Repositioning Nutrition As Central To Development A Strategy For Large Scale Action:

Repositioning Nutrition as Central to Development, 2006 Persistent malnutrition is contributing not only to widespread failure to meet the first MDG to halve poverty and hunger but to meet other goals in maternal and child health HIV AIDS education and gender equity The choice is now between continuing to fail or to finally make nutrition central to development Underweight prevalence among children is the key indicator for measuring progress on non income poverty and malnutrition remains the world s most serious health problem and the single biggest contributor to child mortality Nearly a third of children in the developing world are either Repositioning Nutrition as Central to Development Meera Shekar, Richard Heaver, Yi-Kyoung Lee, World Bank, 2006 *Repositioning Nutrition as Central to Development A Strategy for Large Scale Action* makes the case that development partners and developing countries must increase investment in nutrition programs This case is based on evidence that the scale of the problem is very large and that nutrition interventions are essential for speeding poverty reduction have high benefit cost ratios and can improve nutrition much faster than reliance on economic growth alone Moreover improved nutrition can drive economic growth The report proposes to the international development community and national governments a global strategy for accelerated action in nutrition BOOK JACKET Food Production and Nature Conservation Iain J. Gordon, Herbert H.T. Prins, Geoff R. Squire, 2016-11-25 Feeding the world s growing human population is increasingly challenging especially as more people adopt a western diet and lifestyle Doing so without causing damage to nature poses an even greater challenge This book argues that in order to create a sustainable food supply whilst conserving nature agriculture and nature must be reconnected and approached together The authors demonstrate that while the links between nature and food production have to some extent already been recognized until now the focus has been to protect one from the impacts of the other Instead it is argued that nature and agriculture can and should work together and ultimately benefit from one another Chapters describe efforts to protect nature through globally connected protected area systems and illustrate how farming methods are being shaped to protect nature within agricultural systems The authors also point to many ways in which nature benefits agriculture through the ecosystem services it provides Overall the book shows that nature conservation and food production must be considered as equally important components of future solutions to meet the global demand for food in a manner that is sustainable for both the human population and the planet as a whole

Migration, Food Security and Development Chetan Choithani, 2023-05-11 This book examines the role of migration as a livelihood strategy in influencing food access among rural households Migration forms a key component of livelihoods for an increasing number of rural households in many developing countries Importantly there is now a growing consensus among academics and policymakers on the potential positive effects of migration in promoting human development Concurrently the significance of food security as an important development objective has grown tremendously and the Sustainable Development Goals agenda envisages eliminating all forms of malnutrition However the academic and policy discussions on

these two issues have largely proceeded in silos with little attention devoted to the relationship they bear with each other Using the conceptual frameworks of entitlements and sustainable livelihoods this book seeks to fill this gap in the context of India a country with the most food insecure people in the world and where migration is integral to rural livelihoods

Disease Control Priorities, Third Edition (Volume 8) Donald A. P. Bundy, Nilanthi de Silva, Susan Horton, Dean T. Jamison, 2017-11-20 More children born today will survive to adulthood than at any time in history It is now time to emphasize health and development in middle childhood and adolescence developmental phases that are critical to health in adulthood and the next generation Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life The volume outlines the investment case for effective costed and scalable interventions for low resource settings emphasizing the cross sectoral role of education This evidence base can guide policy makers in prioritizing actions to promote survival health cognition and physical growth throughout childhood and adolescence

The State of Food Security and Nutrition in the World 2020 Food and Agriculture Organization of the United Nations ,International Fund for Agricultural Development,World Food Programme,World Health Organization,The United Nations Children's Fund,2020-07-01 Updates for many countries have made it possible to estimate hunger in the world with greater accuracy this year In particular newly accessible data enabled the revision of the entire series of undernourishment estimates for China back to 2000 resulting in a substantial downward shift of the series of the number of undernourished in the world Nevertheless the revision confirms the trend reported in past editions the number of people affected by hunger globally has been slowly on the rise since 2014 The report also shows that the burden of malnutrition in all its forms continues to be a challenge There has been some progress for child stunting low birthweight and exclusive breastfeeding but at a pace that is still too slow Childhood overweight is not improving and adult obesity is on the rise in all regions The report complements the usual assessment of food security and nutrition with projections of what the world may look like in 2030 if trends of the last decade continue Projections show that the world is not on track to achieve Zero Hunger by 2030 and despite some progress most indicators are also not on track to meet global nutrition targets The food security and nutritional status of the most vulnerable population groups is likely to deteriorate further due to the health and socio economic impacts of the COVID 19 pandemic The report puts a spotlight on diet quality as a critical link between food security and nutrition Meeting SDG 2 targets will only be possible if people have enough food to eat and if what they are eating is nutritious and affordable The report also introduces new analysis of the cost and affordability of healthy diets around the world by region and in different development contexts It presents valuations of the health and climate change costs associated with current food consumption patterns as well as the potential cost savings if food consumption patterns were to shift towards healthy diets that include sustainability considerations The report then concludes with a discussion of the policies and strategies to transform food systems to ensure affordable healthy diets as part of the required efforts to end

