Renaissance And Mannerism In Northern Europe And Spain:

Paintings Metropolitan Museum of Art. Robert Lehman Collection,1998 **The Renaissance and Mannerism in Italy** Alastair Smart,1971 Professor Smart in this cogent and sensitive new study has found that in order to represent Renaissance art faithfully he has had to emphasize its religious inspiration and the tragic tone of many of its masterpieces He shows how the unique fusion of Christian and pagan culture which took place in Florence in the early fifteenth century was received and transformed by the later Quattrocento throughout Italy leading to the climax of Papal Rome under Julius II to the still controversial change of mood called Mannerism and to the final flowering in sixteenth century Venice Each artist is clearly characterized and related to the forces spiritual and social that molded his imagination It is a rounded and satisfying picture offering at the same time a complete account of an artistic movement and a series of fresh insights which will enrich the reader s experience of art The Moon and the Western Imagination Scott L. Montgomery,2022-03-29 The Moon is at once

a face with a thousand expressions and the archetypal planet Throughout history it has been gazed upon by people of every culture in every walk of life From early perceptions of the Moon as an abode of divine forces humanity has in turn accepted the mathematized Moon of the Greeks the naturalistic lunar portrait of Jan van Eyck and the telescopic view of Galileo Scott Montgomery has produced a richly detailed analysis of how the Moon has been visualized in Western culture through the ages revealing the faces it has presented to philosophers writers artists and scientists for nearly three millennia To do this he has drawn on a wide array of sources that illustrate mankind s changing concept of the nature and significance of heavenly bodies from classical antiquity to the dawn of modern science Montgomery especially focuses on the seventeenth century when the Moon was first mapped and its features named From literary explorations such as Francis Godwin s Man in the Moone and Cyrano de Bergerac s L autre monde to Michael Van Langren s textual lunar map and Giambattista Riccioli s Almagestum novum he shows how Renaissance man was moved by the lunar orb how he battled to claim its surface and how

he in turn elevated the Moon to a new level in human awareness The effect on human imagination has been cumulative our idea of the Moon and therefore the planets is multilayered and complex having been enriched by associations played out in increasingly complicated harmonies over time We have shifted the way we think about the lunar face from a perfect body to an earthlike one with corresponding changes in verbal and visual expression Ultimately Montgomery suggests our concept of the Moon has never wandered too far from the world we know best the Earth itself And when we finally establish lunar bases and take up some form of residence on the Moon s surface we will not be conquering a New World fresh and mostly unknown but a much older one ripe with history
