European Representation in EU National Parliaments Lucy Kinski, 2021-01-02 This book provides an original argument that rejects the idea of national MPs having but one standard mode of representation It acknowledges the national electoral connection but considers representation beyond national borders The author empirically investigates such patterns of representation in MPs parliamentary speech making behavior and their attitudes in Austria Germany Ireland and the UK The book analyzes representative claims in parliamentary debates on the Constitutional Treaty the Lisbon Treaty and the Eurozone crisis and relies on qualitative interviews with members of the European affairs and budget committees It finds a Eurosceptic Europeanization in that national MPs from the Eurosceptic left particularly represent other EU citizens

Local Governance in Western Europe Peter John, 2001-09-18 Its strength lies in combining theoretical insights with an impressive range of empirical material The analysis is subtle and multi layered This is a timely and important book *Political Studies* Local governance have gained massive attention among scholars and practitioners during the past several years Peter John s book fills a void in the literature by tracing the historical roots of local governance and by placing his findings in a comparative perspective Professor Jon Pierre University of Gothenburg Sweden Peter John has produced a fascinating and stimulating book in which he assesses current developments in urban politics and local government in Europe and suggests how these changes are leading to different patterns of sub national territorial politics in the EU today What he has to say is of important interest to all students of local government comparative politics and of territorial politics more generally Michael Goldsmith University of Salford this book offers a fascinating comparative analysis themes such as New Public Management globalisation regionalism and privatisation will be relevant to numerous courses in government politics public administration

Citizens and the State Hans-Dieter Klingemann,Dieter Fuchs,1995-11-23 Fears that representative democracy in western Europe is in crisis are examined on the basis of trends in mass attitudes over the past two or three decades The evidence suggests not crisis but a changing relationship between citizens and the state This change poses a democratic transformation in the countries of Western Europe Series Description This set of five volumes is an exhaustive study of beliefs in government in post war Europe Based upon an extensive collection of survey evidence the results challenge widely argued theories of mass opinion and much scholarly writing about citizen attitudes towards government and politics The series arises from a research project sponsored by the European Science Foundation Series ISBN 0 19 961880 1

Compounded Representation in West European Federations Joanne B. Brzinski,Thomas D. Lancaster,Christian Tuschhoff,1999 These papers resulted from a research project entitled Federalism and Compounded Representation in Western Europe They place analytical emphasis on theoretical and contextual issues of representation and tend to analyze the complexities of representation within federal systems by focusing on issues of social identity multiple territorial bases of governance and policy making institutions such as interest groups corporatism and the European Union Specific countries examined include Germany Austria and Spain *The Oxford Handbook of Political Representation in Liberal Democracies* Robert Rohrschneider,Jacques Thomassen,2020-07-28 The Handbook of Political Representation in Liberal Democracies offers a state of the art assessment of the functioning of political representation in liberal democracies In 34 chapters the world s leading scholars on the various aspects of political representation address eight broad themes The concept and theories of political representation its history and the main requisites for its development elite orientations and behavior descriptive representation party government and representation non electoral forms of political participation and how they relate to political representation the challenges to representative democracy originating from the growing importance of non majoritarian institutions and social media the rise of populism and its consequences for the functioning of representative democracy the challenge caused by economic and political globalization what does it mean for the functioning of political representation at the national level and is it possible to develop institutions of representative democracy at a level above the state that meet the normative criteria of representative democracy and are supported by the people The various chapters

offer a comprehensive review of the literature on the various aspects of political representation. The main organizing principle of the Handbook is the chain of political representation, the chain connecting the interests and policy preferences of the people to public policy via political parties, parliament and government. Most of the chapters assessing the functioning of the chain of political representation and its various links are based on original comparative political research. Comparative research on political representation and its various subfields has developed dramatically over the last decades so that even ten years ago a Handbook like this would have looked totally different. *The Representative Turn in EU Studies* Sandra Kröger, Dawid Friedrich, 2016-04-08. After the participative and deliberative turns in both democratic theory and EU studies we are currently witnessing a representative turn to which this volume contributes by addressing the relation between representation and democracy in the EU. Although in the Lisbon Treaty the EU conceives itself as a representative democracy, the meaning of this concept in a supranational polity is far from clear, either in theory or practice. Instead, the historically contingent link between representation and democracy is today severely challenged by various processes of diversification at all levels of political action: national, regional, supranational. These processes challenge our understanding of representative democracy as involving electoral democracy within clearly delineated nation states, provoking a situation in which new frontiers of representation develop. Consequently, it becomes increasingly difficult to provide normative standards as well as accurate assessments of democratic representation in the EU. This volume addresses these core challenges of representative democracy in the EU from normative, theoretical and methodological perspectives. This book was published as a special issue of the *Journal of European Public Policy*. **Comparative Politics: Western Europe and the United States: foundations of comparative politics**, 2005. Representation and Democracy in the EU Richard Bellamy, Sandra Kröger, 2016-04-14. This book explores the various ways in which citizens are represented in EU policy making. Most accounts naturally focus on the European Parliament as the prime source of democratic representation. This collection focuses instead on four other channels that are as and often more important: namely representation via governments, national parliaments, civil society organisations and directly via referenda. Based on original research, the book combines democratic theory with detailed empirical analysis to provide an innovative, timely and up-to-date evaluation of the nature of representation in the EU. Policy advisors, practitioners and those scholars interested in democracy and the European Union will find this volume to be a valuable resource. This book was published as a special issue of the *Journal of European Integration*. **Party Realignment in Western Europe** Hagevi, Magnus, Blombäck, Sofie, Demker, Marie, Hinnfors, Jonas, Loxbo, Karl, 2022-07-21. Identifying a crisis for representative democracy in Western European party systems, this essential book studies the widening gap between political parties' ideological economic Left-Right rhetoric. Combining in-depth theoretical analysis with empirical research, it addresses whether political party ideologies are converging or diverging and whether these changes are initiated by the parties themselves, aligned with voter demand or forced by economic globalization. Between Voters and Eurocrats

