**Growing Up Global** Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Population, Panel on Transitions to Adulthood in Developing Countries, 2005-06-25

The challenges for young people making the transition to adulthood are greater today than ever before. Globalization with its power to reach across national boundaries and into the smallest communities carries with it the transformative power of new markets and new technology. At the same time globalization brings with it new ideas and lifestyles that can conflict with traditional norms and values. And while the economic benefits are potentially enormous the actual course of globalization has not been without its critics who charge that to date the gains have been very unevenly distributed generating a new set of problems associated with rising inequality and social polarization. Regardless of how the globalization debate is resolved it is clear that as broad global forces transform the world in which the next generation will live and work the choices that today's young people make or others make on their behalf will facilitate or constrain their success as adults. Traditional expectations regarding future employment prospects and life experiences are no longer valid. Growing Up Global examines how the transition to adulthood is changing in developing countries and what the implications of these changes might be for those responsible for designing youth policies and programs in particular those affecting adolescent reproductive health. The report sets forth a framework that identifies criteria for successful transitions in the context of contemporary global changes for five key adult roles: adult worker, citizen and community participant, spouse, parent and household manager.

**Report on the Global HIV/AIDS Epidemic, June 2000** Joint United Nations Programme on HIV/AIDS., 2000

This report lays out the evidence, the success stories and the challenges that confront individual countries and the international community on HIV/AIDS. In doing so it seeks to convey the true seriousness of the global epidemic but also to keep hope alive.

**Public Health, Disease and Development in Africa** Ezekiel Kalipeni, Juliet Iwelunmor, Diana S. Grigsby-Toussaint, Imelda K. Moise, 2018-06-14

The closure of the Millennium Development Goals (MDGs) in 2015 prompted the need for a book of this kind. An interdisciplinary group of global health scholars contribute to the understanding of the emerging and fast growing problem of the dual burden of communicable and non-communicable diseases (NCDs) in Africa. This book is timely as the international community has moved from the MDGs to adopt the Sustainable Development Goals (SDGs) as the blueprint for a new human development agenda. Contributions and case studies are situated in the revised Epidemiologic and Nutrition Transition Model to capture the current situation referencing communicable and NCDs on the African continent. The case studies encapsulated aim to help minimize negative health outcomes and improve population health, well-being and equity in the future. This book will be significant in policy circles to assist international organizations, governments and United Nations agencies. It aims to chart the future for health in Africa in light of recently adopted SDGs. This book is also a useful complementary reader for global
