**Repairing the Regime** Joseph Cirincione, 2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company     *Repairing the Regime* Joseph Cirincione, 2014-04-08 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company     Combating Weapons of Mass Destruction Nathan E. Busch, Daniel Joyner, 2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials     *Eliminating Weapons of Mass Destruction* J. Mathiason, B. Andemicael, 2005-04-04 The events of September 11 2001 have altered the course of arms control intended to eliminate weapons of mass destruction WMD and has made the role of international organizations controversial Whether they can effectively verify compliance with the WMD treaty regime has now been questioned by the United States In responding to this basic question *Eliminating Weapons of Mass Destruction* examines how existing organizations apply the main verification tools how they can improve and consolidate them where possible in order to meet the new security challenges more effectively     *International Law and the Proliferation of Weapons of Mass Destruction* Daniel H. Joyner, 2009-03-05 Proliferation of WMD technologies is by no means a new concern for the international community Indeed since the signing of the Nuclear Non proliferation Treaty in 1968 tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of WMD sensitive materials within states as well as their spread through the increasingly globalised channels of international trade to other states and non state actors However the intervention in 2003 by Western powers in Iraq has served as an illustration of the importance of greater understanding of and attention to this area of law as disagreements over its content and application have once again lead to a potentially destabilising armed intervention by members of the United Nations into the sovereign territory of another member state Other ongoing disputes between states regarding the character of obligations assumed under non proliferation treaty instruments and the effect of international organisations decisions in this area form some of the most contentious and

potentially destabilising issues of foreign policy concern for many states This book provides a comprehensive analysis of international law and organisations in the area of WMD proliferation It will serve both as a reference for understanding the law as it currently exists in its political and economic context as well as an analysis of areas in which amendments to existing law and organisations are needed

**Nuclear Nonproliferation** Phillip Margulies,2008 History suggests that the existence of a weapon leads to its eventual use in war as illustrated by the dropping of the atomic bomb on the Japanese cities of Hiroshima and Nagasaki in 1945 At the opening of the atomic age scientists political analysts generals and politicians were haunted by the idea that nuclear wars could not be won both sides would be virtually destroyed The stakes of the game have only continued to rise as the club of nations currently possessing nuclear arms has become less and less exclusive the United States the Soviet Union Russia England France China Israel India Pakistan and North Korea Following a detailed analysis of this timely issue Nuclear Nonproliferation explores the threat of nuclear production and the potential for solutions in four regions of the world the United States South Asia India and Pakistan the Middle East Israel Iraq and Iran and East Asia North Korea

*State Behavior and the Nuclear Nonproliferation Regime* Jeffrey R. Fields,2014 This is the first book length study of why states sometimes ignore oppose or undermine elements of the nuclear nonproliferation regime even as they formally support it These essays show that success must be measured not only by how many states join the effort but also by how they participate once they join

*Non-Proliferation Export Controls* Daniel Joyner,2017-03-02 This volume provides a comprehensive and interdisciplinary examination of the Multilateral Non Proliferation Export Control system and the national and international context within which it functions Key features

*Nuclear Proliferation in Northeast Asia A.* O'Neil,2007-10-01 To what extent does the failing strategy of nonproliferation pose serious challenges for Northeast Asia s security environment Are there alternative strategies for managing nuclear weapons in the region Should the presence of nuclear weapons in Northeast Asia necessarily be seen in exclusively negative terms as many experts believe

**Deadly Arsenals** Joseph Cirincione,Jon B. Wolfsthal,Miriam Rajkumar,2005 Deadly Arsenals provides the most up to date and comprehensive assessment available on global proliferation dangers with a critical assessment of international enforcement efforts An invaluable resource for academics policymakers students and the media this atlas includes strategic and historical analysis maps charts and graphs of the spread of nuclear chemical and biological weapons and missile delivery systems descriptions of the weapons and regimes and policies to control them and data on countries that have want or have given up weapons of mass destruction A Choice outstanding academic title from one of the premier nonproliferation research teams The new edition addresses the recent dramatic developments in Iran Iraq Libya North Korea and the nuclear black market analyzing strategic and policy implications Contents Part 1 Assessments and Weapons Part 2 Declared Nuclear Weapon States Part 3 Non NPT Nuclear Weapon States Part 4 The Two Hard Cases North Korea and Iran Part 5 Proliferation Success