both hunger and all forms of malnutrition Hunger and Health United Nations World Food Programme,2012-08-21 Hunger and Health explores the multiple relationships between hunger and poor health and how they affect the growth of individuals physiologically and psychologically constraining the development of nations both socially and economically Examining the profound effect that hunger has on health including disease prevention and treatment it gives special attention to access to quality food and healthcare in particular for the marginalized and poor It also identifies critical junctures in the human life cycle when the benefits of reducing hunger and improving poor health have a profound impact It demonstrates how aligning of hunger and health interventions can offer proven solutions that reach those most in need and contains compelling evidence which confirms that hunger and poor health are solvable problems today It encourages those involved in policy programming and advocacy to take action to address some of the most urgent hunger and health problems Essential reading for anyone concerned about eliminating hunger Published with the UN World Food Programme **Child Hunger and**

Human Rights Clair Apodaca,2010-04-05 Child Hunger and Human Rights International Governance applies the human rights theory of legal obligation to the problem of child malnutrition and investigates whether duty bearers have fulfilled their obligations to protect respect and provide This book includes moral economic political and legal components to the research on the child s right to be free from hunger Using two methods of investigation the first a historical comparative method based on the systematic analysis of the content of historical materials government documents policy statements state budgets newspaper reports and other public records and the second is statistical analysis Apodaca investigates beyond the suffering deformities and deaths of children to child malnutrition resulting in reduced physical and mental development threatening the child s life opportunities the prospects of further generations and the growth of the economy Examining the connection between governmental agricultural economic and financial policies international donor policies and transnational corporate voluntary codes of conduct affecting child malnutrition rates this book will be of interest to policy makers activists students and scholars of human rights social justice international ethics development international relations and law

Opportunities and Obligations Terence P. Stewart,2009-01-01 teach aspects of the WTO system or advise clients in the private sector The essays are grouped into three sections 1 looking at the ongoing Doha negotiations and or describing changes to the WTO system or negotiation approach that are needed viewed as desirable 2 examining the direction US trade policy should take moving forward and 3 critically examining the world food crisis and what role the trading system and individual WTO members can take in helping to resolve the crisis Book Jacket *Africans and Globalization* Oyinlola Longe,Akinloyè Òjó,Karim Traore,2017-11-22 Africans and Globalization Linguistic Literary and Technological Contents and Discontents considers the substance and dissatisfactions of globalization on Africa and its Diaspora Although variously framed across disciplines globalization has generally entailed non milieu bound interactions which alters the existence of its participants The concerns about the impact of globalization have been raised in relation to Africa and have related to the

helpful and deleterious effects Increasingly industrialization without consideration of environmental impacts and westernization including erosion of indigenous values are perceived as synonymous with globalization This multidisciplinary collection contends that in theory globalization linked Africa with the world through trade and information sharing thereby increasing development This collection provides reflections based on contemporary research within the linguistic literary and technological areas of study It illustrates that globalization is not a single process but rather a complex set of processes that seemingly operate in an oppositional manner The collected works make for exciting appraisal as they highlight some of the contents and discontents of globalization across multiple areas of human endeavor in Africa and its diaspora **Early Life**

Origins of Human Health and Disease John P. Newnham, Michael G. Ross, 2009-01-01 There is compelling evidence that many of the risks leading to the most frequent chronic diseases in adulthood originate in the earliest stages of life Adverse environmental conditions in utero and during infancy can lead to negative health effects during the subsequent lifetime of the exposed individual This book offers precious insights into the latest concepts and results from epidemiologic clinical and basic studies in this burgeoning area of health care The developmental origins of various diseases such as diabetes obesity and cancer are examined as well as the early programming of reproductive health and different organs Attention is given to the impact of environmental factors such as nutrition and pollution and the mediating genetic and epigenetic pathways are reviewed A crucial point under discussion is the concept of environmental insults adversely affecting not only the exposed persons but also their descendants In addition the economic consequences of a suboptimal start to life and the importance of preventive measures are stressed This publication is of great value to anyone interested in health care notably to specialists in obstetrics pediatrics internal medicine obesity diabetes and heart disease **Expanding Opportunities for the Next**

Generation Safaa El-Kogali, Caroline Krafft, 2015-01-28 Early childhood is the most important stage of human development yet in Middle East and North Africa countries there is little research and inadequate investment in this crucial stage of life This book covers risk protective factors policies and programs that can address inequality and shortfalls in the early years of life Student Learning in South Asia Halil Dundar, Tara B  teille, Michelle Riboud, Anil Deolalikar, 2014-05-30 This book

analyzes the performance of South Asian educational systems and identifies the causes and correlates of student learning outcomes Drawing on successful initiatives both in the region and elsewhere in the world it offers an insightful approach to setting priorities for enhancing the quality of school education in South Asia The Atlas of World Hunger Thomas J.