Johannes Karremans, 2024-01-13 How do governments in Europe justify their budgets towards the national parliament Are their socioeconomic policies shaped more by electoral pressures or by their commitments towards the European Union In *Between Voters and Eurocrats* Johannes Karremans presents a framework and methodology for studying these questions Based on theories of democratic legitimacy he argues that if governments temporarily pursue unpopular policies with the justification that they need to be fiscally responsible in subsequent years they need to become more responsive again to domestic socioeconomic demands in order to maintain the trust of citizens The recent crises faced by European countries have repeatedly evoked the impression that European economic governance constrains governments ability to be responsive to domestic demands Today especially in the European Union maintaining financial sustainability of the state has become tied to international obligations Karremans raises the concern that financial considerations are more important than people s demands and investigates whether this proposition is true through comparative study focussing on five countries Austria France Germany Italy and Spain and explores how governments maintain a balance between institutional responsibility and democratic responsiveness *Populism and New Patterns of Political Competition in Western Europe* Daniele

Albertazzi, Davide Vampa, 2021-01-05 This book analyses how party competition has adjusted to the success of populism in Western Europe whether this is non populists dealing with their populist competitors or populists interacting with each other The volume focuses on Western Europe in the period 2007 2018 and considers both right wing and left wing populist parties It critically assesses the concept and rise of populism and includes case studies on Austria France Germany the Netherlands Switzerland Denmark Finland the United Kingdom Greece and Italy The authors apply an original typology of party strategic responses to political competitors which allows them to map interactions between populist and non populist parties in different countries They also assess the links between ideology and policy the goals of different populist parties and how achieving power affects these parties The volume provides important lessons for the study of political competition particularly in the aftermath of a crisis and as such its framework can inform future research in the post Covid 19 era This wide ranging study will appeal to students and scholars of political science interested in populism and political competition and will appeal to policy makers and politicians from across the political spectrum **The Catholic Church and European**

State Formation, AD 1000-1500 Jørgen Møller, Jonathan Stavnskrær Doucette, 2022 The Catholic Church and European State Formation AD 1000 1500 inserts the Catholic Church as the main engine of the persistent international and domestic power pluralism which has moulded European state formation for almost a millennium **Referendums and**

Representative Democracy Maija Setälä, Theo Schiller, 2009-09-10 This volume analyses how the use of referendums affects the central functions and characteristics of representative democracy It provides a balanced account of the interaction between referendums and representative institutions and actors seeking to evaluate whether referendums supplement or undermine representative democracy Considering both normative and empirical questions the volume also examines the

particular circumstances under which referendums strengthen or weaken representative democracy Providing a variety of theoretical and methodological approaches used in the study of referendums this book is divided into three sections Referendums and the Models of Democracy The Demand of Referendums Party Ideologies and Strategies and Referendum Campaigns and Voter Behaviour It features case studies on Ireland Israel Canada California Italy Liechtenstein Switzerland the Nordic Countries the Netherlands Spain and the EU Constitutional Treaty In addition to system level evaluations of referendums studies on the ideological attitudes of political actors and strategic use of referendums the volume also provides analyses of referendum campaigns and voters choices in referendums Covering referendums on European integration the volume also demonstrates how supra national governance gives rise to the demand of referendums This volume will be of interest to students and scholars of political science political theory comparative politics and European studies

Political Representation in the European Union Sandra Kröger, 2014-04-03 In recent years the financial and economic crisis of 2008-9 has progressed into an equally important political and democratic crisis of the EU These troubled times have set the framework to reassess a number of important questions in regard to representative democracy in the EU such as the normative foundation of political representation the institutional relationship between representatives and represented the link between democracy and representation and new arenas and actors This book examines the diverse avenues through which different sorts of actors have expressed their voices during the Euro crisis and how their various interests are translated into the decision making process It offers a state of the art assessment of what political representation means in this context as well as a contribution to the representative turn in democratic theory The authors address three key themes The main actors and channels of political representation in the EU Interlocking levels of representation in the EU and the way in which national and supranational representation works How the European institutional system represents EU citizens through law and administration Focusing on the importance of representation in the legitimation of democracy this book will be of interest to students and scholars of European Union politics European studies democratic theory representation studies civil society and transnational democracy