**Nuclear Politics in Asia** Marzieh Kouhi Esfahani,Ariabarzan Mohammadi,2017-09-01 Asia has the world s highest

concentration of nuclear weapons and the most significant recent developments related to nuclear proliferation as well as the world's most critical conflicts and considerable political instability. The containment and prevention of nuclear proliferation especially in Asia continues to be a grave concern for the international community. This book provides a comprehensive overview of the state of nuclear arsenals, nuclear ambitions and nuclear threats across different parts of Asia. It covers the Middle East including Israel, China, India, Pakistan and their confrontation as well as North Korea. It discusses the conventional warfare risks, risks from non-state armed groups and examines the attempts to limit and control nuclear weapons both international initiatives and American diplomacy and interventions. The book concludes by assessing the possibility of nuclear revival, the potential outcomes of international approaches to nuclear disarmament and the efficacy of coercive diplomacy in containing nuclear proliferation.

Reader's Guide to Military History Charles Messenger, 2013-10-31  
This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations. Designed for a wide variety of users, it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts. The book examines naval and air warfare as well as significant individuals including commanders, theorists and war leaders. Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases, strengths and limitations.

*Nuclear Deterrence in Southern Asia* Arpit Rajain, 2005-05  
This important and topical book examines the triangular relationship of China, India and Pakistan through the prism of nuclear deterrence. The author highlights the interplay and role of strategic culture, nuclear weaponisation and deployment, command and control, arms control, non-state actors and foreign policy issues which affect relations between the three countries. With two main purposes, a conceptual investigation into the notion of deterrence and a study of the theory and practice of limited war, this book addresses the strategic, political and military dimensions of the role of nuclear weapons through examples of the only cases of nuclear weapon states having gone into armed conflict: the Cuban missile crisis, the Ussuri river clashes and the Kargil conflict. It discusses the various pressures exerted on decision makers in the context of the notions of deterrence, the rational deterrence model and a limited war under a nuclear umbrella, evaluates all three countries with regard to their strategic culture, the role of nuclear weapons in their military strategy, the nature of public opinion and political rhetoric, responses to the various arms control treaties and foreign policy choices. Based on a variety of sources including interviews with key individuals in various sectors, this is the first book-length study of the triangular relationship between China, India and Pakistan.

China and International Institutions Marc Lanteigne, 2005-11-14  
China has shifted its foreign policy from one that avoided engagement in international organizations to one that is now embracing them. These moves present a new challenge to international relations theory. How will the global community be affected by the engagement of this massive global power with international institutions? This new study explores why China has chosen to abandon its previous doctrine of institutional isolation and details how it is currently

unable to balance American power unilaterally and details an indirect path to greater power. In addition, it includes the first major analysis of the Shanghai Cooperation Organization comprising China, Russia, and most of Central Asia. In contrast to many works on the rise of China, which place an emphasis on her material goods and powers, this book delivers a new approach. It shows how the unique barriers Beijing is facing are preventing the country from taking the traditional paths of territorial expansion and political economic domination in order to develop as a great power. One of these barriers is the United States and its inherent military and economic strength. The other is the existence of nuclear weapons, which makes direct great power conflict unacceptably costly. China has therefore opted for a new path using institutions as stepping stones to great power status. This book will be of great interest to students and scholars of international relations, world politics, world history, and Asia.

***Nuclear Risk Reduction in South Asia*** Michael Krepon, 2004-11-26. The essays in this collection explore and analyze how to reduce the risk of nuclear war in South Asia. Contributors work to introduce the theory and methodology of nuclear risk reduction to provide specific measures that might work best in the region and to consider the consequences of missile defense options for stability in Asia. Much work is needed to reduce nuclear dangers between India and Pakistan. While the fact that both countries possess nuclear weapons may prevent a full blown conventional or nuclear war, the presence of these weapons in the region may also encourage the use of violence at lower levels, expecting escalation to be contained by a mutual desire to avoid the nuclear threshold. One only needs to look at the Kashmir conflict for confirmation of this paradox, with serious crises coming more frequently with more severity since the nuclear tests of 1998. Sustained efforts along the line suggested by the contributors of this volume are a crucial step toward reducing nuclear risk on the Subcontinent.