Bassett, Alex Winter-Nelson, 2010-05-15 Earlier this year President Obama declared one of his top priorities to be making sure that people are able to get enough to eat The United States spends about five billion dollars on food aid and related programs each year but still both domestically and internationally millions of people are hungry In 2006 the Food and Agricultural Organization of the United Nations counted 850 million hungry people worldwide but as food prices soared an additional 100 million or more who were vulnerable succumbed to food insecurity If hunger were simply a matter of food production no one

would go without There is more than enough food produced annually to provide every living person with a healthy diet yet so many suffer from food shortages unsafe water and malnutrition every year That s because hunger is a complex political economic and ecological phenomenon The interplay of these forces produces a geography of hunger that Thomas J Bassett and Alex Winter Nelson illuminate in this empowering book The Atlas of World Hunger uses a conceptual framework informed by geography and agricultural economics to present a hunger index that combines food availability household access and nutritional outcomes into a single tool one that delivers a fuller understanding of the scope of global hunger its underlying mechanisms and the ways in which the goals for ending hunger can be achieved The first depiction of the geography of hunger worldwide the Atlas will be an important resource for teachers students and anyone else interested in understanding the geography and causes of hunger This knowledge the authors argue is a critical first step toward eliminating unnecessary suffering in a world of plenty Global Crises, Global Solutions Bjørn Lomborg,2009-07-09 In this book leading economists evaluate how the world can best spend money to combat the world s biggest problems **The MDGs, Capabilities and Human Rights** Sakiko Fukuda-Parr,Alicia Yamin,2017-10-02 Heralded as opening a new chapter in international development the Millennium Development Goals MDGs have led to the use of global goals and quantitative targets as a central instrument for defining global priorities This book explores the implications of this new approach How does target setting influence policy priorities of national governments bilateral donors multilateral agencies NGOs and other stakeholders What are the intended and unintended consequences Why is the use of numeric indicators effective How does quantification reshape meanings of challenges such as women s empowerment Building on 11 case studies and a conceptual framework this book provides a goal by goal analysis by leading specialists in the relevant fields These specialists analyse the choices made as well as the empirical and normative effects of the MDGs to offer insights for a more rigorous use of indicators and cautions on their limitations and perverse consequences This book was originally published as a special issue of the Journal of Human Development and Capabilities Charting the course of education and HIV UNESCO,2014-03-11 More than three decades after the identification of the virus HIV continues to affect millions of people worldwide Much progress has been made and infection rates are down in a number of countries From the beginning the education sector has played a central role in responding to HIV though its role and the contribution of school based HIV education has been the subject of much debate This book explores the major debates and provides an overview of how the role of the education sector and approaches to HIV education have evolved what has been learned emerging challenges and opportunities and proposes a way forward for the education sector to contribute to the prevention of new infections treatment and care and reduce stigma and discrimination The Education on the Move series seeks to bring research knowledge produced by various academic disciplines and within various organizations to those who can shape educational policies and drive reforms African Economic Outlook 2017 Entrepreneurship and Industrialisation African Development Bank,OECD,United Nations

Development Programme,2017-05-22 The African Economic Outlook 2017 presents the continent's current state of affairs and forecasts its situation for the coming two years *Macroeconomics and Human Development* Deepak Nayyar,2015-07-16 In the conventional discourse on macroeconomics the subject of human development is at best marginal and at worst irrelevant In the unconventional discourse on human development macroeconomics or its constraints are seldom recognised even if its consequences are often highlighted There are however intersections and interconnections which provide the rationale for this book that seeks to map some broad contours of an unexplored yet important domain Macroeconomics is important for human development because it determines levels of employment the degree of social protection and the public provision of services such as healthcare or education Human development has implications and consequences for macroeconomics for it can mobilize or claim resources to enlarge or diminish space for macroeconomic policies The relationship exists and matters not only in poor countries but also in wealthy ones Employment even if neglected provides the critical link This book shows that causation runs in both directions and can be either positive or negative It reveals similarities and differences between developing countries and industrialised countries The political context is significant everywhere as interests ideology and institutions influence economic policies in both spheres to shape outcomes This book was originally published as a special issue of the Journal of Human Development and Capabilities El hambre y los mercados Programa Mundial de Alimentos,2009-12-01 First published in 2009 Routledge is an imprint of Taylor Francis an informa company
