Renewable Advantage Crafting Strategy Through Economic Time:

Renewable Advantage Jeffrey Williams, 2018-09-04 The task of continuously renewing a company is the greatest challenge confronting any chief executive To enable managers to project renewal strategies likely to win in the future Jeffrey Williams has constructed a dynamic road map of outcomes in what he calls economic time based on a ten year study of growth decline and renewal patterns of hundreds of companies in forty five industries In this superbly readable book Williams s revolutionary award winning concept of slow standard and fast cycle economic time provides a unifying business language that the multicycle manager can use to compare the renewal opportunities of widely diverse products companies and markets Using examples and studies from companies such as Starbucks McDonald s UPS Compaq Sony Merck Disney Toyota IKEA Microsoft Sony Intel IBM Johnson Johnson Chrysler and Hewlett Packard Williams explains that the key idea in economic time is being able to manage products and organizations according to the speed and means by which economic value arises decays and is renewed The drivers of economic time are isolating mechanisms a firm s unique capabilities that lie at the heart of its competitive advantage and that in Williams s framework delay product obsolescence Building on his intuitively appealing model Williams describes how his three laws of renewal convergence alignment and renewal provide guidelines by which managers can gain command over strategy in complex dynamic competitive situations Renewable Advantage is not only essential reading but also will become a standard reference for senior and division managers business scientists and strategists and general managers in all industries

Strategic alignment of innovation to business Frances Fortuin, 2023-08-28 This book addresses the crucial question for innovative prospector companies of how to bridge the gap between exploration and exploitation Whereas exploration deals with the search for new ideas and opportunities exploitation is about incrementally moving the performance bar a little bit higher Finding the right balance between exploration and exploitation is essential for the long term survival in today's highly dynamic business environments In a cross industry study of ten large multinational prospector companies which are world leaders in their respective industries it was discovered that the industry clockspeed the length between the subsequent product generations plays an essential role in bridging this gap The product generation life cycle PGLC typically ranged from just several months in short life cycle industries SLCIs such as electronics and the mobile phone industry to more than 10 years in long life cycle industries LLCIs such as aerospace and pharmaceuticals Our data indicate that companies operating in SLCIs face major problems in maintaining the long term knowledge base of their firms whereas companies in LLCIs tend to have problems in aligning their innovation strategy to the short term business needs To investigate the dynamics of strategic alignment in one of the LLCI companies a multinational supplier of industrial components a six year longitudinal study was conducted Here our data indicate that finding a funding structure that effectively balances exploration and exploitation combined with regular structured feedback between the exploration and exploitation function is needed to maintain long term strategic alignment CTOs and innovation managers can use this book by first establishing the industry clockspeeds in their respective industries or product ranges and then benchmark their innovation processes to those of the first class SLCI or LLCI prospector companies included in this book

Cleared for Take-Off Thomas C. Lawton, 2017-03-02 Competition in air transport has been transformed by industry liberalization initiatives resulting in the emergence of a wide array of new airline start ups Restrictions on low fares have been removed uniform control requirements have been established and legislation has facilitated the proliferation of low fare carriers and competition The new breed of independent low fare airlines LFAs use market freedoms to shake up the industry's competitive dynamics and offer the customer the alternative of low prices and basic service A successful low fare business model requires a ruthless and relentless focus on cost cutting and increased operational productivity combined with an ability to generate and maintain a cash surplus and a cautious but steady fleet and route network expansion The mastery of these techniques has made Southwest and Ryanair industry leaders but others such as EasyJet also have a proven record of profitability and market growth despite not always being the lowest cost or price providers In this comprehensive and topical study the author systematically provides a step by step approach to understanding the conditions and choices shaping airline competitiveness and an assessment of the nature of the low fare market a comprehensive study of the low fare airline sector's evolution and

growth and arguments as to why the European low fare industry is here to stay despite the inevitability of a shake out reminiscent of the early 1980s in the USA unique insights into the success of low fare market leaders in Europe North America and Australasia and an examination of the experience of US new entrants in the post deregulations era to discern strategic lessons for their counterparts critical perspectives on strategic management principles and practices in modern airline companies discussing strategies for survival and comparing competitive strategies for the main low fare airlines and their limitations key reasons for the robustness of the low fare business model during industry crises The book also determines the conditions and strategies that shape sustainable advantage for LFAs in highly competitive deregulated markets where established airlines seek to force out new entrants and considerable political interference remains Moreover the book considers why during the airline industry crisis of late 2001 the market capitalizations of low fare leaders held steady in the wake of the US terrorist attacks while the major carriers on both sides of the Atlantic were decimated Cleared for Take Off is essential reading for airline executives aerospace manufacturers regulatory and government transportation agencies researchers or students of aviation management transport studies the travel industry and or corporate strategy

The Making of the Modern Organisation Paul Turner, 2024-11-29 The Fourth Industrial Revolution will transform the global competitive landscape and as such require a radical response from organisations operating in complex knowledge based economies Much like previous phases of economic social and technological changes there is an assumption that existing technologies will become obsolete and alternative sources of value creation must be found These assumptions will create significant opportunities in the next revolutionary cycle but to take advantage of these will require a new business model and organisational constructs In charting the course of structures and dynamics over the first Three Industrial Revolutions this book offers points of learning that can be applied to the Fourth It offers a discussion about how organisations have emerged over time and how they learnt to adapt to industrial revolution and economic upheaval Covering conceptual ideas about organisations as collections of individuals the book will also highlight the practice of organisation from the First to the Fourth Industrial Revolution with examples across Europe the USA and Asia Building on the ideas and concepts in The Making of the Modern Manager this book explores the changing business contexts through industrial revolutions the practice of organisation in response to these changes the theory of organisation and the definition of organisation
