he revival of the bronze statuette popular in classical antiquity stands out as an enduring achievement of the Italian Renaissance. These small sculptures attest to early modern artists' technical prowess, ingenuity, and desire to emulate or even surpass the ancients. From the studioli or private studies of humanist scholars in fifteenth-century Padua to the Fifth Avenue apartments of Gilded Age collectors, viewers have delighted in the mysteries of these objects: how they were made, what they depicted, who made them, and when. This catalogue is the first systematic study of The Metropolitan Museum of Art's European Sculpture and Decorative Arts collection of Italian bronzes. The collection includes statuettes of single mythological or religious figures, complex figural groups, portrait busts, reliefs, utilitarian objects like lamps and inkwells, and more. Stunning new photography of celebrated masterpieces by leading artists such as Antico, Riccio, and Giambologna, enigmatic bronzes that continue to perplex, quotidian objects, later casts, replicas, and even forgeries show the importance of each work in this complex field. International scholars provide in-depth discussions of 200 objects included in this volume, revealing new attributions and dating for many bronzes. An Appendix presents some 100 more, complete with provenance and references. An essay by Jeffrey Fraiman provides further insight into Italian bronze statuettes in America, with a focus on the history of The Met's collection. And Richard E. Stone, who pioneered the technical study of bronzes, contributes an indispensable text on how artists created these works and what their process conveys about the object's maker. A personal reminiscence by James David Draper, who oversaw the Italian sculpture collection for decades, rounds out this landmark catalogue that synthesizes decades of research on these beloved and complex works of art.

**Nuremberg, a Renaissance City, 1500-1618** Jeffrey Chipps Smith, 2014-12-15

This illustrated study of Renaissance Nuremberg explores the city's social and artistic history through the sixteenth century and beyond. The German city of Nuremberg reached the height of its artistic brilliance during the Renaissance, becoming one of the foremost cultural centers in all of Europe by 1500. Nuremberg was the home of painter Albrecht Dürer, whose creative genius inspired generations of German artists. However, Dürer was only one of a host of extraordinary painters, printmakers, sculptors, and goldsmiths working in the city. Following a map of the city's principal landmarks, Guy Fitch Lytle provides a compact historical background for Jeffrey Chipps Smith's detailed discussions of the city's social and artistic significance. Smith examines the religious function of art before and during the Reformation, the early manifestations of humanism in Nuremberg, and its influence on the art of Dürer and his contemporaries, and the central role of Dürer's pedagogical ideas and his workshop in the dissemination of

Renaissance artistic concepts Finally Smith surveys the principal artists and stylistic trends in Nuremberg from 1500 to the outbreak of the Thirty Years War Nuremberg A Renaissance City 1500 1618 contains biographical sketches of forty five major artists of the period plus more than three hundred illustrations depicting the city and its most magnificent artistic treasures **Renaissance Master Bronzes** Manfred Leithe-Jasper, Kunsthistorisches Museum Wien, 1986 **The Craftsman Revealed** Jane L.
