Nephrology (2nd Edition) Keng Thye Woo, 2002-11-28 This textbook provides a broad review of kidney diseases with regard to symptoms investigation and treatment. It deals with a variety of clinical entities such as glomerulonephritis, renal stones, hypertension, urinary infection, and renal failure. Chapters on dialysis and transplantation highlighting local incidence and statistics are included. The current concepts and therapies of kidney diseases as well as the latest statistics on kidney diseases are also covered. In this edition, the author has incorporated the results of recent clinical trials in renal therapeutics into various chapters of the book and provided abstracts and references where relevant. Presently, there are several books on the market written by authors in the West, but they do not adequately cover the knowledge and experience of the patterns of renal diseases in the Asia Pacific region. 100 Cases in Clinical Medicine, Second Edition John Rees, James Pattison, Gwyn Williams, 2007-01-26 *100 Cases in Clinical Medicine* is an indispensable revision tool for medical students preparing for clinical examinations or OSCEs. Using scenarios which mimic daily life, the cases will interest students in clinical problems and help them develop their clinical reasoning skills. With each case presenting details of a patient's medical history and the key findings of a clinical examination together with initial investigation results for evaluation, key questions then prompt the student to evaluate the patient and reach a decision regarding their condition and the possible management plan, while the answer pages will help the student to understand the processes that a clinician goes through in dealing with the problems presented. Contents are organised to provide a quick review of each body system with a selection of cases relevant to that specific system; then the majority are presented randomly to mimic real life in a GP surgery or emergency department. New to this edition is a review of each body system as well as random cases, new page design with a second colour used throughout, and brought up to date with 25% new cases. **The Renal Biopsy** Liliane J.
