Demko, William Wood, 1994-05-11 Geopolitics at the End of the Twentieth Century Nurit Kliot, David Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs **Holding the Line** Ian Townsend Gault, Heather Nora

Nicol, 2005 This volume contains contributions from twenty four scholars concerning the significance and implications of the world's borderlands in economic political and socio cultural contexts Together these essays explore the changing role of borders in a global world Are borders increasingly irrelevant under conditions of globalization or can a case be made to demonstrate their continuing importance at various levels of spatial activity Situating itself within a growing border literature Holding the Line argues that contemporary borders facilitate parallel processes of globalization and localization of

political activity As such the essays adopt a holistic approach to understanding the impact of boundaries on both society and space They demonstrate that any attempt to create a methodological and conceptual framework for the understanding of boundaries must be concerned with the process of bounding rather than simply the means through which the physical lines of separation are delimited and demarcated This approach renders the notion of a borderless world highly problematic because the latter ignores the important and ongoing relationship between the functional role of borders in the bounding process and the symbolic role of borders as imagined social political and economic constructions embedded within a geographical text The changing characteristics of political boundaries during an era of globalization has become a great focus of interdisciplinary study and this book will appeal to scholars of political geography border studies and international relations

The Black Book Wesley J. Reisser, 2012-03-29 Prior to the end of World War I President Wilson gathered a group of expert geographers historians economists and political scientists The Inquiry to make plans for the coming peace conference The Inquiry produced a secret document the Black Book containing maps and plans for the territorial settlements to be negotiated This secret plan was brought daily by the President into negotiations and much of it came to fruition on the world map This work takes an in depth look at the Black Book and the lasting legacy of American negotiators at the Paris Peace Conference Many of the successes and failures from these peace settlements trace directly back to this remarkable and heretofore almost unstudied plan

Acts of Rebellion Ward Churchill, 2003 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company
