Cultured Force Barnett Singer, John W. Langdon, 2004 Bridging gaps between intellectual history biography and military colonial history Barnett Singer and John Langdon provide a challenging readable interpretation of French imperialism and some of its leading figures from the early modern era through the Fifth Republic They ask us to rethink and reevaluate pulling away from the usual shoal of simplistic condemnation In a series of finely etched biographical studies and with much detail on both imperial culture and wars including World War I and II they offer a balanced deep strong portrait of key makers and defenders of the French Empire one that will surely stimulate much historical work in the field **Review of**

The Political Economy of Bank Regulation in Developing Countries: Risk and Reputation Emily Jones, 2020-03-12 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. International banking standards are intended for the regulation of large complex risk-taking international banks with trillions of dollars in assets and operations across the globe. Yet they are being implemented in countries with nascent financial markets and small banks that have yet to venture into international markets. Why is this? *The Political Economy of Bank Regulation in Developing Countries: Risk and Reputation* explores the politics of banking regulation in eleven countries across Africa, Asia, and Latin America. It shows how financial globalization generates strong reputational and competitive incentives for developing countries to converge on international standards. Politicians, regulators, and large banks in developing countries implement international standards to attract international investment, bolster their professional standing, and further integrate their countries into global finance. Convergence is not inevitable or uniform; implementation is often contested, and regulators adapt international standards to the local context. This book contributes to our understanding of the ways in which governments and firms in the core of global finance powerfully shape regulatory decisions in the periphery and the ways that governments and firms from peripheral developing countries manoeuvre within the constraints and opportunities created by financial globalization.

Power and reputation at the court of Louis XIII Sharon Kettering, 2018-02-28 This book seeks to rehabilitate the reputation of Charles d'Albert, duc de Luynes, the controversial favourite of Louis XIII, often maligned by historians. Kettering argues that the traditional historical interpretation of Luynes is significantly influenced by the testimony of Richelieu, who subjected Luynes to a devastating character assassination in his memoirs. Richelieu's malice and the bias in histories based upon his memoirs justify another look at Luynes' career. This book sifts through the historical evidence to offer a new perspective on Luynes, arguing that his contributions to the early years of Louis XIII's government have been insufficiently appreciated and in the process throws light upon a dark unpleasant corner of Richelieu's personality often ignored by historians. As well as advanced students and historians of early modern France, this book should interest those specialising in the history of the European courts, power, politics, patronage, and printed pamphlet literature.