***Preventive War and American Democracy*** Scott Silverstone, 2012-07-26. This volume explores the preventive war option in American foreign policy from the early Cold War strategic problems created by the growth of Soviet and Chinese power to the post Cold War fears of a nuclear armed North Korea, Iraq, and Iran. For several decades after the Second World War, American politicians and citizens shared the belief that a war launched in the absence of a truly imminent threat or in response to another's attack was raw aggression. Preventive war was seen as contrary to the American character and its traditions, a violation of deeply held normative beliefs about the conditions that justify the use of military force. This anti preventive war norm had a decisive restraining effect on how the US faced the shifting threat in this period. But by the early 1990s, the Clinton administration considered the preventive war option against North Korea, and the Bush administration launched a preventive war against Iraq without a trace of the anti preventive war norm that was central to the security ethos of an earlier era. While avoiding the sharp partisan and ideological tone of much of the recent discussion of preventive war, *Preventive War and American Democracy* explains this change in beliefs and explores its implications for the future of American foreign policy.

***South Asia's Nuclear Security Dilemma*** Lowell Dittmer, 2015-04-08. The nuclear test explosions in India and Pakistan in 1998, followed by the outbreak of hostilities over Kashmir in 1999, marked a frightening

new turn in the ancient bitter enmity between the two nations Although the tension was eclipsed by the events of 9 11 and the subsequent American attacks on Afghanistan and Iraq it has not disappeared as evidenced by the 2001 attack in the Indian Parliament by Islamic fundamentalists out of Kashmir By 2002 these two nuclear armed neighbors seemed to be once again on the brink of war This book outlines the strategic structure of the rivalry and the dynamic forces driving it and investigates various possible solutions The expert contributors focus on the India Pakistan rivalry but also consider the China factor in South Asia s nuclear security dilemma Although essentially political strategic in its approach the book includes coverage of opposing military arsenals and the impact of local terrorism on the delicate balance of power

*Beyond Gridlock* Thomas Hale, David Held, 2017-09-25 It is now conventional wisdom to see the great policy challenges of the 21st century as inherently transnational It is equally common to note the failures of the international institutions the world relies on to address such challenges As the acclaimed 2013 book *Gridlock* argued the world increasingly needs effective international cooperation but multilateralism appears unable to deliver it in the face of deepening interdependence rising multipolarity and the growing complexity and fragmentation that characterise the global order The *Gridlock* authors have now partnered with a group of leading experts to offer a trenchant reassessment of elements of the argument Comparing anomalies and exceptions to multilateral dysfunction across a number of spheres of world politics *Beyond Gridlock* explores seven pathways through and beyond gridlock While multilateralism continues to fall short *Beyond Gridlock* identifies systematic means to avoid or resist these forces and turn them into collective solutions This book offers a vital new perspective on world politics as well as a practical guide for positive change in global policy

*Project on Nuclear Issues* Sarah Minot, 2014-11-03 The Project on Nuclear Issues 2013 conference series included events at Northrop Grumman in May Sandia National Laboratory in July and CSIS in December before concluding with a Capstone Conference at Offutt Air Force Base home of the U S Strategic Command in March 2014 The papers included in this volume are a collection of some of the presentations delivered at the Capstone Conference Spanning a wide range of technical and policy issues these selected papers hope to further discussion in their respective areas as well as contribute to the success of the greater nuclear community

**The International Arms Trade** Rachel Stohl, Suzette Grillot, 2013-04-29 The multi billion dollar business of the international conventional arms trade involves virtually every country in the world Around the globe people s lives are being irrevocably changed by the effects of guns tanks and missiles These weapons have the potential to cause a deadly and current threat one responsible for hundreds of thousands of deaths a year This succinct and accessible new book explores the complexities and realities of the global conventional weapons trade The first book on the subject in nearly a decade *The International Arms Trade* provides an engaging introduction to the trade the effects and the consequences of these weapons The authors trace the history of the arms trade and examine how it has evolved since the end of the Cold War In particular they assess the role of the largest arms exporters and importers the business of selling conventional arms around the world

and shed new light on the illicit arms trade and the shadowy dealers who profit from their deadly commerce The book also looks closely at the devastating effect the business can have on countries societies and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities The International Arms Trade will be invaluable for students and scholars of international relations and security studies and for policymakers and anyone interested in understanding more about the conventional arms trade
