Remarkable Baobab:

The Remarkable Baobab Thomas Pakenham, 2004 Acclaimed historian Thomas Pakenham who has dramatized in photographs and words the sheer majesty of trees throughout the world now trains his lens on the most mysterious of trees the baobab with spectacular results His search for the world's most striking baobabs has led him over the last eight years on a trail from sub-Saharan Africa to Madagascar and Australia the Caribbean and the United States Here in *The Remarkable Baobab* Pakenham records his personal encounters with these mysterious giants tracing their mythologies their natural grandeur and their origins as well as their chances of survival in an uncertain environment As Pakenham notes the baobab may indeed be one of the oldest life forms on the planet and many of the specimens still standing today have been alive for well over a thousand years Standing tall on the savannahs of Africa and the sunburned plains of Australia they are tremendous in size and have provided food medicine and places of refuge and worship to many even serving as prisons tombs and ossuaries on occasion Over the last one thousand years they have gained mythical status among many peoples due in no small part to their appearance without leaves the branches of the trees look like roots growing into the sky *The Remarkable Baobab* also includes a special section devoted to two famous baobabs in North America one which is now over twenty feet in girth and is planted on a private Florida estate the other a breathtaking specimen on the campus of the University of Arizona that was brought to the United States by smugglers These stories are but two examples provided by Thomas Pakenham in *The Remarkable Baobab* a book that is as visually bewitching as the baobab itself Book jacket

Baobab John Rashford, 2023-06-28 Modern humans descendants of a founding population that separated from chimpanzees some five to eight million years ago are today the only living representative of a branching group of African apes called hominins Because of its extraordinary size and shape the baobab *Adansonia digitata* L has long been identified as the most striking tree of Africa's mosaic savanna the landscape generally regarded as the environment of hominin evolution This book makes the case for identifying the baobab as the tree of life in the hunter gatherer adaptation

that was the economic foundation of hominin evolution The argument is based on the significance of the baobab as a resource rich environment for the Hadza of northeastern Tanzania who continue to be successful hunter gatherers of the African savanna

Baobab Drought Survival Raina Mooncrest,AI,2025-03-03 *Baobab Drought Survival* unveils the secrets behind the baobab tree s remarkable ability to thrive in the arid African savanna This book explores the unique structural and physiological adaptations that allow these trees to endure prolonged drought highlighting their crucial role in savanna ecosystems One intriguing fact is the baobab s capacity to store vast quantities of water within its trunk sometimes exceeding 30 000 gallons enabling it to survive years of drought Another key insight is how the baobab supports a diverse range of species during dry spells acting as a keystone of its environment The book presents a detailed botanical analysis of the baobab from its evolutionary history to its ecological significance It investigates the physiological mechanisms that facilitate water storage examines interactions with other plants and animals and assesses the implications of the baobab s survival strategies for broader applications in agriculture and biodiversity conservation Using anatomical studies physiological experiments and climate data the book demonstrates the baobab s resilience and offers valuable lessons for understanding plant biology and climate change adaptation The narrative progresses from introducing the baobab to exploring its water retention capabilities and its role in the savanna ecosystem Ultimately *Baobab Drought Survival* emphasizes the importance of understanding and preserving drought tolerant species providing a model of resilience for a world facing increasing water scarcity and desertification This exploration offers new insights into plant resilience and its implications for a changing world

Elderflora Jared Farmer, 2022-10-18 The epic story of the planet's oldest trees and the making of the modern world Humans have always revered long lived trees But as historian Jared Farmer reveals in Elderflora our veneration took a modern turn in the eighteenth century when naturalists embarked on a quest to locate and precisely date the oldest living things on earth The new science of tree time prompted travelers to visit ancient specimens and conservationists to protect sacred groves Exploitation accompanied sanctification as old growth forests succumbed to imperial expansion and the industrial revolution Taking us from Lebanon to New Zealand to California Farmer surveys the complex history of the world's oldest trees including voices of Indigenous peoples religious figures and contemporary scientists who study elderflora in crisis In a changing climate a long future is still possible Farmer shows but only if we give care to young things that might grow old Winner of the 2023 Jacques Barzun Prize in Cultural History

Paper Graveyards Eduardo Cadava, 2021-10-26 A generously illustrated training manual for reading images discussing work by Félix Nadar Roland Barthes Fazal Sheikh Susan Meiselas and others Paper Graveyards is neither a work of traditional art history nor one of literary criticism It is not strictly a history of ideas either notwithstanding its very obvious erudition Rather in drawing upon all of these methods and approaches and with extraordinary attention to language and style Cadava's writing examines the spectacular explosion of images during the last twenty years as a prompt to discuss not simply specific images but the role and place of these images in our everyday life

Considering work by Flix Nadar Roland Barthes Leon Golub Nancy Spero Fazal Sheikh Susan Meiselas and others Cadava delineates different modes of reading that taking their point of departure from the conviction that the past the present and the future are always bound together provide us with a training manual of sorts for understanding visual material in the twenty first century In the process these generously illustrated essays actively expand our sense of literacy by reconstructing the networks of relations that inhabit the plural worlds of images and create a critical genealogy of what we still call an image even when with every day that passes we perhaps understand less and less what this might mean **Africa in 54 Words** Baljinder Sharma,2024-10-28 Through this carefully chosen list of 54 words the author presents a sociocultural portrait of Africa He describes the inherent values of its people and explores the moral principles underlying their behaviour The many places objects and themes he describes are uniquely African and yet universal in appeal **The Tree** Colin Tudge,2006-10-03 A blend of history science philosophy and environmentalism The Tree is an engaging and elegant look at the life of the tree and what modern research tells us about their future There are redwoods in California that were ancient by the time Columbus first landed and pines still alive that germinated around the time humans invented writing There are Douglas firs as tall as skyscrapers and a banyan tree in Calcutta as big as a football field From the tallest to the smallest trees inspire wonder in all of us and in The Tree Colin Tudge travels around the world throughout the United States the Costa Rican rain forest Panama and Brazil India New Zealand China and most of Europe bringing to life stories and facts about the trees around us how they grow old how they eat and reproduce how they talk to one another and they do and why they came to exist in the first place He considers the pitfalls of being tall the things that trees produce from nuts and rubber to wood and even the complicated debt that we as humans owe them Tudge takes us to the Amazon in flood when the water is deep enough to submerge the forest entirely and fish feed on fruit while river dolphins race through the canopy He explains the memory of a tree how those that have been shaken by wind grow thicker and sturdier while those attacked by pests grow smaller leaves the following year and reveals how it is that the same trees found in the United States are also native to China but not Europe From tiny saplings to centuries old redwoods and desert palms from the backyards of the American heartland to the rain forests of the Amazon and the bamboo forests Colin Tudge takes the reader on a journey through history and illuminates our ever present but often ignored companions **Travels in Africa** Sylvain Meinrad Xavier de Golbéry,1803 **Travels in Africa, Performed by Silvester Meinrad Xavier Golberry, in the Western Parts of that Vast Continent** Sylvain Meinrad Xavier de Golbéry,1808 *Transactions of the Pharmaceutical Meetings* ,1879 A Manual of Botany: including the structure, functions, classification, properties, and uses of plants, etc Robert Bentley,1861
