Remedies Under Security Interests:

Security Interests under the Cape Town Convention on International Interests in Mobile Equipment Sanam Saidova, 2018-06-28 This book provides an extensive analytical examination of the Cape Town Convention and its Protocols. The Convention aims to facilitate asset based financing and leasing of aircraft, railway and space objects by establishing a uniform legal regime for the creation and protection of security and related interests in these types of equipment. The book provides a detailed treatment of issues arising from the creation of security and other international interests under the Convention from the need to ensure their priority among competing interests to the enforcement of remedies in the case of the debtor's default or insolvency. Security interests in aircraft, railway and space objects are among the most frequently invoked mechanisms used to ensure repayment of the debt. It is their significance, effectiveness and frequency of use that explains this work's focus and scope. Comparative Law of Security Interests and Title Finance Philip R. Wood, 2007 W

This instrument aims to ensure non-discrimination, competition and transparency in the security sectors. Part one provides a critical analysis of the economical, historical, political, military, strategic and legal contexts of the new EU Defence and Security Procurement Directive. Part two covers the main aspects of the Directive: its scope, procedures, security of supply and information, offsets and subcontracting and finally its review and remedies system. This book is an essential overview of a legislative milestone in the field.

Secured Transactions Law Reform in Africa Marek Dubovec, Louise Gullifer, 2019-10-31 Over the last few decades many countries have reformed their secured transactions law. One of the main reasons has been the clear link between reform and the availability of credit and the drive to improve access to finance, particularly for micro, small and medium sized enterprises. This book focuses particularly on developing economies in Africa which have legal frameworks influenced by English, French, Belgian, Roman Dutch and other laws. Reform in this area of law across African countries has taken a number of forms which are explored and discussed in this book. *Secured Transactions Law Reform in Africa* is a mixture of a critical description of the pre-reform law and practice and the reform process itself. It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms. The book sets out a road map for the future of secured transactions.

Security Rights in Intellectual Property Eva-Maria Kieninger, 2020-06-11 This book discusses the main legal and economic challenges to the creation and enforcement of security rights in intellectual property and explores possible avenues of reform such as more specific rules for security in IP rights and better coordination between intellectual property law and secured transactions law In the context of business financing intellectual property rights are still only reluctantly used as collateral and on a small scale If they are used at all it is mostly done in the form of a floating charge or some other all asset security right The only sector in which security rights in intellectual property play a major role at least in some jurisdictions is the financing of movies On the other hand it is virtually undisputed that security rights in intellectual property could be economically valuable or even crucial for small and medium sized enterprises especially for start ups which are often very innovative and creative but have limited access to corporate financing and must rely on capital markets securitization capital market Therefore they need to secure bank loans yet lack their own traditional collateral such as land

The Law of Security and Title-Based Financing Hugh Beale, Michael Bridge, Louise Gullifer, Eva Lomnicka, 2012-03-22 Personal property security is an important subject in commercial practice as it is the key to much of the law of banking and sale This second edition has been fully updated and expanded to cover all important issues and changes within this highly complex area of law It explains traditional methods of

securing debts such as mortgages charges and pledges on property other than land describing how these are created how they must be registered or otherwise perfected if they are to be valid the rights and duties of the parties and how the security is enforced if the debt is not paid The new edition includes an expanded section on priorities in which it explains how priority disputes between competing interests over the same property are resolved In addition the book covers the law governing other transactions that perform a similar economic function such as finance leases retention of title clauses and sales of a company s book debts These are not currently treated by the law as security and are therefore subject to different rules on perfection priority and enforcement There is much expansion of the discussion relating to enforcement including the issue of right of use following Lehman more analysis on administration and all forms of non possessory security and quasi security and a new chapter on enforcement of security addressing the right of appropriation under FC FCAR and the Cukurova case The conflict of laws section includes developments under the Rome I Regulation affecting assignment issues the UNIDROIT Convention 2009 in relation to tiered holdings and the Cape Town Convention s extensions made to coverage of asset backed security over equipment It also addresses the changes brought about by the abolition of Slavenburg registration This edition contains relevant points from the Banking Act 2009 concerning its impact on security such as the power to protect certain interests on a transfer of property and also considers amendments regarding liquidators expenses under the Insolvency Rules The authors additionally deal with the role of step in rights and why they are part of the statutory definition of project finance in the Enterprise Act Previously published as *The Law of Personal Property Security* this new edition brings together all of the law on this complex area providing guidance in the context of commercial practice especially with increased coverage of conflict of laws priority insolvency and enforcement Secured Transactions Law in Asia Louise Gullifer, Dora

Neo, 2021-03-25 This collection of essays offers a unique insight and overview of the secured transactions law in many of the most important countries in Asia as well as reflections on the need for benefits of and challenges for reform in this area of the law The book provides a mixture of general reflections on the history successes and challenges of secured transaction law reform and critical discussion of the law in a number of Asian countries In some of the countries the law has already been reformed or reform is under way and here the reforms are considered critically with recommendations for future work In other countries the law is not yet reformed and the existing law is analysed so as to determine what reform is desirable and whether it is likely to take place First this book will enable those engaging with the law in Asia to understand better the contours of the law in both civil and common law jurisdictions Second it provides analytical insights into why secured transactions law reform happens or does not happen the different methods by which reform takes place the benefits of reform and the difficulties that need to be overcome for successful reform Third it discusses the need for reform where none has yet taken place and critically assesses the reforms which have already been enacted or are being considered In addition to providing a forum for discussion in relation to the countries in question this book is also a timely contribution to the wider

debate on secured transactions law reform which is taking place around the world *Proprietary Remedies in Context* Craig Rotherham, 2002-04-23 There is a tension in English law between the idea that the courts might provide a remedy by creating new property rights and the understanding that the judiciary's role is limited to the protection of existing proprietary interests with the power to redistribute property residing in the legislature alone While there are numerous instances in which the courts intervene to readjust property rights these are disguised in metaphor and fiction However this has meant that the law in this area has developed without open consideration of justifications for redistributing property The result of this is that there is little coherence in the law of proprietary remedies as a whole and a good deal of it is indefensible The book examines redistributive processes such as tracing subrogation and proprietary estoppel and the use of the constructive trust in the context of contracts to assign property vitiated transactions the profits of wrongdoing and the breakdown of intimate relationships It contrasts the English treatment of this area of law with developments in other common law jurisdictions where a more dynamic understanding of property has permitted more open acknowledgement of the judicial role in redistributing proprietary rights
