of purpose maybe of pride In the company of the arch young poet Michael Asher revisits the streets and tenements of the Lower East Side where he spent his childhood though little remains of the past Michael introduces Asher to Aurora perhaps his girlfriend who to Asher's surprise seems bent on pursuing him too Soon the older man and his edgy young companions are caught up in a slow strange almost ritualized dance of deceit and desire The End of Me a successor to Hayes s In Love and My Face for the World to See can be seen as the final panel of a triptych in which Alfred Hayes anatomizes with a cool precision and laconic lyricism that are all his own the failure of modern love The last scene is the starkest of all Challenge David Haywood Young, Mind bending SF Fantasy with a bit of grit Ranging from hard science fiction to supernatural paranormal fantasy to a gritty YA crime story from wildly optimistic to goofy to downright pessimistic these thirteen tales were published at the rate of one per week as a self challenge by the author This is the second collection of David Haywood Young's stories He also has four novels available The Secret a near future post apocalyptic supernatural thriller was published in September 2015 The Mind and Its Education by George Herbert Betts George Herbert Betts, 2025-03-22 The Mind and Its Education by George Herbert Betts is a seminal work that explores the intricate relationship between human psychology and educational practices First published in the early 20th century this text delves into the cognitive processes involved in learning and offers insights that remain remarkably relevant to contemporary educational theory and practice Betts an influential psychologist and educator presents a comprehensive examination of how mental development impacts learning and the implications this has for teaching methodologies In this enlightening volume Betts emphasizes the critical understanding of the mind as the foundation for effective education He advocates for an individualized approach to teaching recognizing that each learner has unique cognitive capabilities interests and learning styles This emphasis on personalization is one of Betts's central themes and he argues that educators must strive to understand the psychological makeup of their students to facilitate optimal learning environments By incorporating principles of psychology into educational theory Betts sets forth a new paradigm that prioritizes the mental and emotional needs of students The book is structured to address various dimensions of human cognition and development beginning with an exploration of intelligence and its components Betts defines intelligence not merely as raw cognitive ability but as a multifaceted construct that includes creativity emotional intelligence and practical problem solving skills He discusses the importance of encouraging a broad and inclusive definition of intelligence in educational settings suggesting that traditional metrics of assessment often overlook essential aspects of students potential Betts further delves into the processes of memory and perception underscoring how these functions influence learning He explains the significance of memory in retaining information and the various techniques that can enhance mnemonic abilities Through engaging examples he illustrates how educators can implement strategies that promote deeper learning and retention of knowledge The exploration of perception is equally vital Betts highlights how individuals interpret and make sense of their experiences suggesting that

successful education must consider the subjective nature of perception and its impact on learning outcomes A noteworthy aspect of Betts's work is his attention to the stages of development proposed by psychological theorists of his time including insights from figures such as Jean Piaget Betts aligns his educational philosophy with developmental milestones advocating for age appropriate teaching strategies that resonate with the cognitive abilities of learners at various stages This alignment ensures that education is not only relevant but also effective in meeting the developmental needs of children and adolescents In addition to theoretical discussions Betts presents practical applications for educators offering methods to create engaging and effective learning experiences. One of the key recommendations in the book is the integration of experiential learning opportunities He suggests that students retain information more effectively when they actively engage with the material through hands on experiences and real world applications This emphasis on experiential learning aligns with modern pedagogical trends that advocate for active student participation and inquiry based approaches Moreover Betts discusses the vital role of motivation and emotion in the learning process He argues that students emotional states profoundly affect their capacity to learn and retain information By fostering a supportive and emotionally nurturing educational environment teachers can enhance student motivation and encourage a sense of agency in their learning This attention to the emotional dimensions of education speaks to the holistic approach that Betts champions throughout the text Another important dimension of the book is its discourse on social influences on learning Betts acknowledges that education does not occur in isolation rather it is profoundly shaped by social contexts cultural backgrounds and peer interactions He calls for educators to consider the diverse backgrounds of their students and to create inclusive classroom environments that respect and value differences This guest for inclusivity ensures that all students are given equal opportunities to succeed and thrive academically In conclusion The Mind and Its Education by George Herbert Betts is a thought provoking exploration of the intersection between psychology and pedagogy The work remains a vital reference for educators psychologists and policymakers looking to enhance educational practices through an understanding of cognitive development and the human mind By highlighting the importance of individualized instruction emotional well being experiential learning and social context Betts s insights lay the groundwork for an enduring legacy in educational thought This book not only serves as a guide for effective teaching strategies but also encourages a philosophical reflection on the purpose of education itself making it an essential read for anyone interested in the field of education **Alien: Prototype** Tim Waggoner, 2019-10-29 When an industrial spy steals a Xenomorph egg former Colonial Marine Zula Hendricks must prevent an alien from killing everyone on an isolated colony planet Venture a direct rival to the Weyland Yutani corporation will accept any risk to crush the competition Thus when a corporate spy acquires a bizarre leathery egg from a hijacked vessel she takes it directly to the Venture testing facility on Jericho 3 Though unaware of the danger it poses the scientists there recognize their prize s immeasurable value Early tests reveal little however and they come to an inevitable conclusion They need a human test
