Reading the

Enemy's Mind Paul H. Smith, 2005-12-27 An up close and personal look behind the scenes of the government's psychic spy program as only an insider can. A must read. Harold E. Puthoff PhD, founder and former director of the CIA initiated Remote Viewing Program. From behind the cloak of US military secrecy comes the story of Star Gate, the project that for nearly a quarter of a century trained soldiers and civilian spies in extra sensory perception (ESP). Their objective: To search out the secrets of America's cold war enemies using a skill called remote viewing. Paul H. Smith, a US Army Major, was one of these viewers. With the Star Gate secrets declassified and the program mothballed by the Central Intelligence Agency, the story can now be told of the ordinary soldiers drafted onto the battlefield of human consciousness. Using hundreds of interviews with the key players in the Star Gate program and gathering thousands of pages of documents, Smith reveals many secrets about how remote viewing works and how it was used against enemy targets. Among these stories are the search for hostages in Lebanon, spying on Soviet directed energy weapons, investigating the bombing of Pan Am Flight 103 over Lockerbie, Scotland, tracking foreign testing of weapons of mass destruction, combating narco trafficking off America's coasts, aiding in the Iranian hostage situation, finding KGB moles in the CIA, pursuing Middle East terrorists, and more. This is a story for the believer and the skeptic, a rare look at the innards of a top secret program and an eye opening treatise on the power of the human mind to transcend the limitations of space and time.

Remote Viewing Tim Rifat, 2001 Remote viewing is the ability to travel out of one's body to remote locations. The author reveals how remote viewing has been used in psychic warfare for over 50 years and how the world's superpowers have used it to spy on each other and us. At the height of the Cold War, both the Soviet Union and the United States developed a new and terrible form of warfare called psychotronics. This school of espionage included ESP and psychic spying, used to read enemies' minds for psychic interrogation as well as telepathic hypnosis, the ability to hypnotize from a distance, and even remote killing. The book not only charts the history of psychotronics but also reveals specific incidents in which it has been used.

Miracles of Mind Russell Targ, Jane Katra, PhD, 2010-10-04 The authors begin with compelling evidence of psychic abilities gathered in Targ's remote viewing experiments for the Stanford Research Institute. Targ reveals how the experiments were conducted and how subjects were able to describe remote locations with precise detail. Targ also presents the results of recently declassified covertly funded CIA experiments in remote spying during the Cold War, published here for the first time. After surveying the scientific evidence of the mind's nonlocal powers, Targ and Katra apply this evidence to the field of healing. Incorporating ancient Eastern teachings and modern scientific evidence published in the most prestigious scientific journals, Targ and Katra explain the process of spiritual healing, which they describe as a quieting of the mind to open it to the community of spirit. The book stays with you long after you put it down. It can change the way you view the world and yourself.
