Ceremonies and Celebrations of Life Theories and Concepts Unworldly Entities and Events With an array of topics that include traditional subjects and important emerging ideas the Encyclopedia of Death and the Human Experience is the ultimate resource for students researchers academics and others interested in this intriguing area of study *Death* Mario Erasmio, 2021-03-25 Personal and yet utterly universal inevitable and yet unknowable death has been a dominant theme in all cultures since earliest times Different societies address death and the act of dying in culturally diverse ways yet remarkably across the span of several millennia we can recognize in the customs of ancient Greece and Rome ceremonies and rituals that have enduring present day resonance For example preparing the corpse of the deceased holding a memorial service the practice of cremation and of burial in resting places are all liminal processes that can trace their origin to ancient practices Such rites described by Cicero and Herodotus among others have defined traditional modern funerals Yet of late there has been a shift away from classical ritual and sombre memorialization as the dead are transformed into spectacles Ad hoc roadside shrines virtual burials online guest books and even jazz memorial processions and firework displays have come to the fore as new modes of marking even celebrating bereavement What is causing this change and how do urbanisation economic factors and the rise of individualism play a part Mario Erasmio creatively explores the nexus between classical and contemporary approaches to dying death and interment From theme funerals in St Louis to Etruscan sarcophagi he offers a rich and insightful discussion of finitude across the ages **The Pragmeme of Accommodation: The Case of**

Interaction around the Event of Death Vahid Parvaresh, Alessandro Capone, 2017-06-02 This volume brings together a wide array of papers which explore among other things to what extent languages and cultures are variable with respect to the interactions around the event of death Motivated by J L Mey's idea of the pragmeme a situated speech act the volume has both theoretical and practical implications for scholars working in different fields of enquiry As the papers in this volume reveal despite the terminological differences between various disciplines the interactions around the event of death serve to provide solace not only to the dying but also to the family and friends of the deceased thus helping them to accommodate to the new state of affairs *Death and Survival in the Book of Job* Dan Mathewson, 2006-06-05 The Book of Job functions as

literature of survival where the main character Job deals with the trauma of suffering attempts to come to terms with a collapsed moral and theological world and eventually re connects the broken pieces of his world into a new moral universe which explains and contains the trauma of his recent experiences and renders his life meaningful again The key is Job's death imagery In fact with its depiction of death in the prose tale and its frequent discussions of death in the poetic sections Job may be the most death oriented book in the bible In particular Job in his speeches articulates his experience of suffering as the experience of death To help understand this focus on death in Job we turn to the psychohistorian Robert Lifton who investigates the effects on the human psyche of various traumatic experiences wars natural disasters etc According to Lifton survivors of disaster often sense that their world has collapsed and they engage in a struggle to go on living Part of this

struggle involves finding meaning in death and locating death's place in the continuity of life. Like many such survivors, Job's understanding of death is a flashpoint indicating his bewilderment or desymbolization in the early portions of his speeches and then later on his arrival at what Lifton calls resymbolization, the reconfiguration of a world that can account for disaster and render death and life meaningful again. Psychosocial Interventions in End-of-Life Care Peggy Sturman

Gordon, 2015-11-19 The concept of a good death has been hotly debated in medical circles for decades. This volume delves into the possibility and desirability of a good death by presenting the psychosocial measures of care as a crucial component, such as religion, existentialism, hope, and meaning-making. The volume also focuses on oncologic psychiatry and the influence of technology as a means to alleviate pain and suffering and potentially provide relief to those at the end of life. Such initiatives are aimed at diminishing pain and are socially bolstering and emotionally comforting to ensure a peaceful closure with life as opposed to a battle waged. Utilizing the most recent information from medical journals and books to present the latest on healthcare and dying today, this volume crosses the boundaries of thanatology, psychology, religion, spirituality, medical ethics, and public health. *Researching Death, Dying and Bereavement* Erica Borgstrom, Julie Ellis, Kate

Woodthorpe, 2018-10-22 This book examines research on death, dying, and bereavement and how our approaches, perceptions, and expectations shape what we can know about the end of life. The contributions include personal and professional reflections and practical suggestions for conducting research in this field. The volume stems from the resurgence of the international and interdisciplinary study of death in the last 20 years. Within this empirical research is often viewed as sensitive but little has been written about the experience of conducting research in this area. There has thus been little reflection on the opportunities and challenges faced in undertaking research as the field of death studies grows, including the accommodation and recognition of cultural differences. This volume seeks to in part address this gap. The chapters in this book were originally published in the *Mortality* journal and the *Death Studies* journal. Natural Burial Douglas

Davies, Hannah Rumble, 2012-07-26 From the 1990s the British developed an interest in natural burial, also known as woodland green or ecological burial. Natural burial constitutes part of a long historical legacy for British funeral innovation, from Victorian cemetery monuments and garden cemeteries through the birth and rise of cremation to the many things done with cremated remains. The book sets natural burial in the context of such creative dealing with death, grief, mourning, and the celebration of life. Themes from sociology and anthropology combine with psychological issues and theological ideas to show how human emotions take shape and help people consider their own death whilst also dealing with the death of those they love. The authors explore the variety of motivations for people to engage with natural burial and its popular appeal using interviews with people having a relationship with one natural burial site created by the Church of England but open to all. They illustrate people's understandings of life and death in the sacred, secular, and mixed worlds of modern Britain. **Death**

Handbook of Gerontology Research Methods Leigh Riby, 2016-12-08 The Handbook of Gerontology Research Methods offers a clear understanding of the most important research challenges and issues in the burgeoning field of the psychology of aging. As people in developed countries live longer, so a range of research methods has evolved that allows a more nuanced understanding of how we develop psychologically and neurologically. Allied to this is an increasing concern with the idea of well-being, a concept which places cognitive performance and development within a more socially grounded context. With contributions from a range of top international scholars, the book addresses both typical and atypical aging, highlighting key areas such as physical and cognitive exercise, nutrition, stress, diabetes, and issues related to death, dying, and bereavement. Successful ageing is emphasised throughout the text. Each chapter concludes with a series of practical tips on how to undertake successful research in this area. This unique collection is the first book to provide both a concise overview of the major themes, findings, and current controversies in this growing field, as well as an understanding of the practical issues when researching older adults which may impact on research outcomes, intervention policy, and future directions. Designed

for both students and researchers interested in the psychology of aging but also highly relevant for students or researchers in related fields such as health psychology and social care the Handbook of Gerontology Research Methods is essential reading for anyone wishing to understand more about the psychology of aging
