Representative Of The People:

Military Assistance on Request and the Use of Force Erika De Wet, 2020-03-26 In countries such as Syria Iraq South Sudan and Yemen internationally recognized governments embroiled in protracted armed conflicts and with very little control over their territory have requested direct military assistance from other states These requests are often accepted by the other states despite the circumvention of the United Nations Security Council and extensive violation of international humanitarian law and human rights In this book Erika De Wet examines the authority entitled to extend a request for or consent to direct military assistance as well as the type of situations during which such assistance may be requested notably whether it may be requested during a civil war Ultimately De Wet addresses the question of if and to what extent the proliferation of military assistance on the request of a recognized government is changing the rules in international law applying to the use of force

Representative Bureaucracy and Performance Sergio Fernandez, 2019-11-22 Representative Bureaucracy and Performance Public Service Transformation in South Africa is a first rate blend of quantitative and qualitative analysis of one of the major transitions in modern governance Fernandez makes a major theoretical contribution to the literature on representative bureaucracy in demonstrating how descriptive representation translates into both active representation and better performance His discussion of the crucial role of language and communication brings new insight to the literature on public administration and democracy Kenneth Meier Distinguished Scholar in Residence American University This study of public sector transformation goes beyond the descriptive qualitative research largely found in South African public administration historiography by undertaking sophisticated quantitative analysis to show that representation of previously historically disadvantaged groups under certain circumstances can improve the performance of public organizations This is an excellent contribution not only to public administration scholarship in South Africa but also to the sparse literature on public organizations in developing countries The book should be of great value to scholars and practitioners of public administration as well as to students of political science and organizational studies Robert Cameron Professor University of Cape Town This book provides an excellent analysis of the theory of representative bureaucracy in the context of South African post apartheid government South Africa is an important and fascinating case The work adds substantially to the literature on representative bureaucracy and will be of interest to all who are concerned with the effectiveness of government organizations J Edward Kellough Professor University of Georgia Governments throughout the world seek to promote employment equity and ensure that bureaucracies

are representative of the citizenry South Africa offers a rare and fascinating case for exploring what happens to bureaucracies as they undergo demographic transformation Grounded in the theory of representative bureaucracy and using a mixed methods approach this book explores how major changes in the demographics of the South African public service have affected the performance of the institution The empirical analysis offers compelling evidence that representative bureaucracies perform better As public organizations become increasingly representative by hiring historically disadvantaged persons especially Africans their performance improves controlling for a range of factors Evidence indicates representative bureaucracies perform better because they empathize with and advocate for historically disadvantaged communities are equipped with linguistic and cultural competencies to serve a diverse citizenry and can induce compliance cooperation and coproduction Politics of Representative Bureaucracy B. Dolan, David H. Rosenbloom, 2016-04-15 The readings in this collection provide a comprehensive guide to the established knowledge and emerging issues regarding democratizing public bureaucracies by making them socially representative. The book includes both classic and cutting edge works and presents a contemporary model for analyzing representative bureaucracy that focuses on the linkages between social origins, life experiences, attitudes, and administrators' decision making. The selections address many of the leading concerns of contemporary politics, including diversity and equal opportunity, policy, democratic control of administration, administrative performance, the pros and cons of the new public management, and reinventing government. Many of the field's most cited works are included. Each chapter starts with an introductory summary of the key questions under consideration and concludes with discussion questions. With its extensive selection of classic and contemporary readings, the book will have wide application for courses on bureaucracy, public administration, and public sector human resource management.
