## **Representing The Other A Feminism And Psychology Reader:**

**Representing the Other** Sue Wilkinson, Celia Kitzinger, 1996-07-16 This innovative collection addresses a challenging issue in contemporary feminist theory and practice whether and how we should represent members of groups to which we do not ourselves belong The discussions identify key concerns related to representation and difference Contributors draw on personal experiences of speaking for and about Others in their research professional practice writing or political activism Problems of representing Others with ethnic or cultural backgrounds different from one's own are highlighted and the discussions extend to representations of children prostitutes infertile women fat women gay men with HIV AIDS and people with disabilities

**Researching 'Race' and Ethnicity** Yasmin Gunaratnam, 2003-08-07 Gunaratnam's framework is rich in its examination and synthesis of approaches to the study of race the reward for the reader who does pick up the book is that the author deftly articulates the complicated view of research on race first from the quantitative perspective and then skilfully moves the reader to issues of race in qualitative research Studies in Ethnicity and Nationalism This is a welcome book for those engaged in policy and empirical work with an active research agenda there is a level of theoretical sophistication in the text which is often missing from texts concerned with methods in this area Race Relations Abstracts The particular value of this book to readers lies in the discussion of race ethnicity and research issues within a political and social context The author states her intention to explore some of the theoretical and practical dilemmas of researching race and ethnicity This is without question achieved I recommend it as essential reading for those concerned with increasing their awareness of issues relating to race ethnicity and research practice Nurse Researcher This is a thought provoking and challenging book which demonstrated the fractured and fluid nature of difference and power in the research process Importantly it offers a guide to the ways in which research can be effectively and productively used in challenging the status quo Diversity in Health and Social Care Researching Race and Ethnicity provides an innovative discussion of the methodological epistemological and ethical challenges of doing qualitative research that is informed by questions of race ethnicity and social difference By identifying and challenging categorical thinking and many longstanding assumptions about the meanings of race and ethnicity the author gets to the heart of many of the everyday dilemmas and difficulties that researchers confront in the field but are rarely theorised or openly discussed Yasmin Gunaratnam's insistence that race and ethnicity are a significant part of all qualitative research and are not the specialist concerns of those whose work is explicitly focussed upon race provokes a radical rethinking of current methodological debates How do racial and ethnic categories inform our approaches to research How does the racialised identity of the researcher and the research participants affect the research interaction and the knowledge that we produce What are the assumptions that are made about racialised subjectivity and inter subjectivity How can we make sense of accounts in which race and ethnicity are silent or are non manifest How can we work ethically across difference In examining these and other questions the wide ranging discussions

in the book are animated by examples drawn from the author's ethnographic research with white and minoritized research participants. Through these examples, readers will be able to engage with some of the complexities of research relationships, power relations, and ethical concerns about engagement, disconnection, and complicity in research. The attention that the book gives to the excluded experiences of minoritized researchers will be of particular value to many readers. *Researching Race and Ethnicity* is essential reading for students and academics in the social sciences.

*Qualitative Research Methods for Psychologists* Constance T. Fischer, 2011-04-28 *Qualitative Research Methods for Psychologists* is a collection of 14 original articles that teaches readers how to conduct qualitative research. Instead of characterizing and justifying certain methods, the contributors show by means of actual research studies what assumptions, procedures, and dilemmas they encountered. Fischer's introduction, which emphasizes the practical nature of qualitative research, and the closing chapter, which uses a question and answer format to investigate among other subjects what is scientific about qualitative research, are complemented by a glossary and other features that increase the book's utility and value. Addresses a range of practical examples from different traditions such as phenomenology, grounded theory, ethnography, and discourse analysis through actual case studies. Discusses various methodology and combinations of methods like assimilation analysis, dialogical approach, intuitive inquiry, and conceptual encounter. Terms are defined within chapters and/or in a glossary. Helps readers bridge from experimental to qualitative methods. Provides in-depth, philosophically grounded and compelling research findings. Includes practical introduction about steps in qualitative research.

**Mature Unwed Mothers** Ruth Linn, 2011-06-28 I have often wondered if the opposition to women's choosing to abort a pregnancy masks a fear of women choosing to have and raise children on their own. When a woman separates motherhood from marriage, she claims a freedom in the realm of intimate relationships that may be as fundamental as Freedom of Conscience or Freedom of Association. Yet we do not usually think about women's decisions concerning motherhood in these terms. In a pair of remarkable studies begun in the 1980s, Ruth Linn, pregnant at the time and married to a medical officer in the Israeli army, took the study of moral psychology into two highly controversial arenas of moral action: Israeli soldiers who refused to serve in Lebanon and single women who refused to remain childless. While conscientious objection to war has long been recognized as an act of moral resistance and courage, women who question societal norms and values linking motherhood with marriage are typically dismissed as bad women. Rather than approaching these questions in the abstract, Linn chose to interview women who made the decision to have and raise children on their own. What she found was that in the course of making this decision, women came to see themselves as moral resisters. In freeing their childbearing capability from men's control, they were also freeing their capacity to love. The very title of this book, *Mature Unwed Mothers*, calls us to think about what we mean by maturity on the part of mothers.
