los Angeles subway the battle over the future of South Central L A after the 1992 riots and the emergence of Las Vegas as the new Los Angeles Fulton offers a fresh perspective on the city s epic sprawl The only way to reverse the historical trends that have made Los Angeles increasingly unliveable Fulton concludes is to confront the prevailing cocoon citizenship the mind set that prevents the city s inhabitants and leaders from recognizing Los Angeles s patchwork of communities as a single metropolis

Power Moves Kyle Shelton, 2018-01-10 Since World War II Houston has become a burgeoning internationally connected metropolis and a sprawling car dependent city In 1950 it possessed only one highway the Gulf Freeway which ran between Houston and Galveston Today Houston and Harris County have more than 1 200 miles of highways and a third major loop is under construction nearly thirty miles out from the historic core Highways have driven every aspect of Houston s postwar development from the physical layout of the city to the political process that has transformed both the transportation network and the balance of power between governing elites and ordinary citizens *Power Moves* examines debates around the planning construction and use of highway and public transportation systems in Houston Kyle Shelton shows how Houstonians helped shape the city s growth by attending city council meetings writing letters to the highway commission and protesting the destruction of homes to make way for freeways which happened in both affluent and low income neighborhoods He demonstrates that these assertions of what he terms infrastructural citizenship opened up the transportation decision making process to meaningful input from the public and gave many previously marginalized citizens a more powerful voice in civic affairs *Power Moves* also reveals the long lasting results of choosing highway and auto based infrastructure over other transit options and the resulting challenges that Houstonians currently face as they grapple with how best to move forward from the consequences and opportunities created by past choices

Bird versus Bulldozer Audrey Mayer, 2021-03-09 An examination of the struggle to conserve biodiversity in urban regions told through the story of the threatened coastal California gnatcatcher The story of the rare coastal California gnatcatcher is a parable for understanding the larger ongoing struggle to conserve biodiversity in regions confronted with intensifying urban development Because this gnatcatcher depends on vanishing coastal sage scrub in Southern California it has been regarded as a flagship species for biodiversity protection since the early 1990s But the

uncertainty of the gnatcatcher's taxonomic classification and whether it can be counted as a listable unit under the Endangered Species Act has provoked contentious debate among activists, scientists, urban developers and policy makers. Synthesizing insights from ecology, environmental history, public policy analysis and urban planning as she tracks these debates over the course of the past twenty five years, Audrey L. Mayer presents an ultimately optimistic take on the importance of much neglected regional conservation planning strategies to create sustainable urban landscapes that benefit humans and wildlife alike.

The City Reader Richard T. LeGates, Frederic Stout, 2003 This third edition juxtaposes the very best publications on the city. It reflects the latest thinking on globalization, information technology and urban theory. It is a comprehensive mapping of the terrain of urban studies, old and new.

The City Joel Kotkin, 2007-12-18 If humankind can be said to have a single greatest creation, it would be those places that represent the most eloquent expression of our species's ingenuity, beliefs and ideals: the city. In this authoritative and engagingly written account, the acclaimed urbanist and bestselling author examines the evolution of urban life over the millennia and, in doing so, attempts to answer the age-old question: What makes a city great? Despite their infinite variety, all cities essentially serve three purposes: spiritual, political and economic. Kotkin follows the progression of the city from the early religious centers of Mesopotamia, the Indus Valley and China to the imperial centers of the Classical era, through the rise of the Islamic city and the European commercial capitals, ending with today's post-industrial suburban metropolis. Despite widespread optimistic claims that cities are back in style, Kotkin warns that whatever their form, cities can thrive only if they remain sacred, safe and busy, and this is true for both the increasingly urbanized developing world and the often self-possessed global cities of the West and East Asia. Looking at cities in the twenty-first century, Kotkin discusses the effects of developments such as shifting demographics and emerging technologies. He also considers the effects of terrorism, how the religious and cultural struggles of the present pose the greatest challenge to the urban future. Truly global in scope, *The City* is a timely narrative that will place Kotkin in the company of Lewis Mumford, Jane Jacobs and other preeminent urban scholars.

Shaping the City Rodolphe El-Khoury, Edwards Robbins, 2015-06-23 Taking on the key issues in urban design, *Shaping the City* examines the critical ideas that have driven these themes and debates through a study of particular cities at important periods in their development. As well as retaining crucial discussions about cities such as Los Angeles, Atlanta, Chicago, Detroit, Philadelphia and Brasilia at particular moments in their history that exemplified the problems and themes at hand, like the mega-city, the post-colonial city and New Urbanism, in this new edition the editors have introduced new case studies critical to any study of contemporary urbanism: China, Dubai, Tijuana and the wider issues of informal cities in the Global South. The book serves as both a textbook for classes in urban design, planning and theory and is also attractive to the increasing interest in urbanism by scholars in other fields. *Shaping the City* provides an essential overview of the range and variety of urbanisms and urban issues that are critical to an understanding of contemporary urbanism.
